Ultralight

Ultralight Classic

Ultralight Gold

Fully featured 12 ga shotguns weighing in at less than a typical 20 ga. The Ultralight's receiver is machined from a single block of remarkably strong aircraft quality aluminum alloy, specially heat treated to deliver the strength and durability of steel, but with 65% of the weight.

Model	Gauge	Chamber (mm)	Barrel (cm)	Rib (type)	Chokes (type)	Accessories	Drop (mm/mm)	Cast	Pad
Ultralight Classic	12	70	62-67-71	6x6	MC, FX (****/**)	5 Chokes	35/55-38/60	RH-LH	Plastic
Ultralight Classic	12	70	62	-	Rifled/MC	5 Chokes	35/55-38/60	RH-LH	Rubber
Ultralight Gold	12	70	62-67-71	6x6	MC, FX (****/**)	5 Chokes	35/55-38/60	RH-LH	Rubber

691

The 691 is an elegant, smooth shooting boxlock shotgun. Beautifully finished, the stock is manufactured from specially selected 2.5 grade walnut, which has been further enriched by Beretta's enhanced oil finishing process. Additionally, the receiver features a unique, floral scroll engraving creating a really handsome gun.

693

693

The traditional Beretta over and under has been combined with the highest technology to create this well balanced, elegant shotgun. The stock is manufactured from specially selected high grade walnut and is oil finished. The action is a modernised development of the tried and tested 680 series. Additionally, the receiver is Nistan finished with exquisite, game scene engraving. Re-engineered Steelium barrels guarantee absolute precision while minimising weight and felt recoil, creating a jewel of a gun.

691 Vittoria

693 Vittoria

The Vittoria series is the first Beretta's shotgun range specifically designed for women. Based on the 690 platform, Vittoria shotguns feature a dedicated ergonomics, suited to those with a shorter stature, youth and ladies, to ensure a smooth, comfortable and precise handling. These guns are fitted with a shortened, semi-Montecarlo style stock, have a reduced pistol grip and additionally are completed by a 1 mm checkering, derived from the premium guns, beneficial for smaller hands.

695

Polished Optima Bore HP
Steelium barrels

The new 695 is a timeless end elegant field gun, and it is the top of the range in the 690 platform. The engraving on this model is a particularly fine, deep relief scroll made with the most advanced 5 axis premium laser engraving technology, giving the gun a sumptuous feel. With its premium grade three walnut and exquisite engraving on the action, this stunning boxlock shotgun is likely to be highly sought after.

687 EELL Diamond Pigeon

687 EELL Diamond Pigeon Game scene

687 EELL Diamond Pigeon Scroll

The exceptionally strong, low-profile receiver is elegantly adorned with exquisite game scene and intricate scroll engravings, made with the best in class premium laser engraving technology. The stock and fore-end are superior quality walnut embellished with hand cut checkering, demonstrating how improved performance and refined beauty can be perfectly matched.

THE 9 REASONS TO CHOOSE THE BERETTA SEMI AUTO TECHNOLOGY

1 PERFECT PATTERNS ON EVERY SHOT.

The ingredients of the stunning accuracy of the Beretta Steellium barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering process and the vacuum distension. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.

4 ALL-LOAD PROVEN RELIABILITY, FROM 24G. TO 64 GR.

Beretta gas-operating system B-Link is world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.

7 LOWEST MUZZLE JUMP.

The Beretta semiautomatic shotgun gives you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off devices to the unique ballistic features of the Steellium OptimaBore HP barrels. More control after each shot, better performance for each next one.

2 THE BEST RECOIL REDUCTION.

Kick-Off, Kick-Off³ and Kick-Off Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

5 COMFORT AND EASY TO ASSEMBLE.

The Microcore pad is softer than gel, lighter than rubber and perfectly slipping. It's available in several dimensions to customize your length of pull. The green magazine cap allows a quicker and better safety check on the shotguns magazine. The B-Lok cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.

8 ERGONOMICS AND EASY TO OPERATE.

The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitate an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.

3 UNBELIEVABLE RELOADING SPEED (+36%).

The Beretta gas-operated system is fast like an eye's blink. That's why it's called B-Link. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

6 CLEANER THAN EVER AND EASIER TO CLEAN.

With B-Link, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions the dirt is reduced to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

9 DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.

The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

A300 Outlander

A300 Outlander Camo Max5

A300 Outlander Synthetic

A300 Outlander

The A300 Outlander is the latest evolution of Beretta's 300-series gas-operated semiauto shotguns, which have sold by the millions to hunters and sportsmen around the world. And there's a reason for their popularity: unbeatable performance as well as great value out of the box.

A350 Xtrema Camo Max5

A350 Xtrema Synthetic

Designed for wildfowlers the A350 Xtrema features a 3½" chamber. The proven Beretta gas operating system with self-cleaning piston and cross tube magazine makes this gun super reliable with a wide range of ammo from standard 2¾" target or field loads up to the biggest 3.5" waterfowl magnums. The A350 Xtrema features a cold hammer forged barrel made from Steelium and uses the Optima HP choke system ensuring excellent patterning even with steel shot. Recoil is reduced with a super recoil absorbent, non-stick Micro Core recoil pad and by the built in Kick-Off. Spacers and drop / cast shims are provided.

The DT11 Black Pro stems from the collaboration with the Beretta Shooting Team champions to offer all shooters the maximum possibility of customizing the balancing and the fitting of the stock. The DT11 Black Pro keeps all the features which made the DT11 black an outstanding success since its introduction on the market, with the addition of two removable weights for the muzzle and the new fully adjustable stock for trap, skeet and sporting that Beretta has developed with TSK®. The Beretta by TSK® stock perfectly fits the anatomy of every shooter and helps him finding the best set up by adjusting the comb, the cast, the length of pull, and the pitch in an extremely simple, immediate and always reversible way.

A400 Xcel

A400 Xcel Sporting Black

A400 Xcel Multitarget

The purest shooting passion, powered by technological precision. The A400 Xcel is the most advanced competition semiautomatic shotgun by Beretta, featuring B-link, Kick-Off, MicroCore, Steelium, Optimabore HP, and a balance cap.

APX

APX

APX Tactical

Designed specifically for military and law enforcement operators, the APX has been put through extensive testing and evaluation at the professional end user level. The result is a pistol that delivers superior performance in durability and reliability, ergonomics, trigger, and modularity. Utilizing a removable, serialized chassis frame, the APX can be easily modified with replaceable grip frame housings and is simple to disassemble and maintain. Each APX comes with 3 interchangeable back straps so users can best fit their hands and preferences. The APX's aggressive full length slide serrations make slide manipulations easy under any conditions. To accommodate right or left-handed use, the APX's magazine release button can be easily reversed, and the slide stop is ambidextrous. The APX's trigger breaks at 6lbs and has a clear tactile and audible very short reset.

The APX truly is the ultimate striker fired pistol from Beretta. Now available in different colors and in the new RDO and Combat versions

APX RDO

APX Combat

Model	Gauge	Action	Additional Magazines	Magazine Capacity (rounds)	Weight Unloaded (g)	Total Length (mm)	Barrel Length (mm)	Width (mm)	Height (mm)	Safety Position	Grips

APX CENTURION

The APX Centurion pistol extends the proven APX Series to a mid-size duty or concealed carry size. It features a 15+1 (9mm) or 13+1 (.40 S&W) flush fit magazine. As with all APX pistols, the APX Centurion has been designed specifically for military and law enforcement users who have a need for a smaller pistol with similar handling characteristics to their duty pistols. The APX Centurion features a removable serialized chassis and can be easily modified with replaceable grip frame housings. Controllability and ergonomics are an APX focus: low bore axis, ambidextrous slide catch, reversible magazine release, aggressive slide serrations, and a really smooth trigger with a clear tactile and audible short reset.

Model	Gauge	Action	Additional Magazines	Magazine Capacity (rounds)	Weight Unloaded (g)	Total Length (mm)	Barrel Length (mm)	Width (mm)	Height (mm)	Safety Position	Grips

APX Centurion	.40	Striker	1	13	785	177	94	33	132	Trigger	Plastic

The APX Compact pistol extends the proven APX Series to a concealed carry friendly size. It features a 13+1 (9mm) or 10+1 (.40 S&W) flush fit magazine and can accept the Full/Centurion size APX magazines as well. As with all APX pistols, the Compact has been designed for those who have a need to carry concealed but want similar handling characteristics to their duty pistols. The APX Compact features a removable serialized chassis and it can be easily modified by switching to the Centurion 10 mm higher frame. Replaceable backstraps are also available to further customize your Compact. Controllability and ergonomics are an APX focus: low bore axis, ambidextrous slide catch, reversible magazine release, aggressive slide serrations, and a really smooth trigger with a clear tactile and audible short reset.

Px4 Storm Full size

Absolute durability, reliability, and ergonomics have made it the go-to choice for shooters around the world. Designed to meet the most stringent military standards of durability, the PX4 has been reported to fire well over 150,000 rounds with zero part breakage.

The lines of the pistol are snag-free and make unholstering and reholstering easy and fluid. The pistol may be adapted to different hand sizes and shooting styles thanks to a modular design with interchangeable backstraps. The ambidextrous and reversible controls offer the possibility of easily training or shooting with either hand.

Besides being one of the strongest actions available, the rotary barrel dissipates recoil away from the shooter's hand and greatly reduces muzzle jump, making it an extremely fast and accurate action.

Disassembly is designed to allow for quick field stripping.

M9A3

M9A3

With the M9A3 semiauto pistol series, Beretta has created a coming-together of all the tactical and functional features that today's combat professionals may require. From Vertec-style thin grip for instinctive pointability, to universal slide design convertible from safety-decocker to decocker-only, from a bevelled magazine well to oversize mag-release button, from a 3-slot built-in Picatinny rail to high-capacity capability for maximum firepower. These combat pistols were designed to be perfect for any tactical use, including home and personal defence, tactical competitions as well as duty carry in any condition.

1301 TACTICAL

1301 Tactical

The 1301 is Beretta's new gas operated semi-automatic shotgun engineered to be ultra-reliable and easy to use. Thanks to its compact size, it is ideal for negotiating tight spaces. It has all the features that a modern tactical shotgun should offer and it is easily adaptable to most users' needs, body type and shooting posture. Right out of the box, the 1301 Tactical features an oversized charging handle, large textured bolt release and an oversized reversible safety button. Although perfect out of the box, this tactical shotgun The integrated B-LINK gas operating system, featuring a cross tube gas piston, allows the 1301 Tactical to cycle 36% faster than any other shotgun on the market. This also makes it ideal for three-gun competitions.

BERETTA CHOKES CONSTRUCTION CHART

AVERAGE % OF PELLETS AND CHOKE CONSTRUCTION BASED ON DISTANCE

PERFECT BALLISTICS

With a production begun in 1526, now accounting for more than 500.000 barrels a year, Beretta is a world leader in technological research applied to ballistics. The Optimabore HP technology, combined with Steelium, provides excellent accuracy and pattern quality with both lead and Steel HP shots.

36% FASTER AND CLEANER

Blink is the engine of every A400 shotgun, providing exceptional reloading speed combined with power and cleanness at the top of the category. Being the fastest to fire the next shot means increasing the chance of hitting the target.

SOFTER & LIGHTER THAN RUBBER

Microcore is an innovative recoil pad developed by Beretta thanks to its experience in decades of competitions around the world. Thanks to the open cell technopolymer - softer, lighter and more slippery than rubber - Microcore expands gradually and instantly, increasing its surface area on the shoulder and giving the shotgun secure and precise support.

YOUR DIGITAL HUNTING DIARY, INTUITIVE AND EASY TO USE

Stop wondering how many rounds you shot last month or how many miles you walked with your dog: GunPod 2 will hold these statistics for you! The highlights of your hunting sessions, along with photos and videos, finally collected in a handy digital archive. And if you want to share on social networks? With GunPod 2 you can.

100% PROTECTION FROM CORROSION

In models equipped with AQUA technologies, all the internal parts are protected against rust and corrosion, while bolt, carrier and trigger are antireflective-treated. The barrel is internally chromed and externally coated to offer the best protection even in the worst conditions.

FAST LOCKING

B-Lok allows secure and fast forend's cap closing in fractions of a second and with just a 60 degrees rotation. The design of the cap makes the handling easy even with gloves on.

WORLD'S BEST RECOIL AND MUZZLE RAISE REDUCTION

Kick-Off is the only recoil reduction system in the world using technologies similar to the automotive ones, to provide up to 70% shock absorption. In its PLUS and MEGA versions, the Kick-Off system provides even more benefits, specifically tailored on the needs particular types of hunting.

Steelium Technology Evolution.

STEELIUM

CONICAL PART

STEELIUM - THE ULTIMATE BARRELL TECHNOLOGY.

The ingredients of the stunning accuracy of the Beretta Steelium Plus barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering forging process, the vacuum distension and the extended forcing cone, 5,5 times longer than in standard barrels. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.

This results in perfect patterns on every shot.

At the beginning of the Steelium era, all the barrels had a similar profile with the forcing cone length of 65 mm (on a 76 cm barrel).

Steelium Plus defined a new standard, lengthening the conical part to 360 mm (on a 76 cm barrel).

Steelium Pro barrel furtherly improved the inner profile of the forcing cone extending it to 480 mm (on a 76 cm barrel).

This important and progressive evolution provides smoother shot with reduced muzzle rise and consistent patterns with every type of shell.
