**THE INFINITY LINE**  
**FUNCTION AND DESIGN**

*The Blaser Infinity riflescopes were designed by hunters with a passion for hunting. Thanks to the sophisticated layout and intuitive handling of all functional elements, the hunter can totally focus on a safe and accurate shot. Their distinctive design gives rifle and scope a perfectly shaped overall appearance.*

**Infinity 1-7x28iC**  
 EVERYTHING IN SIGHT

The comfortable eye relief of 90 mm minimizes the risk of recoil induced eye injuries on big bore rifles. The intelligent Variable Dot IVD is an invaluable assistance in hunting for strongly self-protective game which requires instant target acquisition when approaching quickly. Thanks to the 28 mm objective lens the Infinity 1-7x28 iC is perfectly usable even in twilight, which makes it a versatile riflescope for worldwide hunting on all seven continents.

**Infinity 2.8-20x50iC**  
 COMPACT PERFORMANCE

The absolute all-rounder – whether mountain hunting, stalking or sitting game, the Infinity 2.8-20x50iC captivates with compact size and range. 20x maximum magnification and bright 50 mm objective lens merge into an extremely compact construction. Thanks to the one-of-a-kind design, rifle and scope result in a harmonious overall appearance.

**Infinity 4-20x58iC**  
 POWERFUL LIGHT RESERVE

The twilight specialist – superior for sitting game and when hunting in the very last light. Excellent light gathering characteristics far exceed what other scopes provide in low light conditions. Making the impossible long range shot possible. Compared to riflescopes featuring a 56 mm objective lens diameter, 58 mm provide an additional light yield of 7%. This allows use of a higher magnification with better detail recognition in deep twilight or at night.

Please find more information on the new Blaser Infinity riflescopes in the Blaser catalog 2018 or at [www.blaser.de](http://www.blaser.de).

RD17

## FAST ON TARGET

### Blaser Red Dot Sight – RD17

Driven hunts are an essential means to control wild boar populations. Shooting on moving game is the particular challenge. Red dot sights incorporate the ideal solution for an accurate shot. They ensure fast, intuitive target acquisition, as both eyes remain open. Thus red dot sights decisively contribute to better shooting.

The elegant, extremely slender design of the new Blaser red dot sight RD17 provides the best possible view in any situation – before and after the shot. All operating elements are designed for easy and safe operation when the hunter is ready to fire. Ten illumination settings allow for the optimum adjustment of the red dot's intensity with all lighting conditions. Thanks to its robust construction, the innovative Blaser red dot sight RD17 withstands even adverse weather conditions.

- ⊕ High-performance coating for excellent red dot contrast
- ⊕ Lens protection through Blaser flip cover
- ⊕ Extremely slender design for a maximum visual field
- ⊕ Low construction height thanks to specially adapted Blaser Saddle Mount
- ⊕ Battery life of up to 50.000 hours

### Technical Specifications

Dot size	2 MOA
Red dot reticle subtension	29 mm at 50 m / 58 mm at 100 m
Magnification	1x
Illumination setting	8 day / 2 night
Elevation adjustment range	± 40 MOA (1 click= 0.5 MOA / 14.55 mm at 100m)
Windage adjustment range	± 40 MOA (1 click= 0.5 MOA / 14.55 mm at 100m)
Weight	145 g incl. mount

### IIC – INTELLIGENT ILLUMINATION CONTROL

If the illumination control of the RD17 has not detected movement for three minutes, the lighting unit automatically switches into power saving mode. When moving again, the red dot is instantly available in the intensity that has been adjusted last. Thanks to IIC, the RD17 provides a battery lifetime of more than 50,000 hours.

Rotatable and removable Blaser flip cover for eyepiece and lens.

## BLASER SILENCER

# PROTECT YOUR HEARING. IMPROVE YOUR SHOOTING.

### PROTECTS THE HEARING OF PEOPLE AND DOGS.

Every single shot can cause irreparable damage to your hearing. It is therefore advisable to wear suitable hearing protection at all times when shooting. Practical considerations when hunting means that this is not always possible. Using moderators has become the new standard, which is hugely advantageous when hunting. The muzzle report and recoil are noticeably reduced. Both play a significant part in achieving better accuracy. The moderator provides less danger of hearing damage and the pain threshold of 130dB at the ear is rarely reached.

Please understand the legal regulations in your area and note that not every country allows their use.

*R8 SUCCESS BLACK EDITION*  
**PERFECT HARMONY**

Hand-selected walnut wood, premium black leather and a matt black receiver blend into perfect harmony – the R8 Success Black Edition. Gold-colored details round off its exclusive design. The perfectly ergonomic shape of the wooden thumbhole stock provides a completely relaxed posture for wrist and arm in any firing position ensuring consistently good shooting. The leather inlays offer a very comfortable feel and optimal grip in any situation.

**R8 Success Black Edition**

- Two-piece, ergonomically perfect walnut wood thumbhole stock
- Treated leather inlays in black on fore-end, pistol grip and comb
- Ebony fore-end tip
- Black steel brace with gold-plated lettering in the stock
- Blaser Comfort recoil pad

- Receiver in matt black finish with gold-colored R8 lettering
- Gold-colored trigger and bolt head
- Wooden ball on the bolt handle
- Grade 7 wood
- Muzzle thread 15x1
- Barrel length 52 cm

**F16 HERITAGE & GRAND LUXE**

## CRAFTED BY ARTIST'S HAND

F16 Heritage with game scene framed in leaf arabesques: pheasants on the left side, ducks on the right side.

### F16 Heritage

Fine leaf arabesques lavishly worked into traditional "Basso relief" adorn the stylish long side plates of the F16 Heritage. This elegant shotgun can be combined upon request with game scenes or fine English

Scroll. Its stock is made of finest selected grade 8 walnut wood that has slowly grown in the high altitude of the Caucasus. The F16 Heritage is available in a Game or Sporting version.

### F16 Grand Luxe

Elaborate leaf arabesques worked into traditional "Basso Relief" decorate the receiver of the F16 Grand Luxe. Upon request they can be complemented by English Scroll or game scenes. The selected Caucasian grade 6 walnut wood rounds off its elegant appearance.

The F16 Grand Luxe is available in a Game or Sporting version.

**R8 CARBON SUCCESS**

## SCIENCE AND NATURE

The best possible accuracy and suitability for practical hunting is the most important goal in the development of every Blaser rifle. Thus it is no contradiction to utilize materials which, due to their special properties, have long been indispensable in other branches of industry. Carbon fiber, best known from the racing sports, offers an astoundingly high strength at an extremely low weight. It only stands to reason that this material should be used for what is currently the best thumbhole stock on the market. The joining of carbon fiber with robust and luxurious leather inserts in the pistol grip, fore-end and butt stock results in a never-before-seen combination, one that reflects the best of both worlds in a unique as well as highly accurate hunting rifle.

### R8 Carbon Success

- Ergonomically perfect carbon stock
- Impregnated leather inlays in cocoa on fore-end, pistol grip and comb
- Pistol grip cap in carbon
- Stainless steel brace fitted in stock
- Rubber recoil pad
