THE BARRETT STORY

Inspiration can come from anywhere. For Ronnie Barrett, inspiration came in 1982, in the form of a river patrol boat featuring two Browning 50-caliber machine guns. A professional photographer at the time, Ronnie was on assignment photographing the boat for a firearms company.

Ronnie found himself drawn to the impressive Browning Ma Deuce. He began to wonder if the powerful 50-caliber cartridge could be fired from a rifle; preferably one operated from a shooter's shoulder. He made it a personal mission to find out.

Ronnie set out to build something no one thought possible—a shoulder-fired 50 caliber rifle so innovative, the Army itself would sing its praises. From sketching his designs at the dining room table to working with a local tool and die maker to create parts that didn't yet exist, every millimeter of the [Model 82](#) was a direct result of his passion for the ultimate firearm.

“When I took those drawings to machine shops for help, instead of getting encouragement, they laughed at my ideas. Not to be discouraged, I just did it anyway. The original Barrett rifle concept has turned into a world-class manufacturing company doing business around the globe,” Ronnie shared.

The obsession with firearms excellence runs deep in the Barrett family blood. Previously serving as the gun maker's lead designer, Ronnie's son, Chris Barrett, now serves as company president. “My earliest memories were of my dad shooting, and his firearms interests. He had machine guns in the 1980s, was a big time hobbyist, always shooting in sub-gun matches. He just had the coolest things in the world to a little boy.”

In his time as lead designer, Chris led the initiative to transition Barrett to a lean manufacturing system, improving their ability to deliver quality products consistently across all categories. “Chris has earned the respect of the people at Barrett by excelling in every role he has performed,” his father shared.

No matter how successful Barrett becomes though, the story keeps evolving. Ronnie explains, “At Barrett, we don't believe in resting on our laurels. In fact, we take great pride in thinking outside the box and exploring ways to continue to improve. After all, if there's one thing our success has taught us, it's this, “you're only as good as your last accomplishment.”

As for that inspiring river patrol boat photo from 1982? Incidentally, that photograph won a first-place award from the Tennessee Professional Photographers Association. To this day, it can be found hanging prominently on a wall at Barrett's Headquarters in Murfreesboro, Tennessee. [▶](#)

Barrett has grown to be the world leader in long range rifle design and manufacturing. Their products are used by civilian sport shooters, law enforcement agencies, the United States military, and more than 70 State Department approved countries across the world. The Barrett Quality Management System (QMS) has received the prestigious ISO 9001:2015 certification for the design and manufacture of firearms, ammunition, accessories, and in the training provided for those systems.

M107A1

M107A1[®]

ENGINEERED FOR ACTION.

What happens when you combine over 35 years of research and development with feedback from the most demanding military end users? You get the [M107A1](#). While it may share the same iconic look and legendary reliability of legacy Barrett firearms, that is where the similarities end.

Utilizing state of the art design, manufacturing, and materials, every component of the rifle has been engineered to be lighter and stronger than its predecessors. In addition to a 4-pound weight reduction, the M107A1 is optimized for use with a sound suppressor, providing a much needed signature reduction capability to the warfighter. Lighter, stronger, more accurate, and more capable; the M107A1 has truly been engineered for action. ■

M107A1*

M107A1[®]

It may be related to the Model 82A1[®]/M107[®], but the M107A1 is far from a simple evolution. Driven by the demands of combat, every component was re-engineered to be lighter yet stronger. The result? A high-performance rifle that weighs four pounds less than the original M107 but is every bit as tough.

FEATURES

- 1 | Thermal cheek guard
- 2 | Back up iron sights
- 3 | Suppressor-ready bolt carrier and buffer assemblies
- 4 | Nickel Teflon[®] coatings on bolt assembly for reduced maintenance
- 5 | Anti-corrosive coatings
- 6 | Lightweight aluminum upper receiver with integral 23" (58.4 cm) 27 MOA M1913 optics rail
- 7 | 20" (50.8 cm)* or 29" (73.7 cm) barrel with fully chrome-lined chamber and bore
- 8 | Accepts Barrett QDL Suppressor
- 9 | Lightweight quick detach adjustable bipod
- 10 | 10-round steel magazine with cartridge witness indicators
- 11 | Modular rear hand grip mounted on M1913 rail accepts lightweight monopod
- 12 | Sorbothane[®] recoil pad
- 13 | 5 lbs. (2.4 kg) overall weight reduction compared to original M107

Barrett Goes Twice the Distance for New Zealand Defence Force

After hitting targets at almost twice the distance of the current issue 7.62 sniper rifle, the 50 BMG Barrett M107A1 anti-materiel rifle and the Multi Role Adaptive Design (MRAD) sniper rifle in 338 Lapua Magnum are being added to the New Zealand Defence Force (NZDF) arsenal.

NZDF entered into an agreement Q4 2017 to buy 40 M107A1 rifles, 42 MRAD sniper rifles, optics, suppressors, accessories, and ancillary equipment as part of a "total system" purchase. The Barrett rifles will serve as part of the NZDF's modernization effort.

Both the M107A1 and MRAD enable soldiers to identify and engage vehicles or targets out to 1500 meters.

The weapons were picked after extensive testing and feedback the NZDF shared. The MRAD specifically was chosen after six weeks of testing various rifles at the Waiouru Military Camp. Over 10,000 rounds were fired during the stringent evaluation process.

Using the latest technology, the Barrett rifles will ensure soldiers are equipped for any battlefield environment they might encounter. "The new weapons will significantly increase the range of NZDF snipers, and with the innovation of new tripods, will increase their ability to shoot in various positions, from prone to standing," explained Major General Peter Kelly, Chief of Army, NZDF. ■

Starting mid-2018, both the M107A1 and the MRAD will be utilized by infantry units within the New Zealand Defence Forces.

MODEL 82A1®

MODEL 82A1®

THE POWERHOUSE RIFLE.

The Model 82 is where the Barrett legacy began. Engineered as the first shoulder fired semi-automatic 50 BMG rifle, the [Model 82A1](#) has been proven in combat in every environment from the snow covered mountains, to the desolate deserts, and everything in between. Its low felt recoil and reliable firepower delivers on target with every pull of the trigger. More than just a rifle, the Model 82 is an American icon. ■

MODEL 82A1[®]

After 30-plus years of making history, the powerhouse rifle that started it all is still leading the pack. With its low felt recoil and self-loading action, the Model 82A1 offers rapid accuracy that never slows down.

FEATURES

- 1 | Front and rear sling loops
- 2 | Steel receivers with durable finish
- 3 | Flip up iron sites
- 4 | Semi-automatic recoil operated
- 5 | 23" (58.4) 27 MOA M1913 rail with carrying handle
- 6 | Accepts side accessory rails
- 7 | 20" (50.8 cm) or 29" (73.7 cm) fluted barrel
- 8 | Chrome lined chamber and bore
- 9 | High efficiency arrowhead 2-port brake for 50 BMG and cylindrical 3-port brake for 416 Barrett
- 10 | Quick detach adjustable bipod
- 11 | 10-round steel magazine
- 12 | Rear hand grip accepts adjustable monopod
- 13 | Sorbothane[®] recoil pad

Available Colors

Black | OD Green | Tungsten Gray | Flat Dark Earth | Burnt Bronze

Picture this: you're facing down insurgents in a firefight for your life and your gun stops firing. What do you do?

One US Navy SEAL Commander faced this grim situation on the battlefield in Afghanistan. Unbeknownst to him, the lower receiver was accidentally bent.

Left with limited options, he called Barrett's customer service and Don Cook, a Marine Corps vet, answered the line.

Being on the field, the unit didn't have the tools needed for the repair. Improvising, Cook walked the Commander through the repair using the limited resources he had on hand. It worked.

"It's probably one of the biggest highlights in my life to be able to help a Marine unit in a firefight," Cook said in his National Geographic interview.

Within 30 seconds, the Marines were back in action. ■

"The reliability and personal service provided by Barrett goes above and beyond what I've ever experienced. Thanks for your help and support while I was on assignment in Helman Province Afghanistan..."

— Commander, US Navy SEALs

A Call from the Battlefield

MODEL 82A1*

MRAD[®]

MRAD[®]

MODULARITY WITHOUT COMPROMISE.

Designed with both precision and modularity in mind, the MRAD is equally at home on the range or on duty. Its monolithic upper receiver is machined from 7000-series aluminum, including a full-length M1913 Picatinny top rail with built-in taper for long range precision.

With mounting slots at 3, 6, and 9 o'clock, its hand guard offers a rigid, highly adaptable interface for attachment of rails, electro-optics, and other accessories. Featuring a user-changeable barrel system, the MRAD can quickly and easily be converted to one of 8 different calibers or multiple barrel lengths by simply loosening two bolts using a standard Torx wrench; no gunsmith required.

Contained within the lower receiver is a fully adjustable match-grade trigger module, allowing the user to easily set their ideal pull. The MRAD stock folds on the right side, reducing overall width for a minimal footprint and ease of transport. When extended, the stock locks securely into place, providing an interface as rigid and stable as any fixed-stock rifle.

With tool-less length of pull and cheek piece height adjustment, the MRAD is easily configured to fit shooters of all shapes and sizes. The use of ambidextrous paddle-style magazine release, left/right swappable thumb safety and AR15/M16 pistol grips makes the MRAD perfect for both right and left handed shooters. From competition to combat, the Barrett MRAD does it all. ■

MRAD®

MRAD®

Ready to follow your every move, the **MRAD** adapts to a variety of user needs without sacrificing performance. With unfailing accuracy, this bolt-action system continues to define a whole new class of long-range precision rifles.

FEATURES

- 1 | Length of pull adjustable by push button
- 2 | Polymer cheek piece is height adjustable from either side
- 3 | Lightweight folding stock provides compact mobility
- 4 | Polymer bolt guide acts as dust cover and provides smooth bolt cycling
- 5 | Integral 20 MOA 22" (55.9 cm) M1913 optics rail
- 6 | Mil-Spec Type 2, Class 3 Hardcoat anodized available in Cerakote™, Black, Flat Dark Earth, OD Green, Tungsten Grey, & Burnt Bronze
- 7 | Multiple length accessory rails can be mounted at 3, 6, and 9 o'clock positions
- 8 | Match grade barrels available in multiple lengths and profiles

- 9 | High efficiency muzzle brake
- 10 | User changeable calibers
- 11 | Relief cut magazine well for quick reloads
- 12 | 10-round, drop free, polymer magazine
- 13 | Ambidextrous magazine release is accessible while maintaining firing grip
- 14 | Oversized trigger guard for operation with gloved hands
- 15 | Fully adjustable trigger module can be removed without tools
- 16 | Accepts most standard M4/M16 pistol grips
- 17 | Thumb-operated safety configurable for right/ left-handed operation
- 18 | Sorbothane® recoil pad

Available Colors

Black | OD Green | Tungsten Gray | Flat Dark Earth | Burnt Bronze

Equipped with the MRAD, Norwegian Armed Forces Take NATO Sniper Team Competition

Being part of the European Best Sniper Squad competition is an opportunity most precision shooters dream of. The five-day competition takes place on the steep hills, muddy rivers, and shadowed forest paths of Grafenwoehr, Germany.

The competitors' skills are put to the test through 30 different challenges including: a high-angle shoot from a helicopter, a water shoot from a boat, advanced marksmanship and night shooting, land navigation, stalking, medical simulations, and more. The highly trained Norwegian Armed Forces and unfailing accuracy of the MRAD earned the squad top honors.

The Norwegian Armed Forces faced international sniper squads from Belgium, Denmark, Italy, Latvia, Lithuania, the Netherlands, Norway, Spain, Sweden, the United Kingdom, and the United States. ■

**“We promised, and we delivered!
Our sniper team won the NATO
Sniper Team competition!
Much thanks to your MRAD.”**

—Master Sniper Instructor, Norwegian Armed Forces

REC 7[®]

REC 7[®]

ELIMINATE ALL DOUBT.

The REC7 combines the familiar ergonomics of the AR style rifle with a revolutionary short stroke gas piston operating system to create a rifle that runs cleaner and more reliably than traditional designs.

Unlike direct impingement firearms that release gas into the upper receiver, the REC7 piston vents excess gas forward at its patented chrome-lined, fluted gas block, resulting in cleaner, cooler, lower-maintenance operation. The black nitride coated gas block features two positions for suppressed or unsuppressed shooting, ensuring reliability of the shot and helping to avoid unnecessary wear from over speeding the action. It also allows the user to access the piston assembly for maintenance via the front of the rifle without requiring removal of the hand guard or barrel.

The one-piece 17-4 stainless piston interfaces with a strike face that has been machined into the monolithic, anti-tilt bolt carrier.

Reengineered and reinforced for piston applications, the TB-41 DLC coated, anti-tilt, full auto bolt carrier is machined from a solid block of 8620 steel with an integrated piston strike face. It's magnetic-particle inspected, and proof tested before leaving the factory.

Both upper and lower receivers are forged from 7075-T6 aluminum, Type 3 Class 2 hardcoat anodized for durability, then finished with Cerakote for a perfect color match. The upper receiver and barrel extension feature M4 feed ramps for improved reliability, while the lightweight, free float handguard features a full-length M1913 Picatinny top rail with Magpul M-LOK accessory mounting slots at the 3, 6, and 9 o'clock positions.

Available in 5.56 NATO and 6.8 SPC, the REC7 is the first choice when your life depends on it. ■

REC7[®]

Compact, accurate and completely trustworthy, the REC7 is designed specifically for situations in which there's no room for error. Styled in the familiar AR configuration, it's a serious rifle you can trust with anything—including your life.

REC7

FEATURES

- 1 | 6-position stock
- 2 | Integrated strike face, anti-tilt bolt carrier
- 3 | Bolt carrier group is plated in a super-tough TB-41 DLC coating
- 4 | Barrett M-LOK[®] handguard
- 5 | One piece piston
- 6 | Two-position gas plug
- 7 | Barrett 3-prong flash hider or muzzle brake
- 8 | Beveled magazine well for rapid changes
- 9 | Enhanced trigger guard allows access with gloves

THERE'S NO EXCUSE NOT TO OWN THE WORLD'S FINEST CARBINE

With a nod to Eugene Stoner and his direct impingement design, Barrett is proud to produce the REC7 DI: a lightweight, modular, accurate AR that even the most die hard traditionalist can appreciate. Featuring a lengthened gas system for reliability with or without a suppressor, the REC7 DI is truly a pleasure to shoot. The upper and lower receiver are machined from 7075-T6, with all aluminum components coated in Type 3 Class 2 hardcoat anodizing, then finished with Cerakote for a perfect color match. Every human touch point has been considered and refined using the finest accessories, including Magpul furniture, custom Radian Raptor ambidextrous charging handle, Geissele or ALG Defense trigger, and extended slimline Barrett hand guard with Magpul M-LOK accessory mounting slots.

Available in 5.56 NATO, 6.8 SPC, and 300 BLK, every REC7 DI is hand built one at a time, inspected, and tested to ensure it lives up to the quality and reliability you expect from the Barrett name. ■

REC7[®] DI

After years of raising the bar on long-range shooting with our 50 caliber, Barrett has now created our next generation AR. We call it the **REC7 DI** and while incredibly light, it carries some truly weighty attributes.

REC7

FEATURES

- 1 | 6-position stock

True to Their Roots, Barrett Arms Tennessee Law Enforcement

“When the Barrett story is told, folks usually talk about the civilian shooters and militaries around the world that have chosen Barrett long-range precision rifles for more than three decades. Less-often mentioned is my father’s background as a county sheriff’s deputy, our 5.56 carbines and rifles, and the countless law enforcement agencies that choose Barrett. We want to highlight that legacy and show our strong support for law enforcement by donating these Barrett REC7 DI rifles to the sheriffs in our state,” Chris Barrett, Barrett President, said during remarks at the 2016 Tennessee Sheriff’s Association Annual Conference & Exhibition.

“As lifelong Tennesseans and builders of the Barrett Model 82A1/M107, the ‘Official State Rifle of the State of Tennessee,’ we are proud to build every one of these rifles in Tennessee. We believe that the sheriffs can use these rifles as they enforce the laws around this great state.”

In total, Barrett donated 95 Barrett REC7 DI rifles, one to each Tennessee county sheriff’s office or department.

MODEL 99TM

MODEL 99TM

MODEL 99™

Rugged. Reliable. Uncomplicated. The **Model 99** is designed for one thing only: to get the job done. With its brilliantly simple design, hard-core construction, and surprisingly few moving parts, it offers match-winning accuracy time and time again.

MODEL 99™

FEATURES

- 1 | One piece aluminum extrusion receiver
- 2 | Easy feed, single shot
- 3 | Interrupted, buttress-threaded bolt for superior lock up
- 4 | Black Mil-Spec Type 3, Class 2 hardcoat anodized base with Cerakote finish
- 5 | 13.75" (34.9 cm) 27 MOA attached M1913 optics rail
- 6 | Match grade 29" fluted* or 32" heavy barrel
- 7 | Available in 50 BMG or 416 Barrett
- 8 | 3-port high efficiency muzzle brake
- 9 | Match-quality trigger
- 10 | Quick-release assembly pins
- 11 | Rear hand grip accepts adjustable monopod

Barrett Model 99 Takes Home 2nd Place in the 2017 King of 2 Miles

Shooting a stock Barrett Model 99 chambered in 416, Barrett walked away with a 2nd place finish at the 2017 King of 2 Miles (KO2M). Shooter Ronnie Wright was named "Prince" of The 2 Mile displaying Barrett's ability to deliver precision fire on Extended Long Range (ELR) targets from a production rifle.

The KO2M is a two-day, team competition held at the world-renowned NRA Whittington Center in Raton, NM. Teams consist of one shooter with up to two wind coaches/spotters assisting. Founded in 2015, the competition continues to bring expert shooters who outperform the best distances from the year before.

While sheer shooting skills contribute to these high marks, firearm advancements have helped make the impossible possible. In real world conditions, all components need to come together to make the shot—the rifle, bullets, optics, ballistics program, bipod and team members—and work seamlessly.

Spectators were surprised to see a stock rifle finish second overall against the full-custom rifles on the firing line, speaking volumes to the quality and performance of the Barrett M99. ■

MODEL 99

Weight:	23.5 lbs (10.7 kg)
Rail Length/MOA:	11.75" (29.9 cm) 27 MOA
Overall Length:	45" (114.3 cm)
Barrel Length:	29" Fluted (73.6 cm)
Barrel Twist:	1 in 15" (38.1 cm)
Magazine Capacity:	5

FEATURES

- 1 | Compact, lightweight bullpup design
- 2 | Simplistic bolt carrier assembly with quick release lever
- 3 | Ergonomic bolt handle design
- 4 | Durable parkerized finish
- 5 | 11.25" (29.6 cm) 27 MOA M1913 optics rail
- 6 | Chrome-chambered 29" (73.6 cm) steel fluted barrel
- 7 | 3-port high efficiency muzzle brake
- 8 | 5-round steel magazine
- 9 | Accepts rear adjustable monopod
- 10 | Sorbothane® recoil pad

Black

240 LW & LWS

240LW & LWS

LIGHT ON WEIGHT. HEAVY ON PERFORMANCE.

Our nation has been at war, on several fronts, for nearly two continuous decades. Among the multitude of lessons learned about firearms and equipment, the most universal can be summarized very simply: ounces equal pounds; pounds equal pain. Understanding that speed and agility are critical factors in winning a gunfight, Barrett took a fresh look at the combat-proven 240 machine gun; a firearm in service with American forces for the last 40 years. The end result of this exercise is the revolutionary 240LW & 240LWS family of machineguns.

Utilizing modern manufacturing techniques and materials, Barrett has brought this tried and true design into the 21st century, reducing system weight by over 25% compared to legacy models. The Barrett 240LW & 240LWS eliminate the original heavy receiver that is riveted together and prone to corrosion in favor of a forged design that is precision machined and welded. These efforts have reduced the overall weight of the 240LW by 5.5 pounds and the 240LWS by 6.6 pounds, and reduced total receiver parts count from 64 to just 2. No extra steel, no rivets to vibrate loose, no rare/exotic materials—just common sense and solid engineering. ■

240LW & LWS

240LW & LWS

240LW

Though the [M240 machinegun](#) has been historically noted for its reliability, its weight has not gone unnoticed. By utilizing modern manufacturing techniques, Barrett has developed a notably lighter receiver. The result is the 20.15 lbs (9.1 kg) Barrett 240LW.

FEATURES

- 1 | Folding rear sight
- 2 | Top cover design that remains in open position, even with optics mounted
- 3 | 7" (17.8 cm) M1913 optics rail
- 4 | Ammunition belt retaining feature that facilitates single operator loading
- 5 | Belt-fed using M13 links
- 6 | Receiver machined from forgings
- 7 | Carrying handle folds in both directions for use with optics
- 8 | Quick change barrel with 1 in 12" (30.5 cm) right hand rifling twist

240LW & LWS

- 9 | Folding front sight
- 10 | 3-position adjustable gas system
- 11 | Accessory rail mounting points
- 12 | Quick detach folding bipod
- 13 | Barrett Lightweight Handguard mounts on the receiver, not on the gas tube
- 14 | Barrett telescoping buttstock with adjustable length of pull and hydraulic buffer

Available Colors

Black | Flat Dark Earth

240LWS

Taking the [240LW](#) a step further, the firing controls are moved forward and the buttstock is shortened. It packs the same punch as the 240LW but comes in a lighter, more maneuverable package.

FEATURES

- 1 | Folding rear sight
- 2 | Top cover design that remains in open position, even with optics mounted
- 3 | 7" (17.8 cm) M1913 optics rail
- 4 | Ammunition belt retaining feature that facilitates single operator loading
- 5 | Belt-fed using M13 links
- 6 | Receiver machined from forgings
- 7 | Carrying handle folds in both directions for use with optics
- 8 | Quick change barrel with 1 in 12" (30.5 cm) right hand rifling twist

240LW & LWS

- 9 | Folding front sight
- 10 | 3-position adjustable gas system
- 11 | Accessory rail mounting points
- 12 | Quick detach folding bipod
- 13 | Barrett Lightweight Handguard mounts on the receiver, not on the gas tube
- 14 | Barrett telescoping buttstock with adjustable length of pull and hydraulic buffer

ACCESSORIES

AM & DC SUPPRESSOR SOUND IS JUST THE START

Sound suppression is only one metric by which suppressors are measured. While the [AM & DC suppressors](#) do offer world class decibel reduction, they also take into consideration other critical factors such as accuracy, point of impact shift, weight, and flash reduction.

The AM & DC suppressors are made of a lightweight, high strength Titanium alloy, which is 100% CNC machined and orbital welded to minimize weight without sacrificing durability. The suppressor bore is wire EDM cut for perfect concentricity to ensure rifle accuracy is not compromised and point of impact shift is both minimal and repeatable every time. Last but not least, for military and law enforcement customers, these suppressors are specifically engineered and tested to eliminate muzzle flash—even in low light environments. The AM30 & AM338 quickly attach to a recoil-reducing Barrett muzzle brake, whereas the DC30 & DC338 connect directly to your rifle threads for the ultimate in simplicity. Whichever you choose, rest assured that your rounds will be on target when it counts.

Available Colors

Black | Flat Dark Earth | Natural Titanium

The AM30 & AM338 quickly attach to the Barrett muzzle brake

SPECS

Model	Caliber	Length	Diameter	Weight	Sound Reduction	Mount & Thread Pitch
AM 30	30 and less	8.3" (21.1 cm)	1.50" (3.8 cm)	.775 lbs (0.4 kg)	-25-30 dB	Barrett® Muzzle Brake Adaptor: 5/8 x 24
DC 30	30 and less	8.3" (21.1 cm)	1.50" (3.8 cm)	.775 lbs (0.4 kg)	-25-30 dB	Direct Thread: 5/8 x 24
AM 338	338 and less	9.9" (25.2 cm)	1.75" (4.5 cm)	1.29 lbs (0.7 kg)	-23-28 dB	Barrett® Muzzle Brake Adaptor: 3/4 x 24
DC 338	338 and less	9.9" (25.2 cm)	1.75" (4.5 cm)	1.42 lbs (0.6 kg)	-23-28 dB	Direct Thread: 3/4 x 24

QDL SUPPRESSOR BIG BORE SIGNATURE REDUCTION.

The 50 BMG has been present on nearly every battlefield in every war fought in the last 100 years. Its raw power has become a staple of American and allied fighting forces, but it took Barrett ingenuity to transform this machinegun cartridge into a viable option for long-range sniper and anti-material shoulder fired rifles. The [QDL suppressor](#) takes this capability one step further, adding not only sound, but also signature reduction to the platform.

Specifically engineered for the M107A1, Model 99, and Model 95, the QDL attaches to the rifle via proprietary recoil reducing muzzle brake, and maintains 100% function and reliability. The baffle stack features redundant 360 degree CNC welds to contain the extreme pressures, while the suppressor's dual-layered tube is constructed of high strength alloys to ensure both durability and safety in any condition. In another industry first, the QDL incorporates a ported recoil reducing brake that can be easily removed when muzzle flash is a priority. Simply slide the suppressor over the muzzle brake and twist the lock-ring—perfect alignment every time. Guaranteed.

Available Colors

Black | Flat Dark Earth

SPECS

Model:	Barrett QDL Suppressor
Caliber:	50 BMG
Length Added:	12.73" (32.2 cm)
Diameter:	2.5" (6.4 cm)
Length:	14.84" (37.7 cm) without detachable auxiliary muzzle brake
Weight:	4.88 lbs (2.2 kg)
Finish :	Black or FDE Cerakote
Total Decibel Reduction:	23 dB
Mount:	Quick Detach 1/4 Turn Lock Ring
Materials:	4130 Steel

ZERO-GAP® RINGS SEAMLESS PERFECTION.

Unlike traditional scope rings which require careful attention be paid to maintaining equal gap between the upper and lower ring halves, Barrett's ZERO-GAP technology eliminates this tedious process. Simply tighten the cap on the indicated side, verify reticle alignment, tighten the remaining side, and fire away. The end result is a perfect fit between scope and mount that will withstand even the heaviest recoiling rifles. Machined from 7075-T5 aluminum and with MIL-SPEC Type III anodized finish, [ZERO-GAP Rings](#) are available in a variety of heights for both 30mm, 34mm, and 35mm optics. Simplicity at its finest.

SPECS

Weight:	8.32oz (235.9g), 8.5oz (239.6g)
Size:	30 mm, 34 mm
Base Type:	Mil-STD M1913 Rail
Tensile Strength:	83 ksi
Ring Width:	1.2" (3.1 cm)
Surface Gripping Area:	8.192 inch ²
Material:	7075 T-6 Aluminum
Finish:	Hard Anodized Black
Height:	1.0"-1.7"

ULTRA HIGH

Up to **56mm** objective with lens cover and extended scope rail.

HIGH

Up to **50mm** objective with lens cover and extended scope rail.

MEDIUM

Up to **40mm** objective with lens cover and extended scope rail.

LOW

Up to **30mm** objective or smaller caliber rifles and 6"-7" scope rails.

TRAINING COURSES

Barrett's training department is ready to take you to the next level. Learn the intricacies of long-range shooting and maintain your Barrett rifles at an armorer level. Offering long-range shooting courses at locations around the country, as well as armorer courses at its Murfreesboro, Tennessee, factory, Barrett has the course to fit your large-caliber training needs. Call **615.896.2938** for tuition details.

82A1/ M107 ARMORER

The [82A1 / M107 Armorer Course](#) covers all 82 Series rifles. The two-day (16 hr) course covers troubleshooting and in-depth maintenance procedures. Upon successful completion of the course, each student is presented with a certification which is valid for three years. Mobile training available upon request.

MRAD ARMORER

[This one-day \(8 hr\) course is geared toward MRAD® owners](#), law enforcement and military personnel, and gunsmiths. It covers depot level maintenance to keep these Barrett bolt action rifles in top operating condition. The course covers troubleshooting and in-depth maintenance procedures for MRAD® rifles. Upon successful completion of the course, each student is presented with a manufacturer certification of completion which is valid for three years.

REC7 ARMORER

The [REC7 / M468 Armorer Course](#) covers all Barrett direct impingement and piston driven AR style rifles over a two day (16 hr) period of instruction. The course covers operation, troubleshooting, and in-depth maintenance procedures. Upon successful completion of the course and the final exercise, each student is presented with a certification of being qualified as a Barrett Certified Armorer, valid for three years.

REC7 OPERATORS

The Barrett two-day [REC7 Operators Course](#) teaches you the necessary fundamentals needed to employ semi-automatic rifles safely, efficiently, and with enthusiasm for shooting sports. Learn the operational aspects of the rifle system to thorough cleaning and lubrication as well as safely and effectively engaging targets at extended ranges.

MODEL 95/99 ARMORER

This [one-day \(8 hr\) course](#) is geared toward gun owners, gunsmiths, law enforcement and military personnel. It covers everything needed to keep Barrett bolt action rifles in top operating condition. The course covers troubleshooting and in-depth maintenance procedures for the Model 95 and Model 99™ rifles. Upon successful completion of the course, each student is presented with a certification which is valid for three years.

LONG RANGE I

[Long Range I is a three-day \(24 hr\) course](#) that teaches shooters the fundamentals of marksmanship and introduces components of successful long range shooting including wind estimation, ballistics, and data collection. Long Range I is a learning experience for both the new and experienced shooters. Finish the course with a chance to hit the 10 ring at 1000 yards.

LONG RANGE II

[Long Range II](#) is a three-day (24 hr) course taught exclusively at the NRA Whittington Center; students will be paired into shooter / spotter teams. After warming up on the 1000 yard known distance range, be prepared for the challenges of shooting on the unknown distance range at distances exceeding 1500 yards. Long Range I is a prerequisite for this course.

PRECISION RIFLE

[Barrett Firearms Precision Rifle training](#) is a commemorative teaching method using lessons learned from marksmen and snipers throughout history. You are expected to have a high level of basic knowledge of firearms, long range marksmanship skills, and abilities to make long range precision rifle shots. This course will provide you with additional instruction in areas we feel are crucial to your weapons serviceability, long term maintenance, and success as a precision marksman.

REC7 BUILD

Do you want the chance to build your own Barrett Rifle? [This Course covers the full assembly process of Barrett REC7® GEN II gas piston and direct impingement rifles](#) over a one day (8 hr) period of instruction. You will be instructed on the complete assembly and maintenance of your personal rifle. This course also covers dry-fire operation, troubleshooting, repair, and operator maintenance procedures. Upon successful completion of the course, each student will be presented with a certificate of conformance for a Barrett factory built REC7® Gen II to go along with your personal rifle.

DISCLAIMER | All combat sequences are simulated. Barrett products are offered only for target, hobby, recreational, sport, defensive, and agency use where not otherwise prohibited by law.

Barrett has grown to be the world leader in long range rifle design and manufacturing. Their products are used by civilian sport shooters, law enforcement agencies, the United States military, and more than 70 State Department approved countries across the world. The Barrett Quality Management System (QMS) has received the prestigious ISO 9001:2015 certification for the design and manufacture of firearms, ammunition, accessories, and in the training provided for those systems.

The obsession with firearms excellence runs deep in the Barrett family blood. "It's one thing to manufacture guns and another to live and breathe them. Whether we're carefully assembling our latest rifle, engineering scope rings to be stronger than ever, or increasing the velocity and precision of the ammunition itself-we're always working with one goal in mind: there's always a better way." - Ronnie Barrett, Barrett CEO and Founder
