

Kimber®

2018

MADE IN AMERICA

UNEQUALED QUALITY.

EVEN BEFORE THE FIRST KIMBER® rifle was completed some 39 years ago, manufacturing firearms of unequalled quality was already Kimber's singular goal. Do this, it was reasoned, and everything else will fall in line. On the strength of that commitment, Kimber has become the world's largest producer of 1911 pistols and the market leader in classic hunting rifles. Recent introductions of dynamic platforms like the Micro 9 and K6s handguns,

WHAT ALL GUNS SHOULD BE™

along with PepperBlaster® less-lethal products, have established Kimber® as an innovator as well; a position that will continue to solidify as new firearms and accessories are launched. Quality is the true measure of value. Whether it means accuracy or dependability, the beauty of a finish or the precise fit of wood to metal, quality is an integral part of every Kimber.

kimberamerica.com

Kimber

NEW PRODUCTS

KIMBER'S EVER-EVOLVING QUEST to build premier U.S. manufactured firearms drives us to apply our signature quality, performance and reliability into new lines of handguns and rifles, along with the expansion of existing platforms. From concealed

carry and personal defense to target shooting and game hunting, our constant pursuit of perfection pushes us—being the best is not good enough. That is why Kimber is What All Guns Should Be™.

MICRO & MICRO 9

2018 BRINGS SOME of our most popular family stylings to our Micro and Micro 9 models. The Micro and Micro 9 TLE wear black and grips in the same colorway as their 1911 cousins. The Micro and Micro 9 Coverts are finished in KimPro® II gray with urban camo Crimson Trace Lasergrips. Eclipse fit and finish now has a home in the Micro and Micro 9 platform, and 5 new models carrying Hogue® Wrap Around Grips and TRUGLO® TFX™ Pro Day/Night sights have joined the platform.

AEGIS ELITE

FOUNDED ON THE idea that custom work does not have to take custom time, Kimber again takes what would be a long process and brings it to a dealer near you—mini red dot sight (MRDS) mounted 1911s.

HERO CUSTOM

THE BOOT CAMPAIGN stands for serving those who have given so much for our country, and we couldn't be more proud to stand with them on this special edition 1911. We could not find a more fitting name for this model than Hero.

KHX

KHX MODELS SET a new standard for today's 1911. Hexagonal stair-stepped serrations for a positive grip surface no matter the conditions, bright fiber optics and Hogue's Enhanced MagGrip G10 grips give you all the advantages asked for but in an innovative format. The Optics Ready (OR) models come pre-milled for plates that mount a variety of red dot sights to create your ideal MRDS 1911.

K6s STAINLESS 3"

K6s ADDITIONS

THE WILDLY POPULAR K6s revolver family has gotten three new editions: K6s CDP; K6s DC; and K6s Stainless 3". After hearing our customers call for a longer barreled version, we're happy to introduce this model in our 2018 lineup.

HUNTER, OPEN COUNTRY, ADVANCED TACTICAL SOC II

Expanding our popular Hunter platform to include two new patterns, a low-visibility black barrel and action, and a limited Boot Campaign edition, our Hunter rifle will truly have a model for every hunter. Our Advanced Tactical SOC II is updated with a McCree stock in Sniper Gray and FDE, built for Law Enforcement and long-range precision competitors. Open Country expands to the .308 Win. and the new Granite stock with KimPro® II black barrel and action.

HANDGUN SELECTION GUIDE

MICRO™ .380 ACP pistols include many proven 1911 design elements that make them comfortable to carry, quick and safe to operate, and easy to shoot accurately. With a starting weight of 13.4 ounces and barrel length of 2.75 inches, they are well-suited for concealed carry. Mild .380 ACP recoil, smooth single-action trigger pull and well-designed sights make them a pleasure to shoot. They are also a perfect fit for any size hand.

- Short 2.75-inch barrel and thin profile ensures concealability
- With a starting weight of 13.4 ounces, Micro pistols are easy to carry
- Smaller grip dimensions provide a good fit for all hand sizes

MICRO 9™ pistols bring the 9mm caliber to our popular Micro family. Continuing with the concealable size and comfortable ergonomics of the Micro pistols, the Micro 9 pistols are equally safe and easy to shoot accurately. Only a small step up in size, they have a starting weight of 15.6 ounces and a barrel length of 3.15 inches. Manageable 9mm recoil, a smooth single-action trigger pull, available in a variety of finishes and sights, there is a Micro 9 for every shooter.

- Short 3.15-inch barrel and thin profile ensures concealability
- With a starting weight of 15.6 ounces, Micro 9 pistols are easy to carry
- Smaller grip dimensions provide a good fit for all hand sizes

ULTRA+™ models combine the 3-inch barrel and light weight of Ultra models with a full-length grip for improved recoil control. They are a better fit for shooters with large hands and accept full-length magazines with additional capacity. Weighing just 27 ounces (2 ounces more than an Ultra) the increased control provided by the full-length grip is a significant advantage for many shooters, improving accuracy and reducing time between shots.

- Barrel is just 3 inches long for easy concealment
- Full-length grip fits shooters with larger hands
- Weighing just 27 ounces, Ultra+ pistols are easy to carry
- Available in .45 ACP

PRO™ models may be the best all-around 1911 configuration, combining a 4-inch barrel with a full-length grip. It is certain to be an ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames while others have heavier steel frames, and two models include the Kimber Tactical Rail™ for mounting lights and accessories. All have a near-perfect balance that makes shooting them easy, accurate and fun.

- Barrel is 4 inches long to optimize balance and concealability
- Full-length grip fits shooters with larger hands
- Frame options permit a model selection that meets multiple needs
- Available in 2 calibers

SUGGESTED USE ICONS

Below and on the following pages you will find a suggested use based on the size and features of each gun. This icon does not necessarily mean a certain firearm is not suitable for other uses. Visit our website or call our customer service staff for questions.

CARRY

The features and size of these firearms are well-suited for personal defense situations.

HOME DEFENSE

The features and size of these firearms are well-suited for in-home defense.

MULTIPLE USE

These firearms are suitable for use in a variety of spaces, in and outside of the home.

TARGET

Topped with adjustable sights, these 1911s are well-suited for competition or a day at the range.

LE

The features on these firearms make them an excellent choice for duty carry.

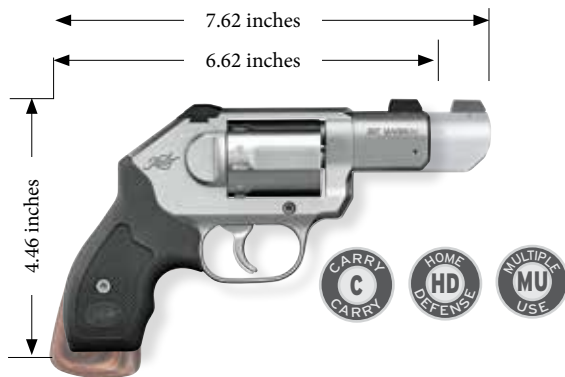

HUNT

These models are well-suited for backcountry camp protection and handgun hunting.

K6s[®] models have a 6-round capacity, compact frame and cylinder, and a 2- or 3-inch barrel. There is an internal hammer, and edges are rounded and blended so they are less likely to hang up on clothing. For those that require power in a small package with mild recoil, the K6s fits the bill as it is designed to handle both .357 Magnum and .38 Special +P ammunition. This makes them well-suited for backup or concealed carry.

- Compact 6-round capacity cylinder
- 2- or 3-inch barrel
- Ergonomic grip design for easy recoil control
- Available .357 Magnum/.38 Special

ULTRA[™] models are easy to conceal and comfortable to carry with their 3-inch bull barrels and short grips. Most frames are made from aluminum rather than steel to reduce weight. While light pistols do have a slight increase in felt recoil, this is minimized by Kimber's recoil system and unequaled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality helps ensure this does not compromise either dependability or accuracy.

- Barrel is just 3 inches long for easy concealment
- Short grip for concealability and comfortable carry
- Most Ultra models weigh just 25 ounces
- Available in 2 calibers

CUSTOM[™] models are full-size 1911 pistols featuring a 5-inch barrel and full-length grip. The most popular configuration, they are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, they are easier to shoot accurately and have reduced felt recoil. The slim profile and outstanding 1911 ergonomics make them well-suited for duty, personal defense and general use.

- Full-length grip fits shooters with larger hands
- Barrel is 5 inches long for optimal velocity and accuracy
- Wide selection of models for any application
- Available in 4 calibers

LS models are full-size 1911 pistols featuring a 6-inch barrel and full-length grip. An ideal configuration for competition or as a hunting side-arm, the Long Slide 1911s are a popular platform at the range and in the field because of their inherent accuracy and recoil reducing weight.

- Full-length grip fits shooters with larger hands
- Barrel is 6 inches long for optimal velocity and accuracy
- Porting, optics installed, adjustable sights, rounded heel frame are among features on these models
- Available in 2 calibers

Each of these pistols overlays the image of a custom-size 1911 for comparison.

MADE IN AMERICA

ACCURACY, DEPENDABILITY and meaningful features determine the true quality of a pistol. On the strength of quality, Kimber® has become the world's largest pro-

ducer of 1911 pistols. Compare a Kimber 1911 with any other brand—or any other type of semi-automatic—and see why Kimber is What All Guns Should Be™.

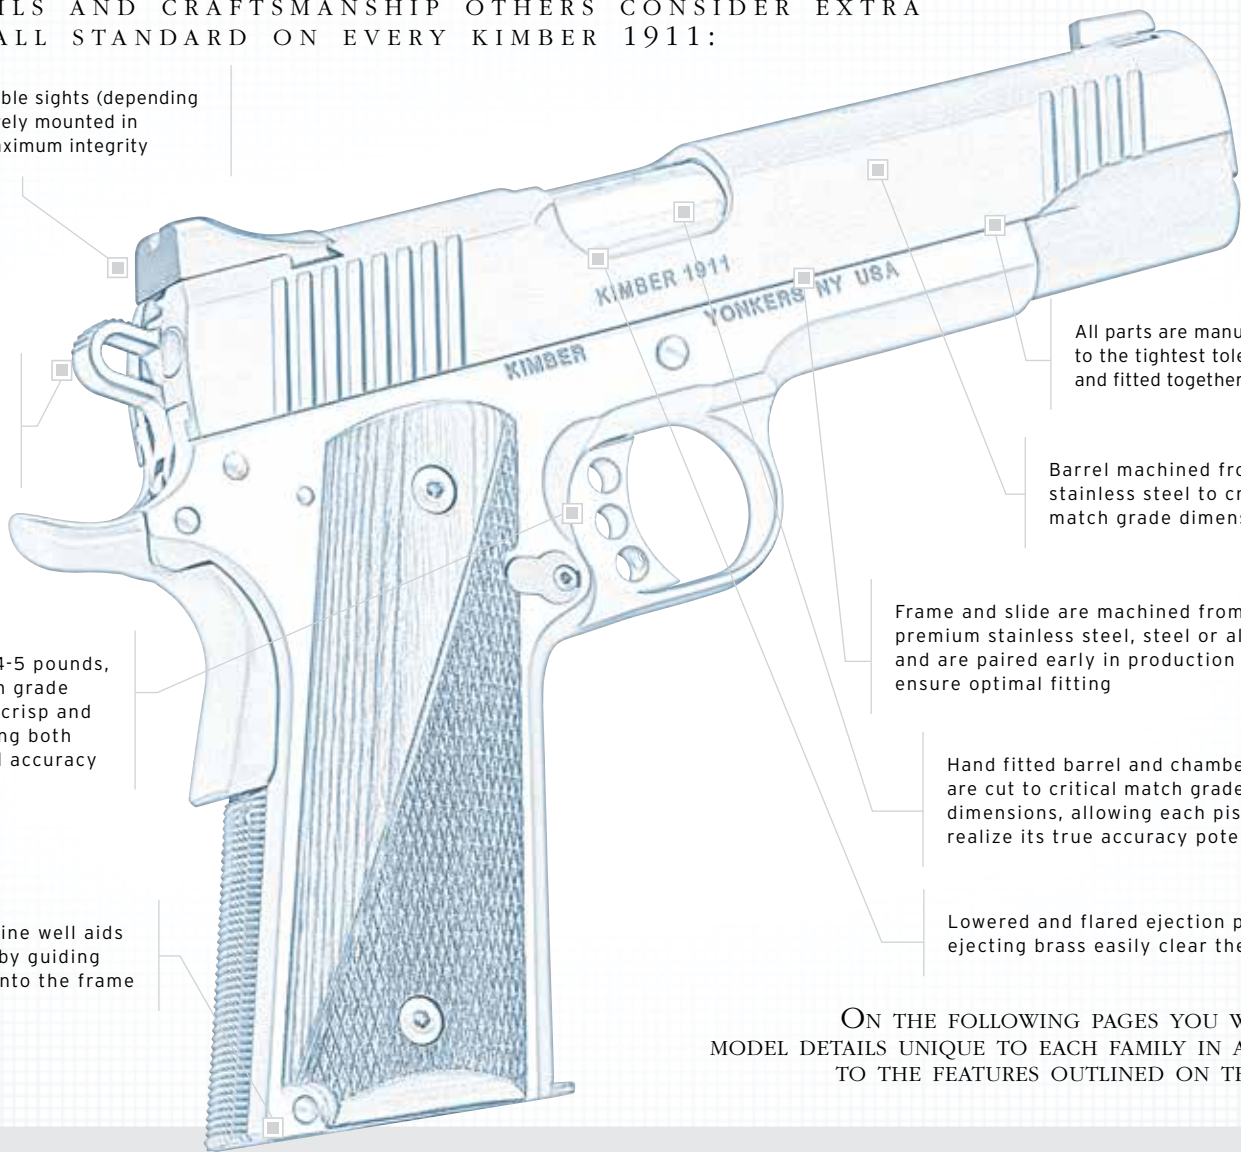

DETAILS AND CRAFTSMANSHIP OTHERS CONSIDER EXTRA WE CALL STANDARD ON EVERY KIMBER 1911:

Fixed or adjustable sights (depending on model) securely mounted in dovetails for maximum integrity

Commander-style hammer will not cut or snag

With a pull of 4-5 pounds, Kimber's match grade trigger breaks crisp and clean, increasing both confidence and accuracy

Beveled magazine well aids fast reloading by guiding the magazine into the frame

All parts are manufactured to the tightest tolerances and fitted together by hand

Barrel machined from solid stainless steel to critical match grade dimensions

Frame and slide are machined from premium stainless steel, steel or aluminum and are paired early in production to help ensure optimal fitting

Hand fitted barrel and chamber are cut to critical match grade dimensions, allowing each pistol to realize its true accuracy potential

Lowered and flared ejection port lets ejecting brass easily clear the slide

ON THE FOLLOWING PAGES YOU WILL FIND MODEL DETAILS UNIQUE TO EACH FAMILY IN ADDITION TO THE FEATURES OUTLINED ON THIS PAGE.

Kimber® builds the world's finest 1911 pistols to the tightest tolerances right here in America. Moreover, each critical component is manufactured inside the Kimber factories; getting it right means doing it yourself. The finest raw materials form the foundation and Kimber does the rest, ensuring every part meets unequal standards. America's best shooters, including legendary SWAT units and United States Marines assigned

to the U.S. Special Operations Command, have chosen Kimber for its quality, dependability and accuracy. So should you. Descriptions of each Kimber 1911 family of pistols are presented throughout the following pages. To locate your nearest Kimber Master Dealer or find complete descriptions of each model pictured in this catalog, visit kimberamerica.com.

THE ACCURACY, dependability and renowned Kimber features of this family set the standard against which all other 1911 brands and models are measured. Their legendary performance has made Kimber the world's largest producer of 1911 pistols. The Stainless II is built entirely from stainless steel while the Pro and

Ultra models have stainless steel slides and lightweight aluminum frames. The Stainless Target (LS), new for 2018, brings the 6-inch barrel length and series I configuration to this benchmark family. Combine these foundations with the slim nature of the 1911 and you have the cornerstone in carry and concealability.

RAPTOR PISTOLS TAKE their name from a combination of aggressive slide and frame serrations, feathered logo grips and special scaled texturing accents. While this patented design is unique, the features, dependability and accuracy are pure Kimber. Tritium night sights, ambidextrous thumb safety and a

bumped and grooved grip safety are all standard with the Raptor family. Stainless Raptors offer a choice of calibers, 9mm or .45 ACP, and all Ultra models feature a Round Heel Frame. The quality of the Kimber 1911 rivals America's finest gunsmiths; hold a Raptor and see for yourself.

*Includes Crimson Trace Lasergrips®.
A complete presentation of specifications and features begins on page 74.

THE MASTER CARRY FAMILY of .45 ACP pistols combine Kimber performance and popular concealed carry features into one extraordinary package. Tactical Wedge tritium night sights, a Round Heel Frame with serrated mainspring housing and Crimson Trace Master Series™ Lasergrips® are all standard. KimPro® II finish on the slide provides additional resistance to

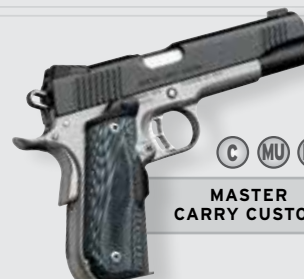

the elements, and rounded edges on the frame and slide will not snag clothing or holsters. The Master Carry Custom has a stainless steel frame, while the Master Carry Pro and the Master Carry Ultra have lightweight aluminum frames. Whichever you choose, any member of the Master Carry family is sure to meet every need.

THE NEW COVERT .45 ACP PISTOLS are the perfect combination of light weight and meaningful features. With a gray color palette, flush-cut barrel and Round Heel Frame on Ultra models, Covert pistols feature both Crimson Trace Lasergrips® and Tactical Wedge tritium night sights; two sight systems that will ensure you acquire your sight picture regardless of light conditions. The 30 lines-per-inch front strap checkering with a bordered base helps ensure a positive grip even

with cold, wet or gloved hands. The Carry Melt™ treatment contours, rounds and blends all edges so they will not snag on clothing or holsters. A bumped and grooved beavertail grip safety provides control under stress, while the mainspring housing with lanyard slot on the Custom and Pro models add an extra level of safeguard if needed. Kimber Covert quality ensures unequaled accuracy and dependability; there is no reason to be afraid of the dark.

KHX 1911s are loaded with features that set them apart. Hexagonal serrations on the slide and topstrap, Stiplex frontstrap surfacing, fiber optic ledged sights, a partnership with the industry's leading grip company, Hogue®, has all of the models wearing their MagGrip system that brings the grip surface to the mainspring housing. KHX Ultra, Pro, and Custom models wear the laser equipped MagGrips that feature a red laser.

Optics Ready (OR) models are milled to accept plates for some of the most popular mini red dot sights available today. Pro and Ultra models have a rounded heel frame for comfort and reduced printing during carry. Completely finished in KimPro® II gray with black small parts, these aggressively styled 1911s will find themselves at home on the range or on your person.

ANOTHER BRAND-NEW FAMILY making its debut in 2018 is the Aegis Elite. Rounded heel frames and two-tone styling completed with G-10 Cyclone patterned grips make these standouts in any environment. AEX pattern serrations are a stylish answer to the practical need for grip surface during reloads. Aegis Elite feature fiber optic sights on the Ultra,

Pro, and Custom models, while the Optics Installed (OI) Pro and Custom models have the Vortex® Venom® Red Dot, with a 6MOA dot, milled and installed before leaving Kimber. Remaining true to Kimber's original purpose, this puts an otherwise custom gun within the reach of every shooter's hands.

A complete presentation of specifications and features begins on page 75.

GOLD MATCH PISTOLS deliver a standard of performance unequaled by any other brand or model of production 1911, and they best many full-custom pistols as well. Each Gold Match model has a stainless steel match grade barrel fitted by hand for exceptional accuracy and looks as good as it shoots, with flat surfaces polished to a high shine and contrasting satin over the curves. Features include an ambidextrous thumb safety, adjustable sights, serrated flat top slide,

match grade Premium Aluminum Trigger™, 30 lines-per-inch front strap checkering and elegant rosewood grips. Team Match® II wears Kimber's tough KimPro® II finishes on both the frame and slide, and features an engraved 24-karat gold USA Shooting logo. Designed for competition, the accuracy and dependability of Gold Match pistols have made them a favorite for all-around use.

Rimfire Compact Conversion Kit™ (silver)	1100485	.22 LR	4	13

A complete presentation of specifications and features begins on page 75.

SHOOTING A RIMFIRE is an effective way to teach new shooters and enhance the training of others, regardless of their level of experience. Our Rimfire Target Conversion Kit™ (fits 4- and 5-inch barrel models) and Rimfire Compact Conversion Kit™ (fits 3- and 4-inch barrel models) are compatible with

Kimber and most other MIL-SPEC 1911 pistols. Conversion kits are designed to operate with high velocity .22 LR ammunition. Adding a Rimfire Conversion Kit to any 1911 gives you two pistols in one and pays for itself in just a few hundred rounds.

KIMBER CONTINUES IN ITS TRADITION of providing custom finishes and features that stand out in a crowd. Making a statement above and beyond the ordinary, the Kimber Custom Shop offers striking gem-tone finishes with the quality and dependability you expect. Both the gemstone and precious metal collections feature polished PVD-finished slides and small parts. Slides are accented by intricate engraving and topped with tritium night sights. Coordinating grips are slim, allowing for

increased hand contact for any size of hand. The RMEF® Camp Guard 10™, the ultimate backcountry protection, and Stainless II (Engraved Edition), a beautiful testament to skilled engraving, find themselves in good company with the Hero Custom—new for 2018 and in partnership with the Boot Campaign. With Kimber, performance and reliability are not compromised when unique finishing details are desired.

DETAILS THAT SET US APART.

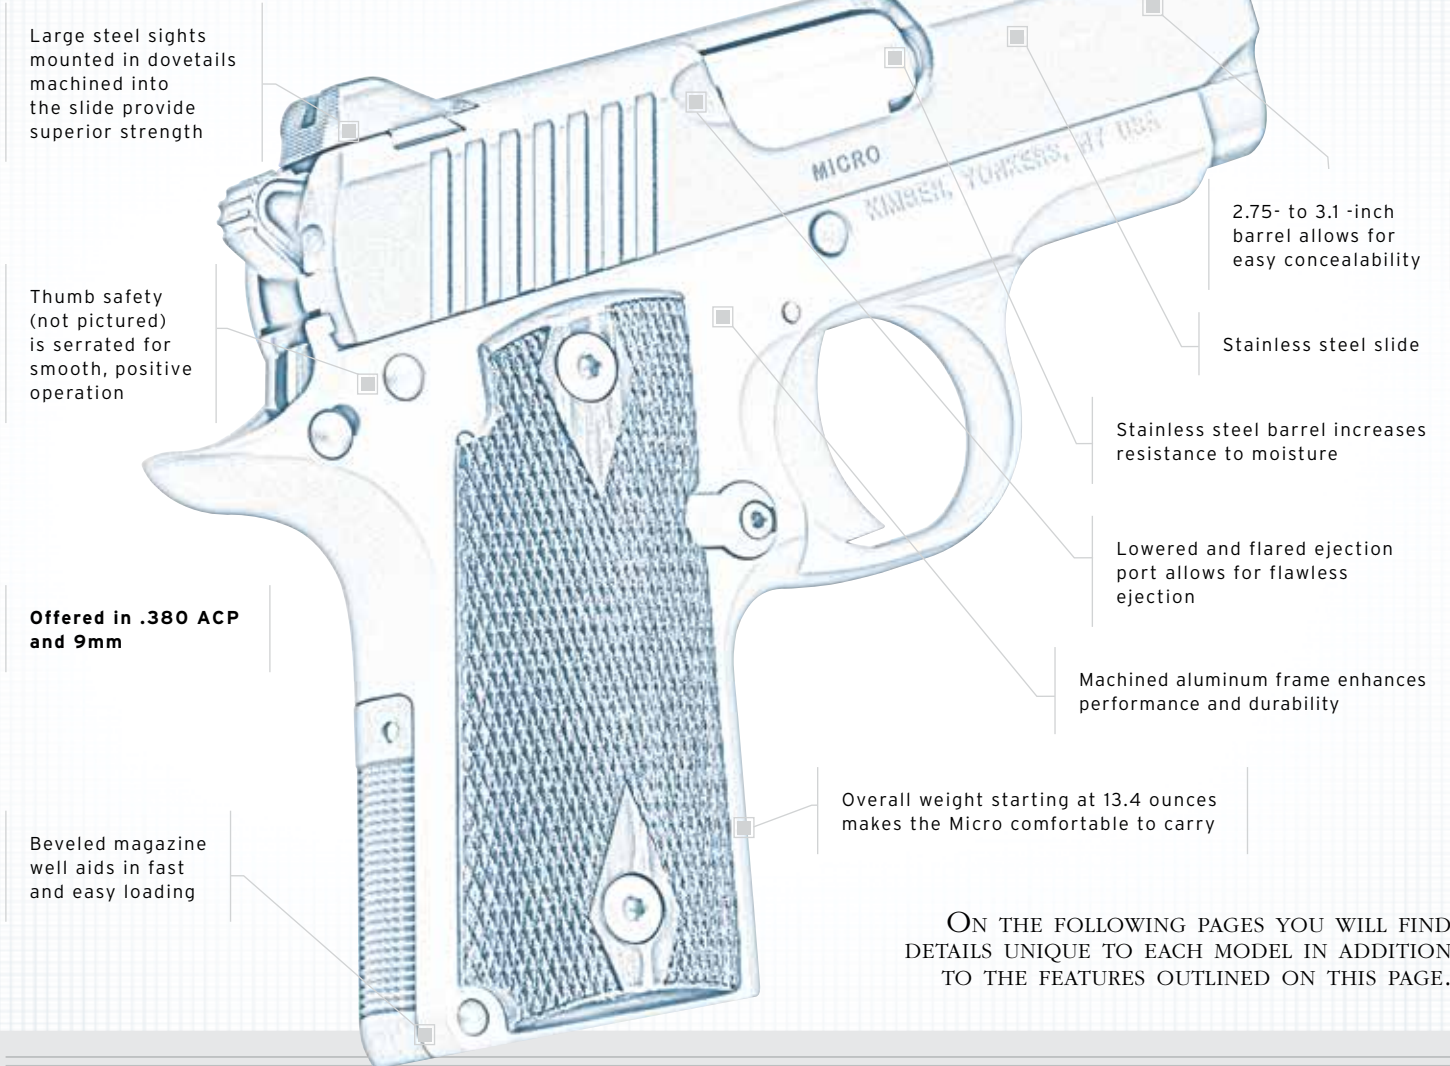

MADE IN AMERICA

MICRO™ .380 ACP AND 9MM PISTOLS bring an unmatched level of safety, dependability and performance to concealed carry. Small and light, they blend Kimber quality with superior 1911-

like ergonomics and simple operation. Mild recoil and a smooth single-action trigger pull make them a pleasure to shoot.

SUPERIOR FEATURES AND DETAILS FOUND ON EVERY KIMBER MICRO PISTOL:

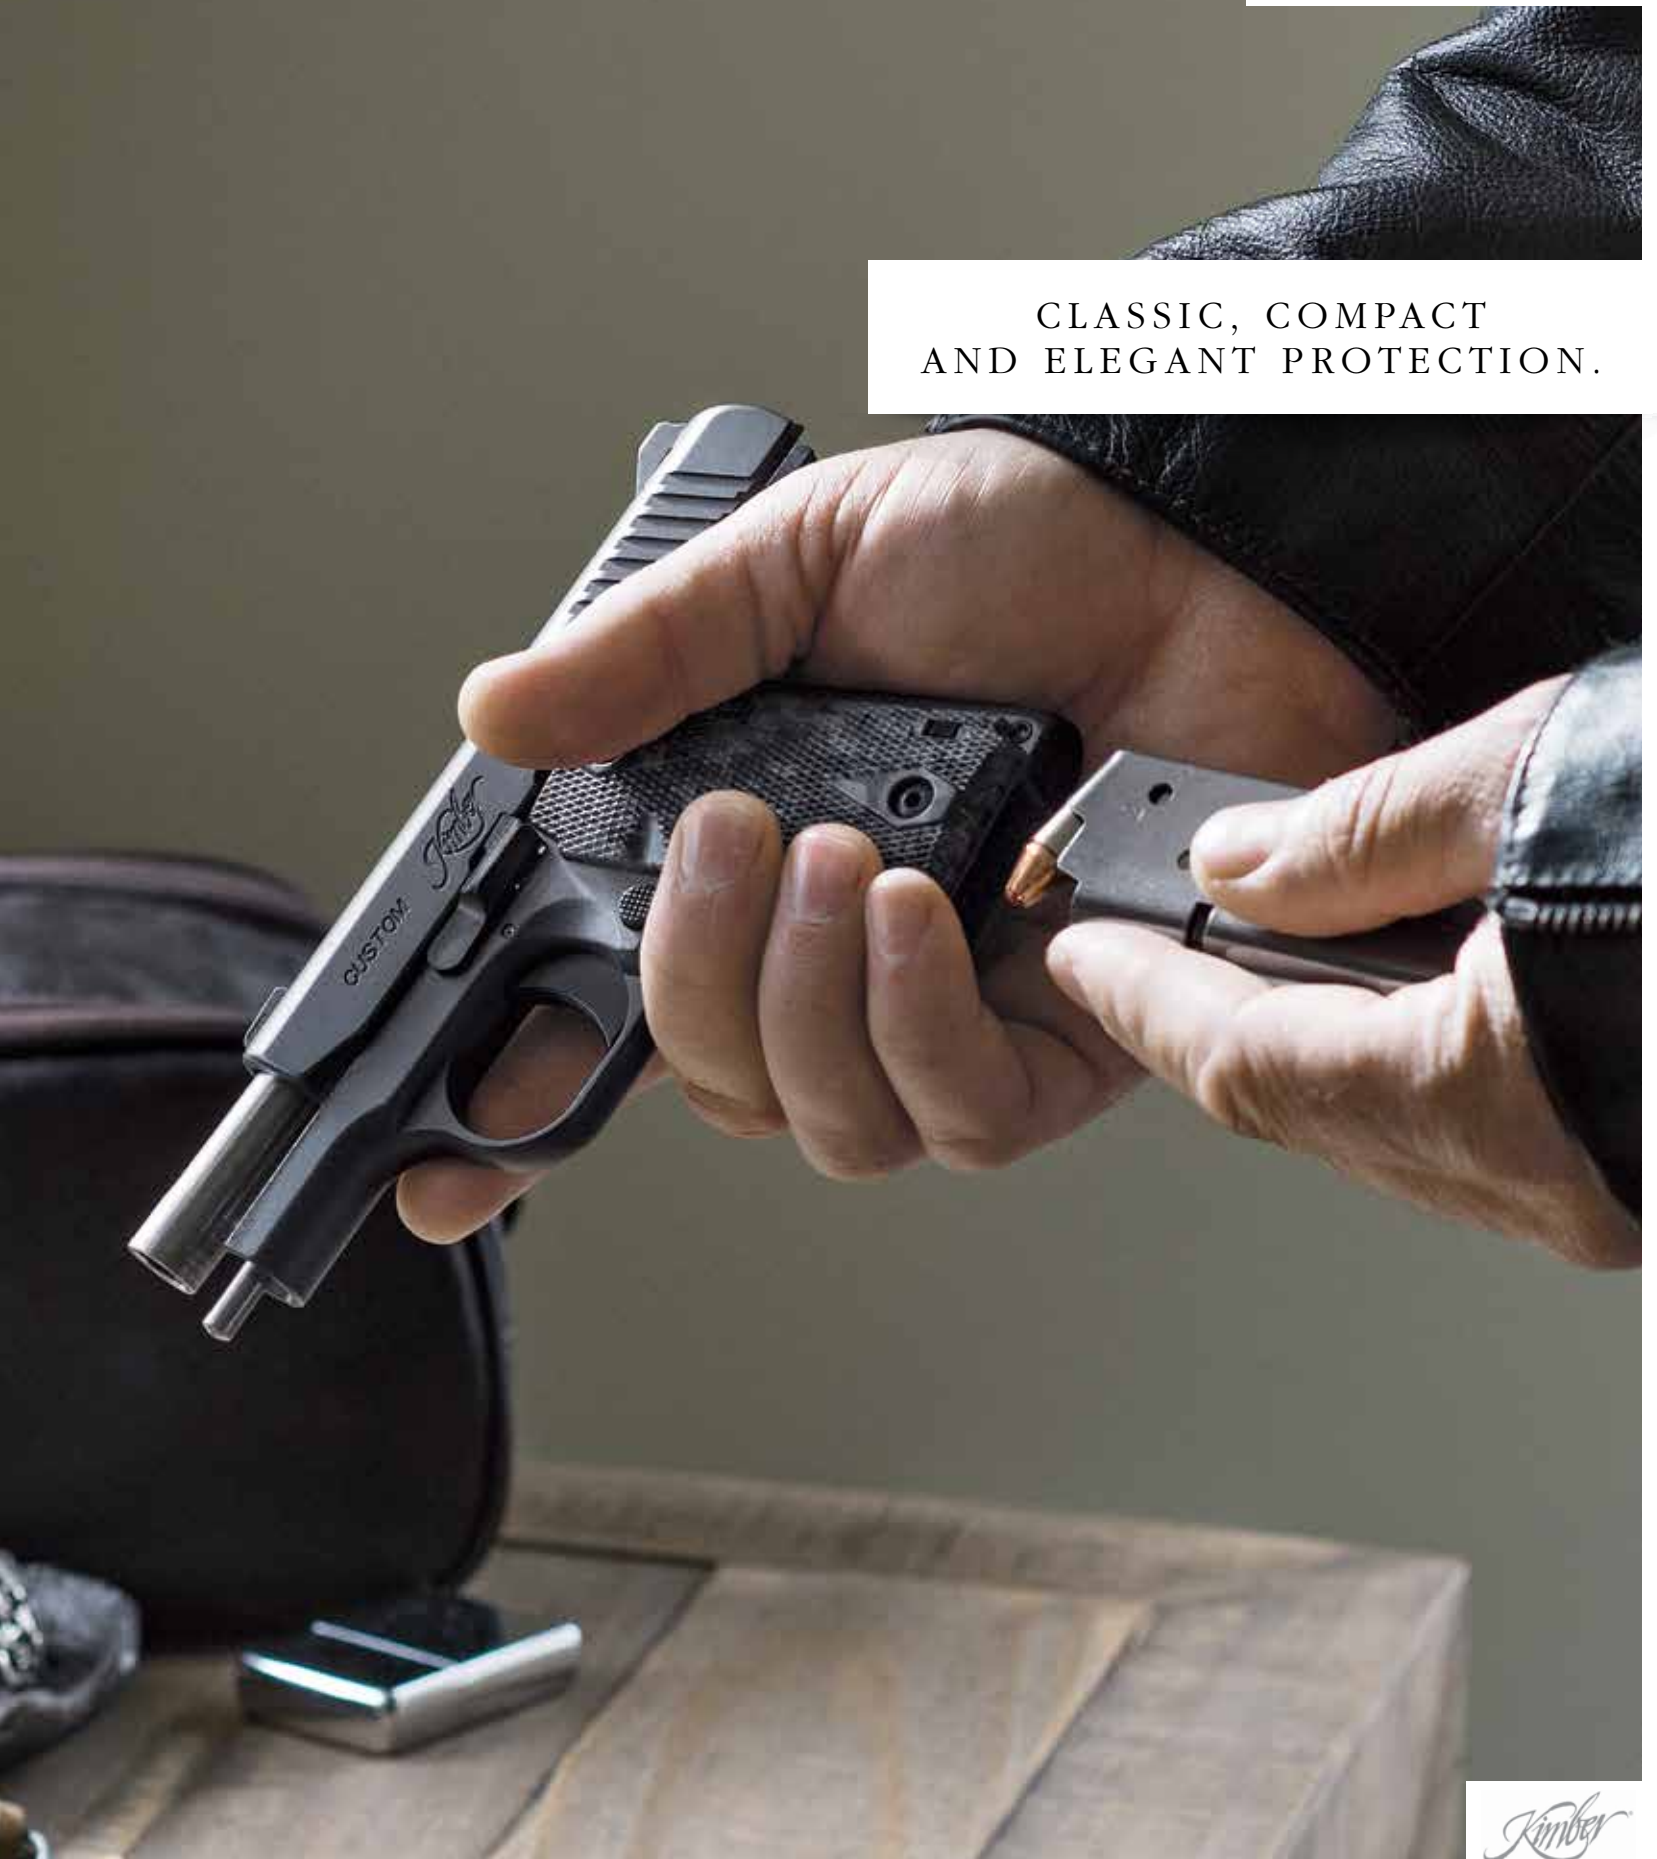

ON THE FOLLOWING PAGES YOU WILL FIND DETAILS UNIQUE TO EACH MODEL IN ADDITION TO THE FEATURES OUTLINED ON THIS PAGE.

With a starting weight of 13.4 ounces and a barrel length of 2.75 inches, Kimber Micro™ .380 ACP and 9mm pistols are easy to carry and conceal. Micro barrels are machined from stainless steel for superior resistance to moisture, and all Micro frames are shaped from the finest aluminum for integrity and strength. In many respects a miniature 1911, the Micro offers important design advantages like a single-action trigger with a short, smooth pull that ensures accuracy and builds confidence. Its thumb safety, slide stop and magazine release are pure 1911 as well. Standard features include a

lowered and flared ejection port for flawless ejection and a beveled magazine well for fast, positive loading. Sights are steel – not plastic – and mounted in machined dovetails for additional integrity. Each Micro includes an extended 7-round magazine; flush-fitting 6-round magazines are available. Well-suited for all shooters, including those with small hands and those who insist on mild recoil, Micro provides power for concealed carry, home protection and many other applications in our smallest platform yet. Best of all, they offer unequaled Kimber quality, dependability and performance.

MADE IN AMERICA

KIMBER K6s™ REVOLVERS set the bar for concealed carry revolvers by bringing an unmatched level of performance and shootability to concealed carry. Compact and light with the

smallest .357 Magnum cylinder ever offered and a light, no-stack trigger, the K6s blends superior ergonomics and simple operation. Kimber K6s is the revolver of the next generation.

KEY FEATURES AND DETAILS THAT ARE FOUND ON ALL KIMBER K6s REVOLVERS:

Removable front and rear sights

Recessed chambers

Concealable profile with six-round cylinder designed to minimal dimensions

Shooter-friendly ergonomics with push button cylinder release

Light, smooth, no-stack double-action trigger

Serrated back strap

Small and light, the K6s weighs 23 ounces

THE KIMBER K6s™ IS AMONG THE MOST ACCURATE, shootable and dependable compact revolvers available today. Delivering on size and power, the K6s is the smallest 6-shot revolver on the market today that is specifically designed to fire .357 Magnum defensive

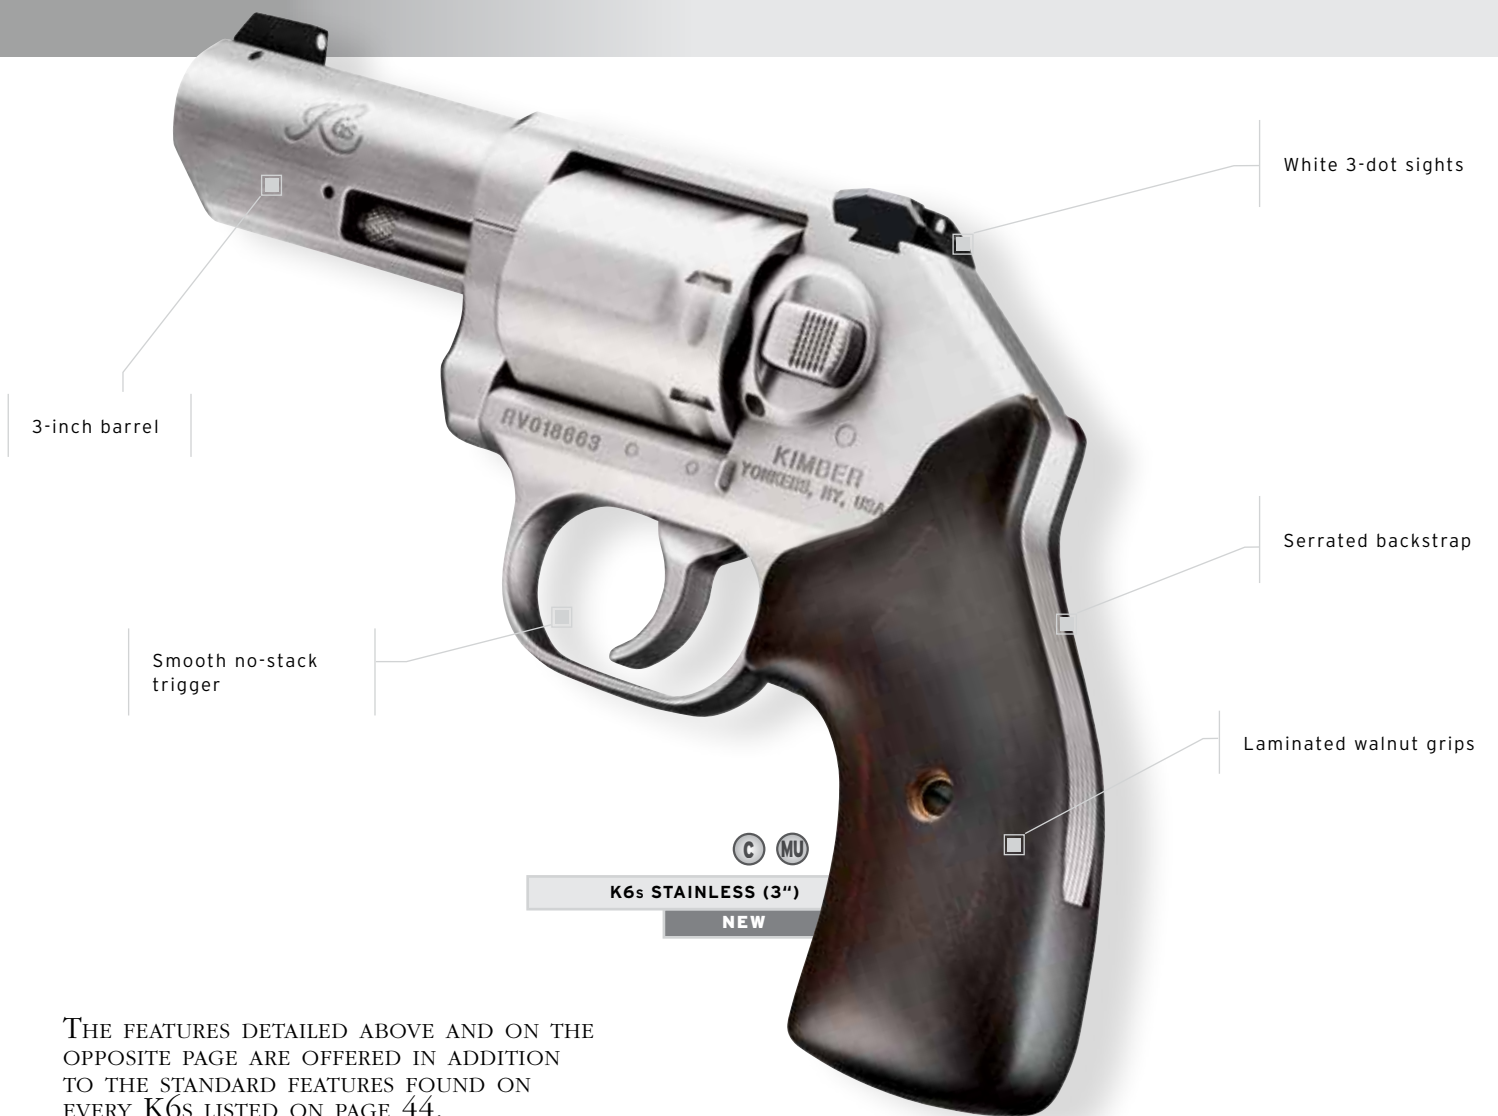

ammunition. Mild recoil and a smooth double-action trigger pull make these revolvers a pleasure to shoot. Kimber engineers pushed the envelope to create the smallest and most comfortable .357 Magnum ever.

K6s REVOLVER

EVOLVING THE REVOLVER.

Kimber

K6s REVOLVERS

K6s STAINLESS (3")
NEW

THE FEATURES DETAILED ABOVE AND ON THE OPPOSITE PAGE ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY K6s LISTED ON PAGE 44.

With the smallest cylinder capable of holding 6 rounds of .357 Magnum (also compatible with .38 Special) offered today, K6s™ compact revolvers are well-suited for backup, concealed carry and home defense. The small frame, 2- and 3-inch barrel and 1.39-inch diameter cylinders are machined from the finest stainless steel for superior integrity, strength and resistance to moisture. The K6s offers important design features, including an advanced double-action trigger with a short, smooth, no-stack trigger that creates confidence while ensuring accuracy. The hammer is internal and edges are

rounded and blended to prevent hang up when the revolver is removed from concealment. 2018 brings the addition of the first 3-inch barrel for the K6s family, the K6s Stainless (3"), as well as two 2-inch barreled models, the classic K6s CDP and the sleek K6s DC. For those who require a small package with mild recoil, K6s provides the power needed for concealed carry, home protection and many other applications. Best of all, they offer unequalled Kimber quality, dependability and performance.

A photograph of a rifle with a scope resting on a log in a field of tall grass at sunset. The rifle is positioned horizontally, with the scope pointing towards the right. The background shows a landscape with mountains and trees under a warm, golden sky. The foreground is filled with tall, dry grasses.

RIFLES

IT'S NOT JUST HUNTING.

RIFLE SELECTION GUIDE

CUSTOM DETAILS AND FEATURES FOUND STANDARD ON ALL KIMBER RIFLES:

Straight comb stock design projects recoil into the shoulder, not up and over or into the cheekbone

Positive 3-position wing safety with serrated lever is the finest ever designed

Full-length Mauser claw extractor delivers superior controlled round feeding and extraction

Crisp, factory-set match-grade trigger

Four actions are designed around caliber families so you never have to carry more weight than you need

ON THE FOLLOWING PAGES YOU WILL FIND MODEL DETAILS UNIQUE TO EACH MODEL IN ADDITION TO THE FEATURES OUTLINED ON THIS PAGE.

THE KIMBER BRAND GOES BACK TO 1979, and its rifles have been favored by discriminating hunters and shooters ever since. Kimber offers a wide selection of classic sporting, hard-core hunting, unique varmint and no-compromise tactical rifles. Each

is based on an action size designed with minimal dimensions for the cartridge's family. Accuracy is the best measure of rifle quality, and reliability follows. Each rifle is guaranteed under the Kimber SUB MOA Accuracy Standard.

KIMBER RIFLES OFFER A COMBINATION OF FEATURES that set them apart from other production brands. Barrels, chambers and triggers are crafted with critical match grade dimensions for unmatched accuracy. All of Kimber's rifles are controlled round feed. Pillar and glass bedding add strength and ensure that nothing shifts under recoil or during rough use. Walnut stocks are finished and checkered by hand, and reinforced carbon fiber stocks are the

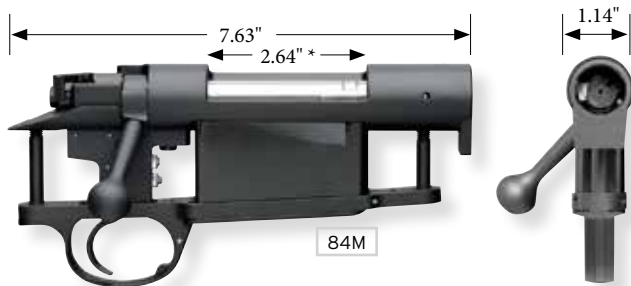

Barrel and chamber machined to critical match grade dimensions with rigid quality control ensures exceptional accuracy

Pillar and/or glass bedding provides strength and accuracy

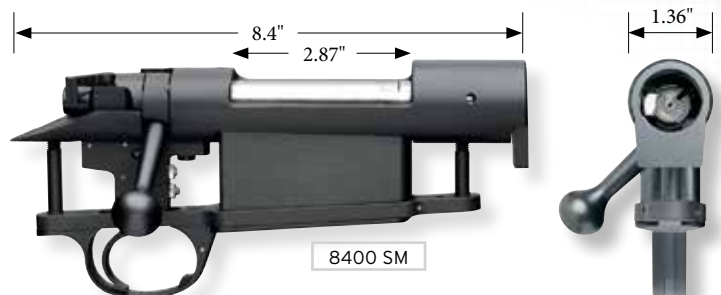

Each proportioned action gives near perfect balance for fast, positive aiming

*This dimension is 2.40 inches in actions chambered for .204 Ruger and .223 Rem.

84M ACTION FEATURES

- The 84M (Medium) action has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win.
- As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation
- Barrel is an optimal length for the flattest trajectory and superior accuracy
- Magazine capacity is 3-6 rounds, depending on caliber chambering
- Available in 19 models and 9 calibers

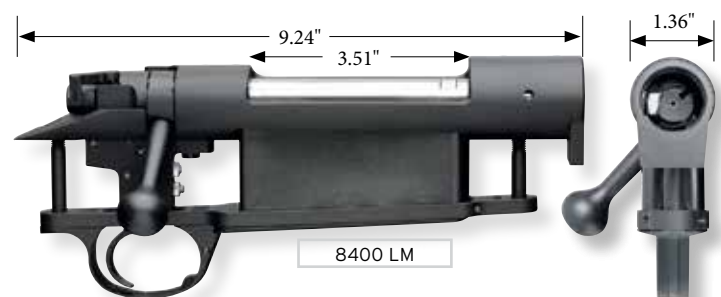

8400 SM ACTION FEATURES

- The 8400 SM (Short Magnum) action sized for Short Magnum cartridges has a greater diameter but remains as short as possible to reduce weight and ensure proper balance
- Barrel is the proper length for maximum velocity and flat trajectory
- Ideal for almost any North American big game
- Magazine capacity is 3-4 rounds, depending on caliber chambering
- Available in 8 models and 4 calibers

84L ACTION FEATURES

- The 84L (Long) action has the minimal diameter of the 84M but is slightly longer to fit America's most popular and powerful hunting cartridges, such as the .270 Winchester and .30-06 Springfield
- The lightest rifle in its class
- Barrel is an optimal length for the flattest trajectory and superior accuracy
- Magazine capacity is 3-5 rounds, depending on caliber chambering
- Available in 9 models and 4 calibers

8400 LM ACTION FEATURES

- The 8400 LM (Long Magnum) action has the additional length required by some of the world's most powerful cartridges, such as .300 Winchester Magnum and .458 Lott
- Suitable for hunting both large and dangerous game
- Barrel is the proper length for maximum velocity and balance
- Magazine capacity is 3-5 rounds, depending on caliber chambering
- Available in 8 models and 6 calibers

finest worn by any production rifle. Descriptions of each rifle family are presented throughout the following pages, and more than 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that will meet your needs. To locate your nearest Kimber Master Dealer, find complete information on each model or view product videos, please visit kimberamerica.com.

TRADITIONAL

CLASSIC SELECT GRADE

SUPERAMERICA

KIMBER'S TRADITIONAL BIG-GAME RIFLES offer an unequalled combination of features, elegance and performance. All actions have minimal dimensions for the cartridges they chamber, permitting a trim overall profile that reduces weight by as much as two pounds. All traditional rifles include critical design features that ensure performance and dependability. Stocks are born of fine walnut and then checkered and finished by hand. The elegant pillar and glass bedded sporter stock is carefully shaped and

dimensioned from fine walnut for both recoil control and quick pointability. This properly dimensioned classic stock and recoil-absorbing 1-inch Pachmayr Decelerator® recoil pad diminish felt recoil. The Kimber-designed straight comb stock slides back into the shoulder, not up into the cheekbone. A sculpted steel bottom metal has a floorplate release inside the trigger bow that prevents accidental opening. Just as hunting is more than a sport, a Kimber traditional rifle is more than just a rifle.

NEW
HUNTER (REALTREE EDGE)

- Reinforced synthetic stock in Realtree Edge™
- Detachable magazine for quick, easy loading and unloading
- Weather-resistant stainless steel barrel and action with KimPro® II black finish
- Controlled round feed

THE KIMBER HUNTER offers our legendary accuracy and performance paired with a patent-pending synthetic stock and removeable box magazine. Three new models join the original Hunter rifle, with barrel and receiver now being available in low-profile, matte-black KimPro® II finish, and stocks available in Realtree Edge™ pattern and Kryptek Highlander™. Paired with a barrel and action in finish that controls light reflection

and an incredibly popular pattern, the Hunter (Realtree Edge™) is a winning combination for our Northeastern hunters. Our Boot Campaign rifle carries the Boot Campaign logo engraved on the barrel, and a portion of the proceeds go directly to this charity that works to help veterans across the United States. Chambered in a wide selection of calibers, this rifle family offers the ideal combinations for any type of game.

THE FEATURES DETAILED ON THESE PAGES ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY RIFLE LISTED ON PAGE 50.

A TRUE MOUNTAIN RIFLE must be light and accurate—hard-core hunters understand. Montana™, Adirondack™, Mountain Ascent™, and Subalpine models are the lightest production big-game rifles ever offered, delivering legendary Kimber accuracy yet still weighing as little as 4 pounds, 13 ounces. Reinforced carbon fiber stocks add strength, and stainless steel shrugs the elements. All Kimber Mountain rifles offer a threaded barrel for optional use of muzzle brakes and suppressors. Montana and Subalpine rifles combine all the best Kimber features in a lightweight, stainless steel and reinforced carbon fiber package

that helps ensure performance. Adirondack and Mountain Ascent models go even further. Featuring a combination of spiral fluted bolt body and hollow bolt knob, the Adirondack is compact for fast maneuvering. The Mountain Ascent has additional custom features, including a fluted barrel and muzzle brake to reduce felt recoil. Both wear Gore™ Optifade™ soft-touch stock treatments that blend into any environment and ship with matte black ring mounts. Optifade ring mounts and muzzle brake accessories are available separately. These rifles have no equal.

Single-leaf sight

Barrel band sling swivel stud

Hooded adjustable front sight

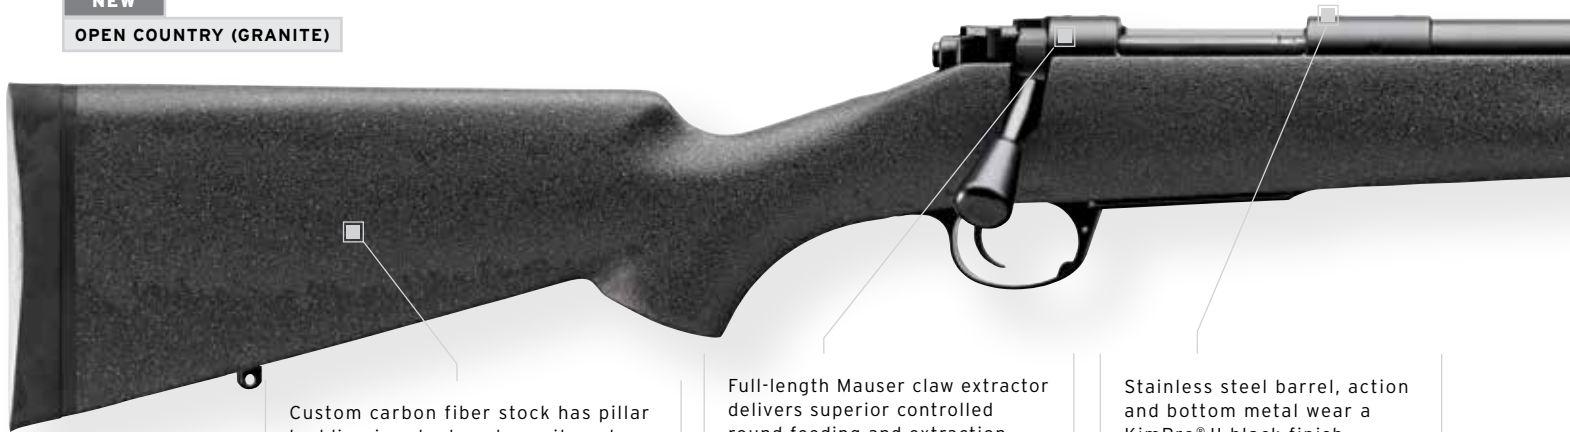

KIMBER DANGEROUS GAME rifles deliver unwavering reliability and charge-stopping energy. Equally important, they have critical features absent from other production rifles in heavy calibers. The Caprivi™ is designed for Africa and the Talkeetna™ is ready for the unpredictable weather of Alaska — places where Kimber quality takes on a whole new level of importance. The Model 8400 Caprivi has a AA-grade French walnut stock with a hand-rubbed oil finish, 24 lines-per-inch wrap-around checkering, ebony forend tip and traditional pancake cheek piece. It also has a 3-leaf island express sight with the fixed leaf regulated for 50 yards. The Talkeetna has a stainless steel barreled action and reinforced carbon fiber

stock — the finest ever offered in a production dangerous game rifle — and is mounted with a single-leaf express sight. Both the Caprivi and Talkeetna have a full-length Mauser claw extractor for true controlled-round feeding and extraction, plus a 3-position safety that is positive, quiet and fast. A barrel band sling swivel stud will not contact the forward hand during recoil. Front sights on both of these rifles are hooded and adjustable for elevation, and both folders remain green for custom regulation. These are the best production dangerous game rifles available, and the game they were designed to hunt deserve nothing less.

OUR OPEN RANGE rifles come with fluted, heavy barrels, in both wood and carbon fiber stocks, giving you all the advantages a hunter would demand for accuracy in that environment. The Longmaster Classic keeps with tradition and offers the heavy, contoured barrel in a beautiful A-grade walnut stock. Open Country delivers tack-driving performance in a manageable long-range rifle. The Open Country's hand laid carbon graphite stock lends strength without excessive weight. The finish on the new Open Country (Granite) stock gives a slight

texture to help weld grip and give confidence in feel no matter the conditions. For our hunters interested in a patterned rifle, the Open Country stock has a soft touch finish in Gore™ Optifade™ Open Country. Threaded barrels give shooters the option to add accessories of their choice. Now available in .308 Win. and 6.5 Creedmoor in both models, the Open Country rifle is an ideal choice for those long-distance, open-range hunts.

LONGMASTER VT

- Laminated high comb target stock
- 26-inch stainless steel bull barrel
- Controlled round feed

SVT

- Laminated high comb target stock
- 18.25-inch stainless steel bull barrel
- Controlled round feed

VARMINT AND HEAVY BARRELED RIFLES MUST DELIVER pinpoint accuracy with absolute consistency regardless of field conditions. This group of Kimber rifles ensures this level of performance through a combination of match grade components, careful bedding and proper design. Light to heavy, there is a Kimber varmint rifle for any type of predator hunting or varmint shooting. Varmint™ and Pro Varmint™ models are perfect for hunters who move and call. SVT™ (Short Varmint/Target) and LongMaster® VT™ (Varmint Target) are best suited

for a day overlooking a prairie dog town. The Varmint configuration has a heavy target stock shaped from ultra-stable laminated wood blanks. A high comb and deep pistol grip with palm swell is well-suited for shooting prone or from a bench. All models have sculpted steel bottom metal with a floorplate release inside the trigger guard, which is both functional and elegant. Four specialized models cover it all, from predator calling to working from a stand.

ADVANCED TACTICAL SOC II (SG)

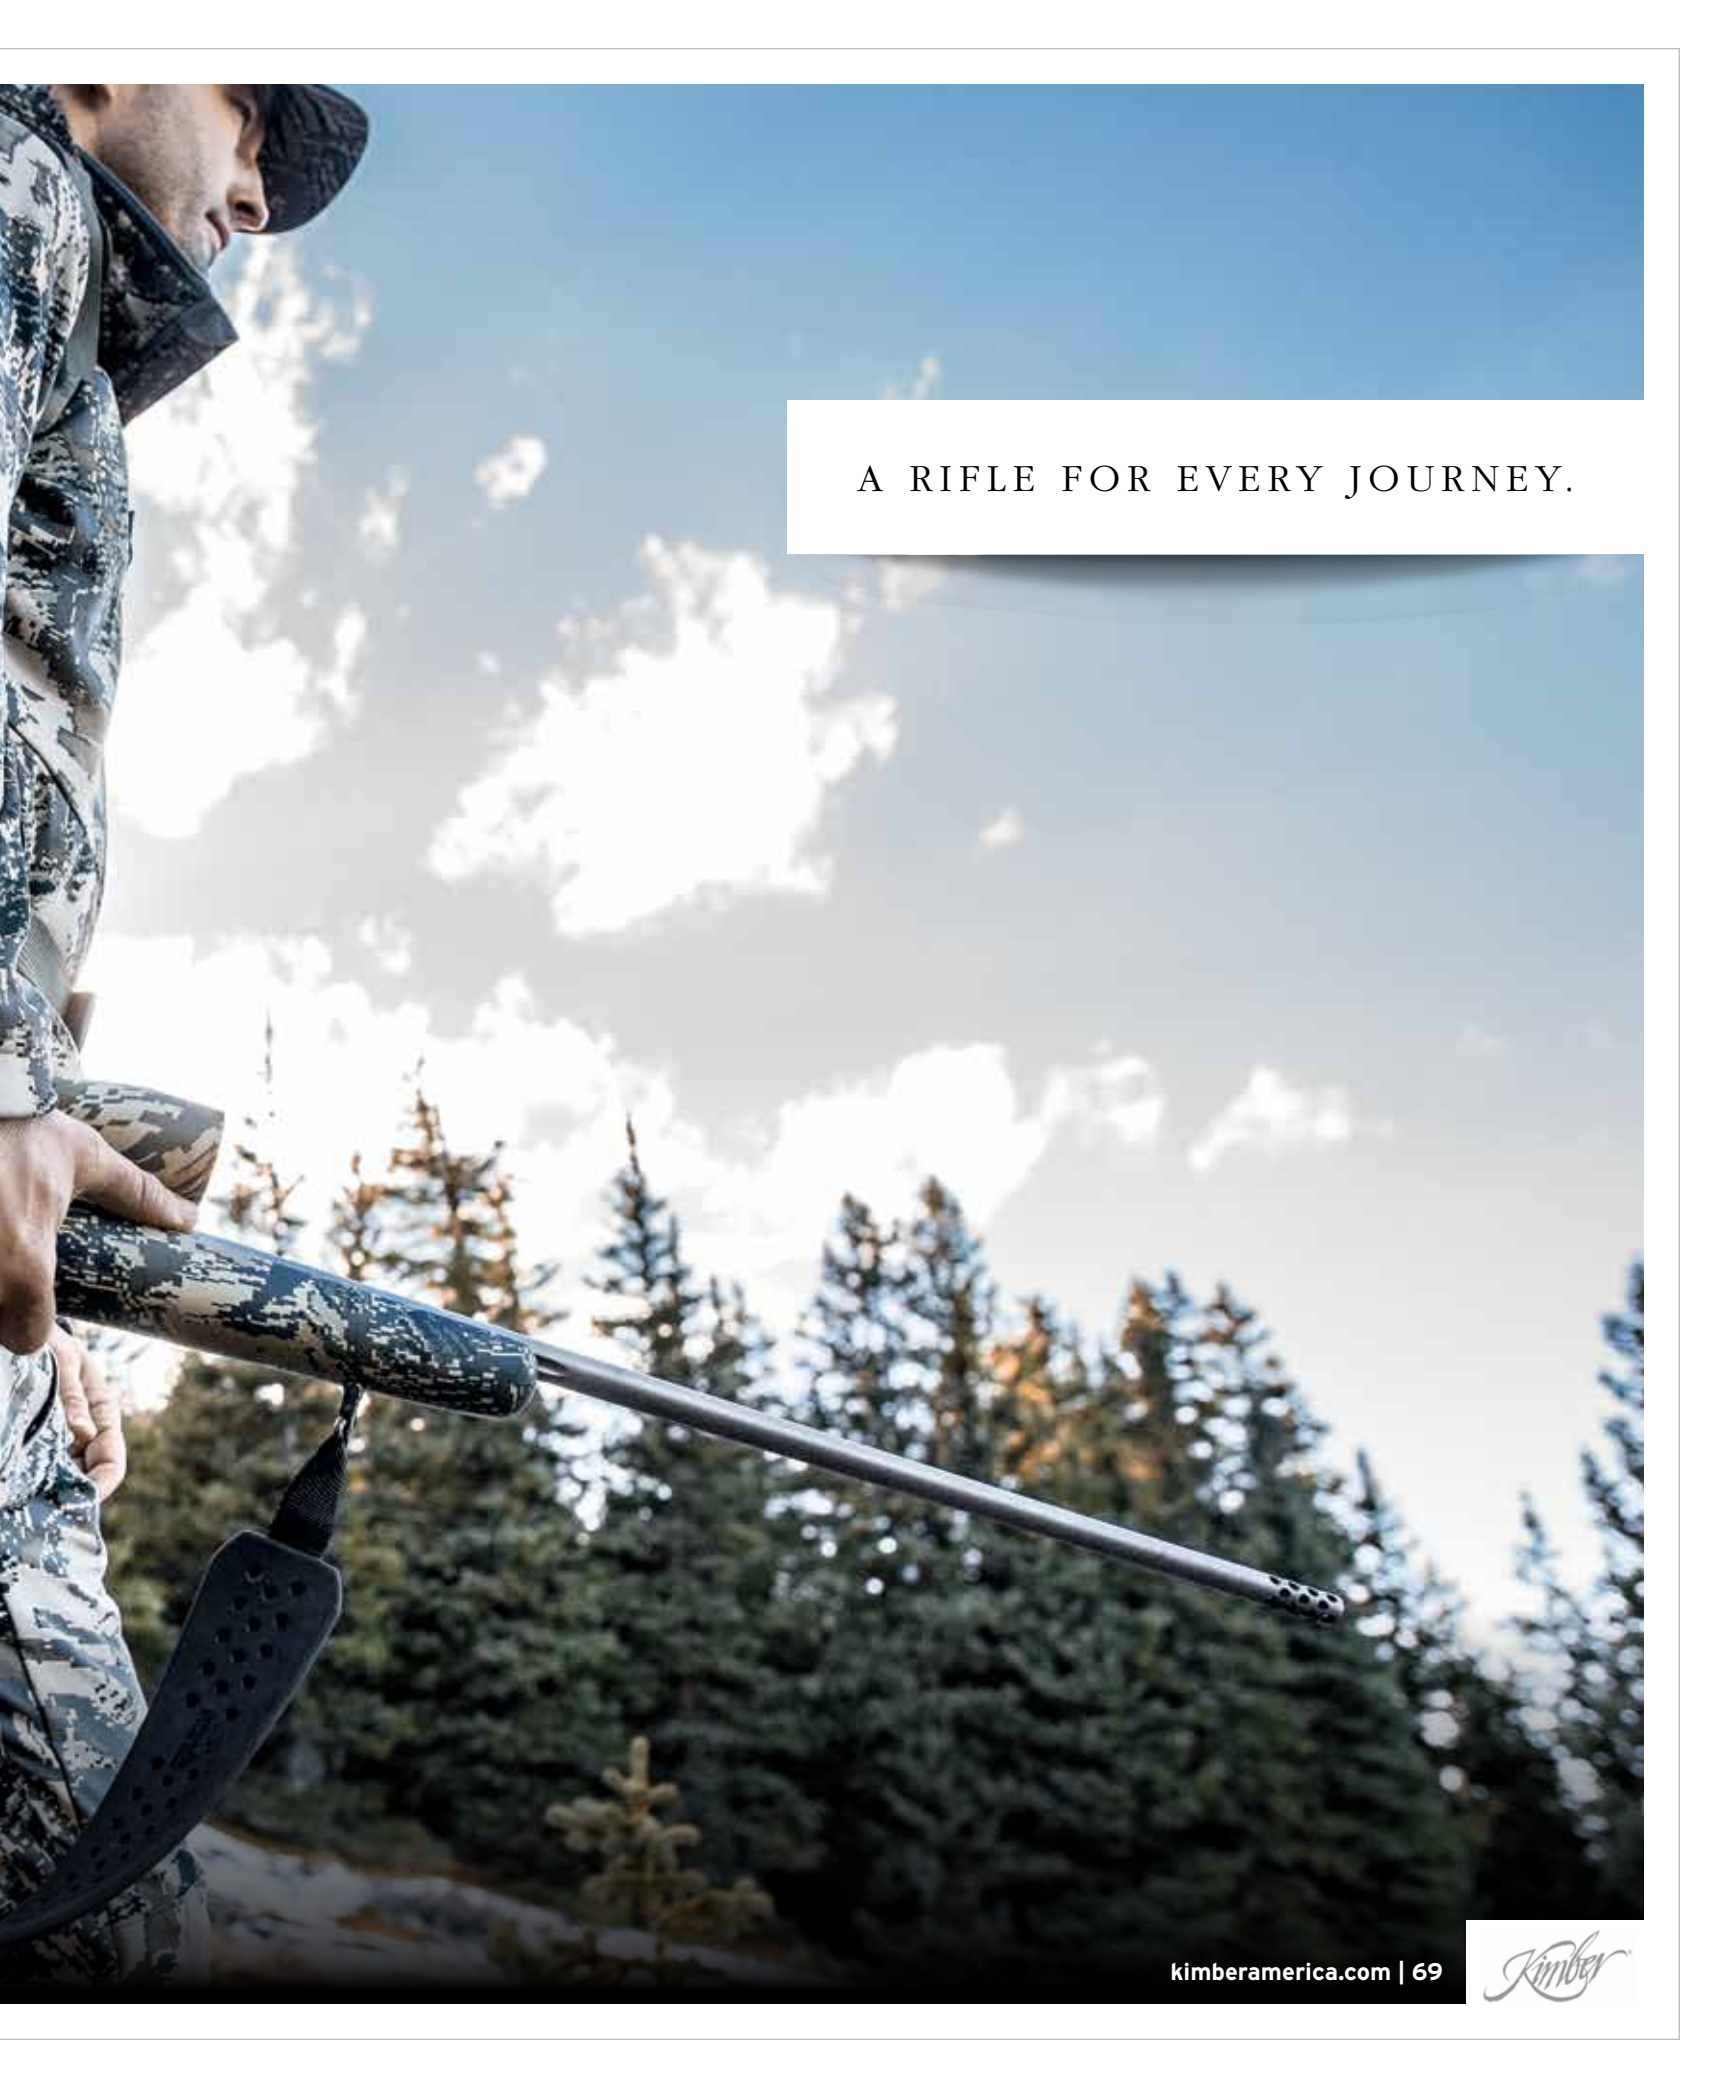

ADVANCED TACTICAL SRC II

KIMBER BUILDS NO-COMPROMISE tactical rifles to help meet the requirements of military or law enforcement professionals. In these arenas, the need for accuracy and dependability takes on a new meaning. Kimber tactical rifles have match grade barrels, chambers and triggers for the highest degree of accuracy. Each action features a full-length Mauser claw extractor for the superior dependability of controlled-round feeding plus an extended bolt handle with an oversized bolt knob for positive operation regardless of field conditions. The Model 84M LPT™ (Light Police Tactical) is a light urban tactical rifle offering the advantages of short-barreled portability. The Patrol Tactical™ is a tough, full-sized model with a reinforced carbon fiber stock configured for optimum stability from any position. Advanced

Tactical SOC II rifles received a complete update to their chassis. Now shipping with a McRees Precision custom stock for Kimber in two color options—FDE and Sniper Gray—they feature a left folding stock that allows for bolt manipulation while folded, a 4-point adjustable cheek weld for a versatile level of personalization, M-LOK® slots, tripod mount, and stock pack. The match grade dimensions of the Advanced Tactical™ SOC II and Advanced Tactical SRC II barrels are verified with an air gauge to ensure accuracy, and every rifle is built by hand, guaranteeing each to have fired a 3-shot group measuring .5 MOA prior to shipping. From a short, light configuration for fast deployment to heavier models with advanced features for long-range precision, Kimber tactical rifles are ready for anything.

A RIFLE FOR EVERY JOURNEY.

OPTICS

A PERFECT MATCH for the Kimber Mountain Ascent™ and Adirondack™ rifles, the Zeiss Conquest V6 (offered in Gore™ Optifade™ Open Country and Elevated patterns) offers premium German optical performance and field versatility in a

compact, lightweight yet rugged body. The newly enhanced optical design provides extremely bright images and contrast for precision shooting, even at high magnifications and in low light conditions.

PEPPERBLASTER II

STOP THREATS AT A DISTANCE

PEPPERBLASTER II

PEPPERBLASTER® II	
Dimensions (inches)	PBII L: 4.7, W: 1.0, H: 3.3
Weight (charged)	4.2 ounces (120 grams)
Effective range	2-13 feet
Operation	Double action with automatic switchover
Content	Liquid irritant, 2 charges per unit
Irritant agent	10% OC (oleoresin capsicum); 2.4% capsaicinoids
Charge volume	0.21 fluid ounces (6 ml/charge)
Charge velocity	112 MPH/164 FPS
Operating temperature	-4 °F (-20 °C) to 176 °F (+80 °C)
Drop safety	Drop tested to 5 feet (1.5 meters)
Water resistant	Yes
Shelf life	4 years

Caution: Strong irritant. Keep out of reach of children. May be unlawful to own or possess in some states or jurisdictions. Use for any purpose other than lawful self defense may be punishable by imprisonment, fines or both. PepperBlaster® protected by U.S. Pat. 6,951,070B2.

Technology, ergonomics and unmatched performance make PepperBlaster® II the most effective less-lethal protection

- A powerful solution of 10% Oleoresin Capsicum (OC) combines with benzyl alcohol to create the most effective inflammatory agent available. Effects are immediate and last up to 60 minutes.
- PepperBlaster® II uses patented Jet Protector Technology to propel two separate blasts of potent OC at 112 mph. This speed keeps each blast on target and reduces the risk of blowback or drift. Unlike sprays, PepperBlaster does not lose pressure over time.
- PepperBlaster II has an effective range of up to 13 feet, stopping threats at a distance. The unit does not have to be vertically indexed like sprays and can be fired from any angle or position.
- The non-aerosol pyrotechnic delivery system is not affected by cold or heat and blasts straight through wind and rain. This delivery system is capable of accurate placement and enough force to wrap around glasses or penetrate masks.

ACCESSORIES

MAGAZINES

Kimber® pistol magazines are available in an assortment of finishes, sizes and calibers. 1911 magazines fit Kimber pistols, plus almost any brand and model of MIL-SPEC 1911. The KimPro® Tac-Mag® is the finest 1911 .45 ACP magazine available today. Each has a quick-change system that permits immediate attachment of three included bases, along with large round count holes that read at a glance. Two sizes of Micro™ and Micro 9™ magazines are available. Standard and extended options available for both.

GRIPS

Kimber offers a full selection of premium grips and Crimson Trace Lasergrips® that fit almost any brand of 1911 pistol, regardless of caliber. Many feature hand-cut checkering and hand finishing. Crimson Trace Lasergrips® are also available for Micro™ and Micro 9™ pistols. Premium hex head grip screw sets are offered separately and add a finishing touch.

LOGO GEAR

Kimber offers a wide variety of logo apparel and gear, and the selection is always growing. Visit store.kimberamerica.com for a complete presentation.

KIMBER CUSTOM SHOP

The Kimber Custom Shop™ can quickly and professionally modify or personalize any Kimber pistol. Services include installation of night sights, custom finishes, part replacement, checkering, melts, custom parts and tuning.

HOLSTERS

An assortment of fine leather holsters and magazine carriers with the Kimber logo are available for Kimber 1911, Micro™ and Micro 9™ pistols. Kimber holsters also may fit other brands of MIL-SPEC 1911 pistols.

RIFLE ACCESSORIES

A selection of scopes, mounting systems for any application, along with extended bolt handles, leather logo slings, patterned slings to match your rifles, and other items are available to complete your rifle set up.

Kimber® pistols and rifles are shipped with a California-approved cable lock as a safety measure. Additionally, 1911 pistols are shipped in a lockable high-impact case, and both Micro and Solo® pistols are shipped in a lockable soft case. Use of the cable lock is encouraged at all times when a firearm is in storage. Kimber owners may request a free cable lock by mail. Please contact our customer service department at 888-243-4522.

Kimber firearms and less-lethal products should only be purchased and used in complete compliance with all laws; national, state and local. All suggestions for use in this catalog, or in any Kimber literature, must be taken within the context of these laws. Customers and dealers are required to comply with all applicable laws.

All Kimber centerfire 1911 and Solo pistols now include the Loaded Chamber Indicator Port® feature. When a round is in the chamber and light is available, the brass or silver color of the shell casing should be visible through the port in the barrel hood. This feature is another example of Kimber's commitment to firearm safety. However, one must never assume a firearm is unloaded until both the chamber and magazine are empty and the magazine is removed. Even then, all established rules of firearm safety must always be followed. Micro pistols do not have the Loaded Chamber Indicator Port® feature.

Firearm safety is every gun owner's responsibility. Use and store all firearms safely. Teach everyone in your home, especially children, proper firearm safety.

Kimber less-lethal products contain a strong irritant (inflammatory agent) derived from cayenne peppers. Avoid contact with skin and eyes. In case of contact, flush with water for at least 15 minutes. Seek immediate medical attention if symptoms persist or worsen. Always keep Kimber less-lethal products out of the reach of children. There is risk of injury to eyes if used at less than the minimum safe distances specified in the product instruction manual. Kimber less-lethal products may be unlawful to own or possess in some states and jurisdictions. Check with your state and local authorities. Use of Kimber less-lethal products for any purpose except lawful self-defense may be a crime. U.S. PAT. 6,951,070B2.

Certain products may not be available for sale in certain states.

*Barrel material for 1911 pistols available in California may be carbon steel rather than stainless steel where indicated.

FEATURE KEY

AL	Aluminum	FLP	Fixed low profile	P	Polished flats
AP	Amethyst purple PVD finish	FLP, CS	Fixed low profile, cocking shoulder	PA	Premium Aluminum
BA	Bel Air Blue				

REVOLVER, MICRO & MICRO 9 SPECIFICATIONS

FEATURE KEY

BR	Black rubber
BRS	Brushed stainless finish
DAO	Double action only
DLC	Diamond-like carbon finish
HP	High polish
LW	Laminated wood
MS	Crimson Trace Master Series™ Lasergrips®
SIL	Satin Silver
SS	Stainless steel

FOOTNOTES

- Weight can vary as much as 8 ounces due to natural walnut density.
- Barrel length indicated on Mountain Ascent rifles does not include muzzle brake.
- Advanced Tactical SRC II and Advanced Tactical SOC II rifles are shipped with one (1) 5-round detachable magazine. Additional 5- and 10-round magazines are available as an accessory.
- Adirondack and Montana models have a threaded barrel and ship with a thread protector cap, but do not include a muzzle brake (which is available as an accessory). Adirondack also has a hollowed bolt knob.

Camp Guard 10

ROCKY MOUNTAIN ELK FOUNDATION

THE ROCKY MOUNTAIN Elk Foundation (RMEF) is a non-profit land conservation organization, whose mission is to ensure the future of elk, other wildlife, their habitat and America's hunting heritage. Since 1984, the RMEF has helped to conserve more than 6.7 million acres of habitat. RMEF has also helped to restore long-absent elk populations across North America. To support this important conservation organization, Kimber worked with RMEF to design a purpose-built backcountry handgun that combines sought-after personal defense features with the stopping power required for the largest of predators. Kimber is a proud sponsor of RMEF conservation and land access projects.

Team Match

USA SHOOTING SPORTS

USA SHOOTING IS a non-profit corporation that was chartered by the United States Olympic Committee as the national governing body for the sport of shooting in April 1995. USA Shooting implements and manages development programs and sanctions events at the local, state, regional, and national levels, as well as oversees the development of U.S. National Teams that compete in international competitions. To support this important organization, Kimber worked with the USA Shooting Rapid Fire Pistol Team to develop a competition handgun for Olympic training purposes. Kimber is a proud sponsor of USA Shooting.

THE BOOT CAMPAIGN

BOOT CAMPAIGN

Hero Custom

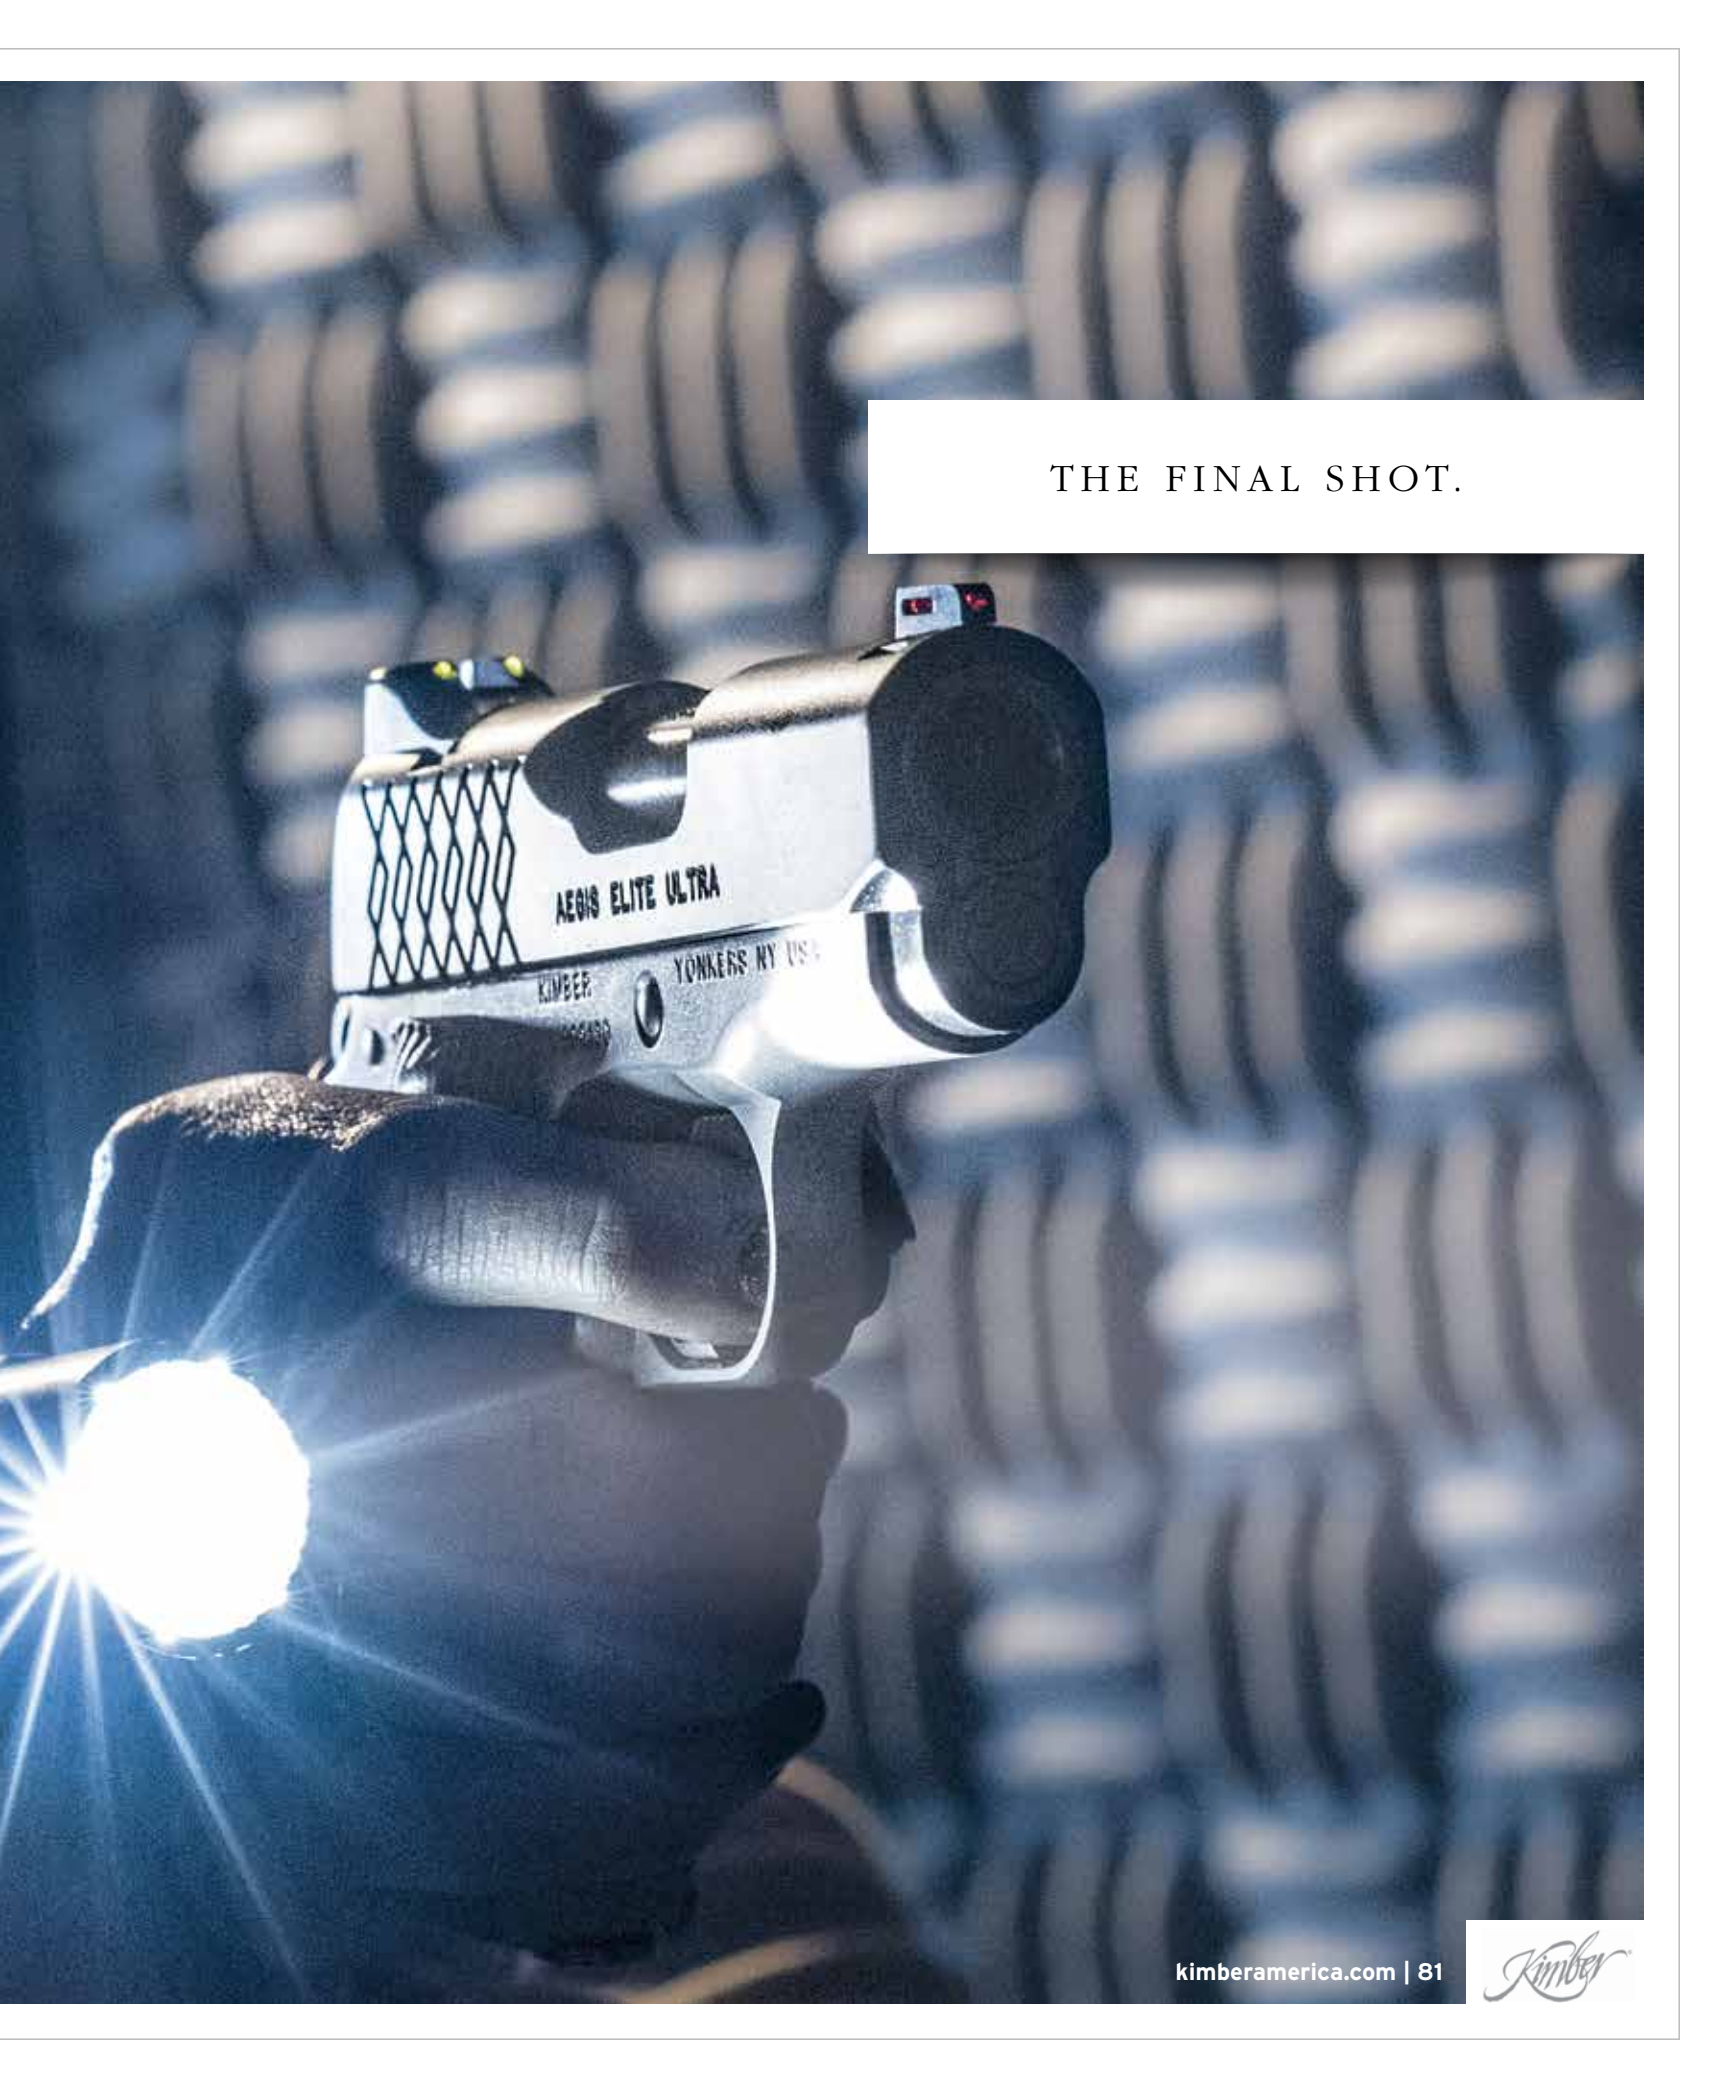

Hunter (Boot Campaign)

BOOT CAMPAIGN IS an American non-profit organization that works to provide life-improving programs and initiatives for veterans and military families to bridge the divide between military life and civilian life. Since its inception in 2009, Boot Campaign has raised more than \$19 million, giving more than \$2 million annually to help service members, veterans and their families. To support this important veteran-aligned organization, Kimber partnered with Boot Campaign and co-created both a handgun and a rifle designed to help spread program awareness. Kimber is a proud sponsor of Boot Campaign programs and initiatives.
