CARRY THE FUTURE.

TABLE OF CONTENTS

WE ARE TESTED.

131 years of experience making small arms. And counting.

You'll always find FN firearms on the frontlines of the free world. From special forces to MPs, from base security to infantry, from airborne to seaborne, FN provides the large majority of battle-proven small arms carried by the U.S. military, because they know there's nothing tougher, more reliable, or more accurate.

WE ARE ESSENTIAL.

Tactical firearms with a history of dependability.

Our tactical firearms are the stuff of legend. Every innovation is born in the battlefront, built

for the home front, and tested in life's most extreme environments. Our nation's protectors

trust FN firearms because they know ultimate dependability, masterful ingenuity, and legendary

performance are embedded in our DNA.

WE ARE CONFIDENT.

A nation protected. A right preserved.

Compact, reliable, and battlefield-ready, FN firearms are held to the highest standard

because we know who depends on them. When you're carrying an FN pistol, you

can be sure it has been crafted by the best, engineered to meet every demand, and

built to perform whenever called upon.

WE ARE RELENTLESS.

Built to handle the battlefront. Available on the home front.

FN firearms are as tough, accurate, and reliable in your hands as they are in the hands of our nation's

protectors. From compact pistols to shotguns to rifles, every FN firearm takes uncertainty out

of the equation, so you can depend on them every minute of every day. Preparedness is our mission.

Peace of mind is our objective.

WE ARE BRAVE.

Protecting those who protect you.

Nobody holds their firearms to a higher standard. Nobody has the heritage, knowledge,

or experience that we have earned with 131 years of protecting the battlefront and the

home front. Our lineage is pure, our performance is uncompromised, our dedication to innovation

and improvement is unceasing. You can be sure every pistol, shotgun, and tactical rifle has been

designed with nothing but perfection in mind.

WE ARE INNOVATORS.

We never cease in our pursuit of greatness.

As today's demands change – our mindset stays the same: being **the world's most battle-proven firearms.®**

Our engineers devote their lives to tactical technology and firearm innovation for those who devote

their lives to our liberty. Whenever a new challenge is faced, FN will build a solution. That is our promise.

WE ARE PROTECTORS.

Handguns built with a purpose: protecting our legacy.

The vision set forth by John M. Browning continues to inspire our pistol line. From the iconic FN Five-seveN,®

the FN 509® Tactical, and FN 509® striker-fired, polymer-framed pistols to the compact and powerful

FN 509® Compact, no other manufacturer can match our history, heritage, knowledge, and experience.

Depend on the battle-tested know-how of FN for peace of mind on the home front.

FN 503™   Your EDC Just Got Better With the All-New FN 503™.

AS9100C/EN9100:2009 certified. For U.S. sales only. For consumer, law enforcement, and military sales.

Primary Features

Striker-fired autoloader

Crisp, easy to shoot metal trigger

5 to 7 lbs. trigger pull

Slim 9mm with 8+1 rd capacity

Slide

Low-profile iron sights to prevent snags

Utilizes same dovetail as FN 509 series of pistols

Loaded chamber indicator

Rear cocking serrations for easy manipulation of slide

Barrel

Recessed target crown

Polished chamber and feed ramp

Frame

Slim frame for easy concealment

Advanced texture for secure and comfortable grip

Operating Controls

Oversized controls for easy operation

Magazine

Ships with 6RD and 8RD extended magazine

The FN 503™

The FN 503, inspired by FN's legendary heritage, is the company's first entry into the slim 9mm pistol market. The FN 503, roughly the size of your hand, conceals quickly and discreetly without compromising on features or performance. The excellent trigger and soft recoil of this slim 9mm pistol make the FN 503 comfortable and controllable to shoot. Arguably the best in its class, the all-metal trigger breaks crisply and consistently with an average of 5lb. trigger pull. The snag-free sights ensure a quick draw from any holster or bag. And, the enlarged controls make operation effortless when switching between the 6-round standard magazine and 8-round extended magazine.

FN 503™
Caliber: 9mm
Magazine: 6/8 Rd.

• Operation: Striker Fire
• Slide/Frame Finish: Black
• Sights: Fixed 3-Dot

Fully ambidextrous slide stop lever and magazine release

Magazine

High-visibility, low-friction follower; polymer base with black finish

1-17 rd. and 2-24 rd. magazines included

FN Revolutionizes the Optics-Ready Pistol

Optics technology is rapidly improving, but existing mounting systems had not yet experienced a leap in design that met the pace that the optics market was keeping. Enter the FN Low-Profile Mounting System,™ a result of FN's development for the MHS trials. This system was created with the desire to tackle the challenges of existing mount options and be a viable platform for future optic developments.

The FN 509® Tactical's slide and mount are specifically designed so that nearly all major optics brands available today will seamlessly mount and allow for co-witness with iron sights. The interchangeable plates, provided with the pistol, are equipped with an O-ring that provides positive tension to the plate and optic, ensuring the lowest, most secure mount possible. Finally, the fine-threaded screws lock tightly and remove any need for the thread locker.

The system was developed so that it could adapt to future optic releases or changes, and continue to provide customers the ability to swap optics based on their preference.

WE ARE UNWAVERING.

FN shotguns are engineered to win in the world's harshest environments.

Start with the FN SLP,™ a quick-cycling and super-reliable self-loader. Perfect for tactical use, it's a favorite

in the competitive world as well. The FN SLP™ can be customized in a myriad of ways, configured perfectly

for how you need it to perform.

FN SLP™ COMPETITION   Engineered to Win.

For U.S. sales only. For consumer and law enforcement sales.

Primary Features

Gas-operated autoloader

Flip-up rifle rear and red fiber-optic front sights

Receiver

Nickel-Teflon® coated bolt and bolt carrier

Blue hard-anodized aircraft-grade aluminum alloy receiver

Barrel

Back-bored; vent rib

Hard-chromed bore and 3″ chamber

Invector-Plus™ interchangeable choke tubes

Stock

Matte black synthetic

Checkered gripping panels on forearm and grip

Premium nonslip recoil pad

Two steel sling swivel studs

Operating Controls

Receiver-mounted bolt release

Crossbolt safety on rear of trigger guard

Magazine

Extended tube

Blue aluminum tube cover

Aluminum follower

FN SLP™ COMPETITION
Gauge: 12-gauge, 2¾″ & 3″ chamber
**Ammo Capacity: 8+1 with
2¾″ shells or 7+1 with 3″ shells**

• Operation: Gas-operated autoloader
• Bbl./Choke: 24″ Invector-Plus™
• Sights: Flip-up rifle rear; red fiber-optic front
• Overall Length: 45″

WE ARE UNDISPUTED.

Our military-contracted, fully automatic firearms adapt to every battlefield.

The FN belt-fed machine guns, select-fire rifles and carbines, and more, are the ultimate force multiplier: unrelenting, incredibly reliable, and battle-tested by the world's finest troops. Start with the legendary FN® M240 (also known as the FN MAG® or FN MAG®58), the medium machine gun choice of the U.S. military for more than 40 years, and the best friend an infantry squad will ever have. As our heritage has evolved, so too has our firepower. No matter the mission, no matter the environment, the modular and mission-adaptable FN® MK 16 and FN® MK 17 are the choice of individual warfighters worldwide. The FN® MK 16 (5.56x45mm) and the FN® MK 17 (7.62x51mm) are modular: designed to be instantly adaptable to local conditions and needs. These are the machine guns, rifles, and carbines whose reliability and toughness make them **the world's most battle-proven firearms**.®

FN® MK 16 Lightweight, Adaptable, Modular, and Accurate.
AS9100C/EN9100:2009 certified. Contract awarded by U.S. government. For military sales only.

Primary Features

Compact design; select fire

Short-stroke gas piston

Composite polymer trigger module

Receiver

Hard-anodized monolithic aluminum receiver

MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Barrel

Cold hammer-forged, chrome-lined, free-floating barrel

Barrels can be changed at the operator level in under 5 minutes with a point of impact shift of less than 1 MOA from previously established zero

Highly effective flash hider/QD suppressor interface

Stock

Telescopic design; composite polymer construction

Side-folding feature provides a compact package in aircraft and vehicle deployments; can still be fired from the folded position

Operating Controls

Ambidextrous selector lever and magazine release

Enlarged trigger guard for easier access when wearing gloves

Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

Magazine

Steel body; low-friction, anti-tilt follower

Compatible with M16/M4 magazines

FN® MK 13 EGLM/FN® FCU Mk3 Enhanced Fire Support.

AS9100C/EN9100:2009 certified. MK 13 EGLM. For military and law enforcement sales only.

FN® MK 13 EGLM

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) accepts all NATO standard 40mm low-velocity grenades. It may be quickly mounted underneath either the FN® MK 16 or FN® MK 17, or it may be configured as a stand-alone launcher with a telescoping buttstock. It is tested, operational, and currently deployed in harm's way with elite units of U.S. Armed Forces.

Single-shot; manual action

Composite polymer trigger module

Automatic ejector for rapid ejection of fired case

Optimized ergonomic trigger location when mounted using trigger adapters to either the FN® MK 16 or FN® MK 17

Dual locking clamp levers provide secure mounting to FN® MK 16 or FN® MK 17 rifles or to a stand-alone stock assembly

FN® MK 13 EGLM

• 40mm low-velocity
• Rotating locking breech system
• Double-action trigger capable of multiple strikes
• Leaf sight, mechanical quadrant sight, or Fire Control Unit (FN® FCU)
• Effective Range (low-velocity grenades): 100m point target; 300m area target
• Weight: 2.96 lb. for FN® MK 16 (empty); 3.0 lb. for FN® MK 17 (empty); 5.92 lb. stand-alone (empty)

LEARN MORE >>>

FN® FCU Mk3

Designed to enhance all 40mm LV and MV grenade launchers, the FN Fire Control Unit (FN® FCU) uses advanced electronics to simplify range finding and elevation corrections for the operator, even under severe combat conditions. The unit is an advanced sight design for use with any 40mm grenade launcher–stand-alone and under-barrel–and portable antitank weapon.

Flashing reticle indicator allows correction for left/right weapon cant

Remotely mounted pressure switch with ruggedized cord connection port

Housing shape allows use of rifle's optical and/or iron sights

Ballistic computer instantly calculates firing solutions and stores up to 50 different types; built-in clinometers sense initial up/down sighting angle; temperature sensor allows a correction in firing solution

FN® FCU Mk3

• Undetectable and eye-safe laser range finder effective: 1,000m effective range (1.5 x 1.5m target, 5km visibility, 28% target reflection)
• Only one battery (CR123)
• Quick release attachment compatible with MIL-STD-1913 rail
• IR laser pointer Class 1/3B
• IR laser safety feature with a dedicated switch or by using a high-visibility blue training cable

FN® MK 20 SSR Secure Long-Range Precision.

AS9100C/EN9100:2009 certified. Contract awarded by U.S. government. For military sales only.

Primary Features

Semi-automatic

Rotating, locking bolt

Composite polymer trigger module

Capable of suppressed fire

Receiver

Hard-anodized monolithic aluminum receiver

MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Barrel

Cold hammer-forged, chrome-lined barrel

Fully free-floating design

Can be removed/replaced by the operator

Flash hider optimized for suppressed fire

Stock

Non-folding and adjustable length of pull without tools

Aluminum and polymer construction

Operating Controls

Ambidextrous selector lever and magazine release

Charging handle may be mounted on right or left side

Adjustable gas regulator for use with or without suppressor

Magazine

Steel body; low-friction follower

Extended base pad

FN® MK 20 SSR
Caliber: 7.62x51mm

FN® M249 SAW/FN® M249 PARA   The Ultimate Force Multiplier.

AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

Primary Features

Open-bolt operation; belt-fed

Matte black non-reflective finish

Comes with an adjustable titanium bipod

Receiver

Formed steel frame with right-side ejection port

Holes for attaching on tripod and vehicle mounts

Top cover with integrated MIL-STD-1913 mounting rail for sighting systems

Barrel

Changeable

Cold hammer-forged steel

Hard chrome-plated bore and chamber

Stock

Highly ergonomic polymer buttstock assembly with hydraulic recoil buffer system and nonslip buttplate on FN® M249 SAW

Rotating, telescoping metal buttstock assembly with hydraulic recoil buffer system and nonslip buttplate on FN® M249 PARA

Kit consisting of polymer buttstock and 20.5″ barrel to convert FN® M249 PARA to FN® M249 SAW configuration is available

Operating Controls

Cross-bolt safety

Curved trigger for improved finger position and control in rapid fire

Non-reciprocating charging handle

Ambidextrous feed cover latches

Removable trigger guard for use with Arctic gloves

Feed System

Belt feed from left side

Interface under the receiver for box or pouch holding 100- or 200-round belt

Feeds M16-type magazine without any modification to the weapon

FN® M249 SAW

Caliber: 5.56x45mm

• Cyclic Rate of Fire: 850 RPM

FN® M240 SERIES   The Standard in Medium Machine Guns.

AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

Primary Features

Open-bolt operation

Belt-fed with quick change barrel

Receiver

Gas-operated

Solid steel frame on all models except FN® M240L (titanium)

Fires from the open-bolt position to reduce heat buildup and potential for chambered round cook-off

Multiple integrated MIL-STD-1913 mounting rails for optics, lights, and laser devices

Holes for attaching on tripod and vehicle mounts

Top cover with integrated MIL-STD-1913 mounting rail for sighting systems

Barrel

Cold hammer-forged steel; air-cooled design

Stock

Highly ergonomic polymer buttstock assembly with hydraulic recoil buffer system and nonslip buttplate (FN® M240B/FN® M240L)

Ability to mount on a bipod, tripod vehicle, or aircraft (FN® M240C/FN® M240D/FN® M240H)

Optional Egress Kit for converting pintle-mount models to ground fire support configuration (FN® M240C/FN® M240D/FN® M240H)

FULL FN® M240 SERIES SPECS: PAGE 130

Operating Controls

Cross-bolt safety

Offset charging handle for easy access and operation

Dual spade grips for enhanced control in burst and sustained fire (FN® M240D/FN® M240H)

Feed System

NATO standard belt-fed disintegrating link

FN® M240B
Caliber: 7.62x51mm

- Cyclic Rate of Fire: 550 to 650 RPM
- Gas Regulator: Single-port
- Barrel Length: 21.7"
- Overall Length: 48.5"
- Other Specs: Extended charging handle

FN® M240L
Caliber: 7.62x51mm

- Cyclic Rate of Fire: 550 to 650 RPM
- Gas Regulator: Single-port
- Barrel Length: 21.7"
- Overall Length: 48.5"
- Other Specs: Titanium receiver; composite trigger grip; titanium front sight; lightweight barrel (5.8 lb.)

FN® M240H
Caliber: 7.62x51mm

- Cyclic Rate of Fire: 550 to 650 RPM
- Gas Regulator: Single-port
- Barrel Length: 21.7"
- Overall Length: 41.6"
- Other Specs: Optional forward MIL-STD-1913 rails; offset charging handle; open-pronged flash hider

- Other Specs: Offset charging handle

FN® M2HB-QCB   Unbeatable Long-Range Firepower.

AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

Primary Features

Closed-bolt design; short-recoil barrel operation

Receiver

Projected service life in excess of 100,000 rounds

Barrel

Hammer-forged steel

18,000-round service life, high-temperature-resistant alloy barrel

10,000-round service life chrome barrel

Quick Change Barrel (QCB) feature allows the barrel to be quickly exchanged by one operator and eliminates the need to check and adjust headspace and timing at the user level

Compatible with any and all FN QCB barrels

Mount

Compatible with many armored vehicle and naval craft mounts

Adjustable M3 ground-mount tripod with traversing and elevation mechanism to provide accurate fire on pre-established targets

Operating Controls

Dual spade grips for enhanced control in burst and sustained fire

Right-hand cocking handle for easy operator access

Trigger safety system

Feed System

NATO standard .50-caliber belt-linked ammunition

Left- or right-hand belt feed design readily adapts to a variety of mounting positions and available space

Left- or right-hand-fired link ejection

Bottom-fired case ejection

FN® M2HB-QCB
Caliber: .50 (12.7x99mm)

- Cyclic Rate of Fire: 485 to 635 RPM
- Effective Range: 1,850m (area target)
- Maximum Range: 6,500m (grazing fire)
- Overall Length: 65.1"
- Weight: 84 lb. (empty)
- Other Specs: 26 to 42.77 lb. trigger sear maximum pull; 0.3" trigger travel to discharge

FN® M3M (GAU-21)   The Next Generation in .50-Caliber Machine Guns.

AS9100C/EN9100:2009 certified. Contract awarded by U.S. Navy. For military sales only.

Primary Features

Open-bolt operation

1,025 +/- 75 RPM cyclic rate of fire

The GAU-21 Machine Gun is a recoil-operated air cooled automatic weapon firing the .50 Caliber ammunition from the open bolt position

Operating elevation range +/- 70 degrees

Receiver

Solid steel frame for durability

Open-bolt firing system (no cook-off risk)

Barrel

Cold hammer-forged steel; 10,000-round life

Enhanced flash hider offers reduced firing signature to increase compatibility with current night vision equipment

Perforated barrel jacket for improved cooling and longer life

Mount

Provides optimal field of fire with aircraft's centerline for wider target coverage dedicated, mission tailored mounts for air, land & sea platforms

Provides -70 degrees maximum depression angle for wider target coverage

Feed System

NATO standard belt-fed disintegrating link for added reliability

Flexible ammunition feed chute system reduces misfeeds

Accepts ammunition boxes from 100 to 600 rounds for greater mission versatility

Left- or right-side ammunition feeding without extra components

FN® M3M (GAU-21)
**Caliber: .50
(12.7x99mm)**

• Operation: Short recoil
• Effective Range: 2,500m
• Maximum Range: 6,500m
• Barrel Length: 36"
• Overall Length: 64.8"
• Height: 7.6"
• Weight: 81.6 lb. (empty)

FN® M3P   The Next Generation in .50 Caliber Machine Guns.
AS9100C/EN9100:2009 certified. For U.S. military sales only.

Primary Features

1,025 +/- 75 RPM cyclic rate of fire

Short-recoil operated

Programmable burst limit via Armament Management System

Receiver

Solid steel frame for durability

Barrel

Cold hammer-forged steel; 10,000-round life

Enhanced flash hider offers reduced firing signature to increase compatibility with current night vision equipment

Perforated barrel jacket for improved cooling and longer life

Mount

Designed for aircraft use with FN pod systems, fixed-forward gun mounts, and in-wing applications

Dual buffer system for reduced recoil forces

Mounted on elastic cradle system for increased accuracy with reduced wear and vibration

Provides optimal field of fire with aircraft's centerline for wider target coverage

FN® M3P

Caliber: .50 (12.7x99mm)

- Effective Range: 2,500m
- Maximum Range: 6,500m
- Barrel Length: 36"
- Overall Length: 66.1" (short standard flash hider); 70.9" (long standard flash hider)
- Overall Height: 7"
- Weight: 80.5 lb. (empty, short standard flash hider); 82 lb. (empty, long standard flash hider)
- Other Info: Especially designed for airborne operations; solenoid firing; compatible with a wide range of "mission-tailored" ammunition; left- or right-side ammunition feeding without extra components

FN® MAG® 58M / FN® MINIMI® / FN® M240 PINTLE WEAPON SYSTEM.

MILITARY WEAPONS SYSTEMS

FN Makes the Mounts to Meet Your Mission. AS9100C/EN9100:2009 certified. For U.S. military sales only.

A machine gun is only as effective as its mounting system. FN builds a full spectrum of pintles for each of our machine guns that provide a secure mounting interface for rotary-wing aircraft, naval craft, and ground vehicles. FN® pintle systems are used by the U.S. military and allied forces worldwide, providing warfighters with the significant firepower advantage they need in every operational engagement.

Description

This weapon system provides multi weapon support capability and consists of:

A light Pintle Head (FN® LPH MAG-MINIMI) soft mount which can be fitted with one of the following weapons:

• 7.62mm FN MAG® 58M/Infantry (GPMG) machine guns

• 7.62mm FN MINIMI®/FN® MK 48 machine guns

• 5.56mm FN MINIMI®/FN® M249 machine gun

• 7.62mm FN® M240 versions D, H & L machine guns

Key Benefits

Fully mechanical (no electrical power required)

Ability to change weapon configurations within minutes

Rate of fire dependent on weapon fitted

Ammunition box / ammunition pouch support (7.62mm or 5.56mm)

Open bolt firing system (no cook-off risk)

NATO G3 Cone interface (0.50″ Interface optional)

MIL-STD-810 qualified with each weapon configuration

Optional items available:

Links and Cases collection (LCC) – 250 round or 500 round capacity

Adjustable elevation stops: -10° to -60° in 5° increments

Interface sleeve for U.S. 0.50″ receiver with adjustable azimuth stops in 10° increments

Multiple weapon configurations

Ammunition box support / Ammunition pouch support (Optional)

Soft mount
Specifically designed to absorb the recoil forces

Travel lock

NATO G3 Cone

MIL-STD 1913 Picatinny rail
For optical sights, laser, etc. (Customer choice)

250 round ammunition box

Links and cases collection
Accommodates all weapon configurations (Optional)

Quick change barrel

Interface sleeve, 0.50″
With adjustable azimuth stops (Optional)

Adjustable elevation stops
(Optional)

FN® PINTLE SYSTEMS   FN Makes the Mounts to Meet Your Mission.

AS9100C/EN9100:2009 certified. For U.S. military sales only.

FN® MBP
with FN® M2HB-QCB
mounted

FN® MVP
with FN® M3M (GAU-21)
mounted

FN® MBP (MEDIUM BOAT PINTLE)

For Sea Use Only.
Capacity: 100 Rd.

• Designed for use with the FN® M2HB-QCB machine gun

• FN® MPH (Medium Pintle Head) soft mount for land
  and sea platforms

• Telescopic column with adjustable azimuth firing stops

• Traverse Capability: 360 degrees

• Elevation/depression angles: +49 to -15 degrees

• Weight: 546 lb. with weapon; 100 rounds of ammunition;
  armor shield and shoulder brace

• Height adjustable column from 48.5" to 63.5"

LEARN MORE >>>

FN® MVP (MEDIUM VEHICLE PINTLE)
FOR FN® M3M (GAU-21)

For Land and Sea Use Only.
Capacity: 300 Rd.

• MIL-STD-810 qualified

• Only officially qualified land and sea mount for the FN® M3M

• Designed for use with FN® M3M (GAU-21) machine gun

• Traverse Capability: 360 degrees

• Elevation/depression angles: +60 to -20 degrees

• Telescopic column with adjustable firing stops in
  azimuth (cf FN® MBP)

• Front armor shield available

• Weight: 275.6 lb. with weapon and 300 rounds of
  ammunition (column not included)

LEARN MORE >>>

FN® MDP TURNING
with FN® M3M (GAU-21) mounted

FN® MDP (MEDIUM DOOR PINTLE) TURNING
For Airborne Use Only.
Capacity: 300-Rd. Quick Release Ammunition Box
with Flexible Feed Chute

- Designed for use with FN® M3M (GAU-21) machine gun
- Two flexible chutes for ammunition feed and link collection
- Traverse Capability: 180 degrees, adjustable per mission configuration
- Depression Angle: 0 to -60 degrees, depending on carrier integration
- Elastic weapon cradle assembly with dual trigger
- Fired case deflector (cf FN® MRP)
- Weight: 517 lb. with weapon and 300 rounds of ammunition

FN® POD SYSTEMS   For Helicopters and Subsonic Fixed-Wing Aircraft.

MILITARY WEAPONS SYSTEMS

AS9100C/EN9100:2009 certified. For U.S. military sales only.

Primary Features

Accepts one FN® M3P machine gun

1,025 ± 75 RPM cyclic rate of fire per gun/pod

FN® PC 17 Pod Control Panel features ARM/SAFE functions, remote recocking, programmable burst limit and rounds count

Capable of emergency jettison from the aircraft

Firing solenoid as well as safety and cocking device

A. Safety and Cocking Device

This system incorporates safety mechanisms in the recocking device so that there are no chambered rounds until the system is armed to fire. The machine gun can be remotely recocked in flight.

B. Ammunition Box

The FN® HMP250 / FN® RMP (250-round capacity) or FN® HMP400 (400-round capacity) ammunition box is reversible and allows feeding from the left or right side without extra components. Its design guarantees smooth movement of the ammunition belt with no risk of jamming or fouling due to aircraft maneuvers or acceleration.

C. Boresighting Device

An elevation and azimuth adjustment device enables the gun to match the carrier aircraft's optical sighting line.

D. Soft Mount

The recoil forces that occur when the weapon is fired can be a source of structural fatigue on the carrier aircraft and can also reduce the precision of the gun. In FN® pod systems, the machine gun is fitted on a soft mount that absorbs the recoil forces.

E. Spent Link and Fired Case Collector

All of the cases and links are collected in the removable Link and Case Collector (LCC).
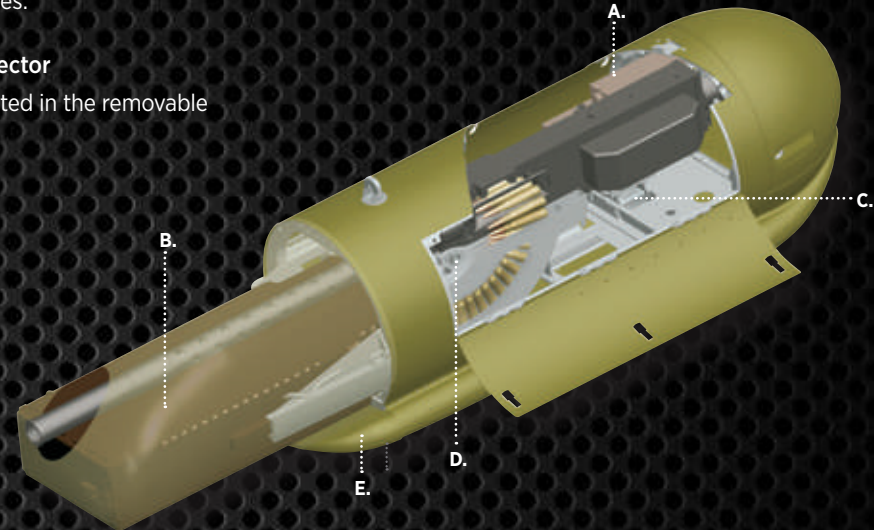

FN® PC 17 POD CONTROL PANEL

FN® BT14-2 ARMAMENT MANAGEMENT SYSTEM

FN® HMP250 POD

Capability: .75 Mach
Capacity: 250 Rd.

- Weight: 194 lb. (empty); 257 lb. (loaded)
- Height: 16.1" exterior pod
- Length: 71.3" exterior pod
- Other Info: Fired link and case collector on the FN® HMP250 LCC

FN® D-PC DIGITAL POD CONTROLLER The AMS for Digital Pods or Rocket Launchers.

AS9100C/EN9100:2009 certified. For U.S. military sales only.

Primary Features

MIL-STD-1760 standard compliant, operates 2 stations (gun and/or rockets)

Easy to operate

Automatic pod type identification (including FN® D-INT)

Allows selection of weapons and corresponding mode

Misfiring detection

Master armament switch included

NVG compatibility

High reliability

ITAR-free

Rocket zone selection

FN® D-HUD DIGITAL HEAD-UP DISPLAY

The Sighting Solution for Fixed-Forward Weapon Systems on Rotary-Wing Aircraft. AS9100C/EN9100:2009 certified. For U.S. military sales only.

The FN® D-HUD is a modern and cost-effective targeting solution.

It offers the latest advances in optics technology and ballistic computation solution.

Easy Integration

Capable of integrating into platform avionics with multiple electronic interfaces

Electronic integration with Stores Management Systems (SMS)

Open to further evolution

Integration with Laser Range Finder (LRF)

Compatible with most legacy targeting systems fixation patterns

Ergonomics

Smallest size available in HUD sighting systems

Allows pilot operation with Night Vision Goggles (NVG)

Foldable position

High-End Technology

High-end optical technology for targeting accuracy

Display with software driven digital image source

No moving or motorized parts in the design

High reliability and availability

Durable boresight retention

Enhanced Accuracy and Situational Awareness

Dual axis ballistic compensation capability

Ballistic compensation for multiple range of ammunition and rockets

Technical Data

Weight	
FN® HUD Projector	3.3 kg (7.28 lb)
FN® HUD Computer	5.5 kg (12.13 lb)
FN® HUD Control Panel	0.6 kg (1.3 lb)

deFNder® Medium/Sea deFNder® REMOTE WEAPONS STATIONS   Maximized Force – Minimized Risk.
AS9100C/EN9100:2009 certified. For U.S. military sales only.

Primary Features

Accepts all current FN® M249, FN® MK 48, FN® M240B, FN® M3R, and FN® M2HB-QCB machine guns; and future 40mm AGL integration

Sensors

Based on customer requirements

Color CCD camera for normal light conditions

Fully modular sensor system allows for easy integration of multiple day/night camera and targeting systems

Laser range finder/ballistic computer combination reduces distance-related aiming error

Mount

Lightweight for easy installation on vehicles and ground-mounted applications

Low silhouette reduces target size and minimizes visual intrusion in sensitive areas

Soft recoil mount increases hit probability, reducing collateral damage

Control

Operator display console for target identification/engagement

Single control handle for sight selection, aiming, and firing

Built-in test (BIT) system for diagnostics/failure detection

Available Options

Thermal/Infrared cooled or uncooled camera for low-light/low-visibility conditions

Laser range finder (LRF) and ballistic computer

STANAG 4569 Level I or Level II ballistic protection

Stabilized for firing on the move

Interface with slew-to-cue sensors such as Laser Warning Receiver (LWR) and Small Arms Detection and Localization System (SADLS)

Target tracking system

Backup firing mode

Up-capacity ammunition boxes of 500 rounds (.50 caliber linked) and 1,000 rounds (7.62x51mm linked)

Fired case and link collection

Weapon protective cover

Image stabilization

Smoke grenade launchers

Auto-detection

Sea deFNder®

- General Specs: Accepts all current FN® M249 SAW, FN® MK 48 MOD I, FN® M240, FN® M2HB-QCB, and FN® M3R machine guns, and future 40mm AGL integration; modular design offers a wide range of custom options; 18 to 32 Volts Direct Current (VDC) power meeting MIL-STD-1275; qualification standards MIL-STD-810, MIL-STD-461, and MIL-STD-464
- Traverse Speed: 90 degrees per second
- Elevation Speed: 60 degrees per second
- Overall Height: Less than 27," basic configuration
- Overall Weight: Less than 437 lb. including M2 and 300 rounds (.50 caliber)
- Other Info: Nx360 degree traverse; vertical movement range of +70 degrees elevation through -40 degrees depression depending on weapon type; can fire at any elevation angle with an FN® M3R; basic configuration ammunition box capacity 300 rounds

deFNder® MEDIUM WITH FN® M3R

deFNder® MEDIUM

AND CONTROL HANDLE (ONE-HAND OR GAME PAD)**

FN® EXPERT Leading Edge.

For military, law enforcement, and consumer sales.

FN® EXPERT

FN® Expert provides the latest technology based on years of experience with military users and enables the execution of comprehensive rifle marksmanship training. It helps instructors train marksmanship safely and efficiently while also allowing shooters to become skilled within a short period of time.

FN® Expert System transfers the burden of marksmanship fault identification from the human instructor to the training system. It facilitates the correction of faults and enables marksmanship training everywhere and at any time.

Software Strengths

The result of a shot consists of three key factors: holding, aiming, and triggering. FN® Expert software shows the rifle movement during the aiming and triggering, the score, and the three key factors immediately after the shot in a simple, graphical, and numerical way. The feedback shows the shooters their weak points and helps them correct erroneous habits. This helps shooters at all skill levels quickly improve their shooting skills. The same safe training can be used to enhance the skills of highly experienced shooters.

Wireless communication (non-tethered)

Easier and improved target/range scenarios

Calculations and rendering on optical device

Improved user interface

FN® EXPERT

- Supports shooter grouping and zero
- Develops and sustains muscle memory
- Develops coaching skills in NCO/SNCO Corps
- Supports STX Lane Training
- Uses assigned firearm (not a toy/simulation)
- Supports firearm with all optics and accessories
- Portable, small-form factor
- Can be used with dry-fire, CO_2, and live-fire

LEARN MORE >>>

FN® SmartCore/FN® SAM Tech Forward.

AS9100C/EN9100:2009 certified. For military sales only.

In addition to conventional firearms, FN has developed FN® e-novation – highly added-value solutions that integrate modern and cutting-edge technology, such as optoelectronics, into small arms. These solutions improve combat capabilities and communications during missions, while also ensuring enhanced logistics and maintenance management.

FN® SmartCore

An electronic system that measures and records the number of shots (blank and live firing being discriminated) and effective and cyclic rates of fire (FN® M249 only)

Fully automated system with full transparency to the infantrymen

Fully integrated system, with no impact on the balance of the weapon

LEARN MORE >>>

Measures and records the number of shots, and takes into account rates of fire and firing cycles

Distinguishes between blank firing and live firing

Discriminates between shots and other shocks

Maintenance-free

Short-range, wireless communication that is undetectable and on request only, so there is no unintentional emission

FN® SmartCore for FN® M249 includes battery

FN® SmartCore for FN SCAR® Family is self-powered

FN® SmartCore FOR FN SCAR® FAMILY

FN® SAM

The FN Small Arms Management software (FN® SAM) takes into account data recorded and transmitted by the FN® SmartCore to analyze and save data about weapons such as maintenance actions and use. It is fully automated software that reports any replacements or checks required on the major components of the weapon, and provides precise information at any time about a weapon, automatically or on request, in real time or with delay, including base location, whom it is issued to, and its operational condition. The FN® SAM solution is compatible with FN and non-FN weapons.

Using both FN® SmartCore and FN® SAM together allows for reduced operational costs through improved service life of the weapon, enhanced weapon maintenance and logistics management at armorer's level, and optimized weapons fleet management

FN® SAM SOFTWARE

FN® FCU Mk3 Enhanced Firepower.
AS9100C/EN9100:2009 certified. For military sales only.

FN® FCU Mk3

Designed to enhance all 40mm LV and MV grenade launchers, the FN Fire Control Unit (FN® FCU) uses advanced electronics to simplify range finding and elevation corrections for the operator, even under severe combat conditions. The unit is an advanced sight design for use with any 40mm grenade launcher–stand-alone and under-barrel–and portable antitank weapon.

Flashing reticle indicator allows correction for left/right weapon cant

Remotely mounted pressure switch with ruggedized cord connection port

Housing shape allows use of rifle's optical and/or iron sights

Ballistic computer instantly calculates firing solutions and stores up to 50 different types; built-in clinometers sense initial up/down sighting angle; temperature sensor allows a correction in firing solution

FN has over 15 years of experience in the design and manufacture of Fire Control Units

Mk3 has been improved through changes based on electronic modules of the latest generation that combine better performance with reduced size and feedback from user experience with the earlier models

Mk3 includes significant modifications to all its modules: laser range finder, ballistic computer, and electronic sight

FN® FCU Mk3

• Undetectable and eye-safe laser range finder effective: 1,000m effective range (1.5 x 1.5m target, 5km visibility, 28% target reflection)
• Only one battery (CR123)
• Quick release attachment compatible with MIL-STD-1913 rail
• IR laser pointer Class 1/3B
• IR laser safety feature with a dedicated switch or by using a high-visibility blue training cable

WE ARE UNDEFEATED.

No matter what is demanded of our tactical firearms, FN will always deliver.

When the moment demands it, FN's suite of tactical firearms provides what every professional requires. Designed for the close-in, to-the-perimeter defense, the FN SCAR® offers the perfect variants that can be customized to the challenge. Want overwhelming close-quarters firepower? Reach for the radically advanced FN P90.® It's compact, spits out the innovative FN 5.7x28mm round, and exists to win every encounter. Consider too the 40mm Low-Velocity FN40GL.® Employ it stand-alone, or integrate it with the FN SCAR® systems. Add the 5.56x45mm FN 15® Series to your armory. The new family of FN 15® carbines, specifically developed with law enforcement officers' needs in mind, offer compact builds and shorter barrel lengths that enable faster target engagement and maneuverability in close-quarters scenarios. Choose FN, because there are no compromises to be made in a tactical theater.

FN 15® UPPER ASSEMBLIES Engineered for Critical Missions.

AS9100C/EN9100:2009 certified. For consumer and law enforcement sales.

FN P90® SERIES   Next Generation in Firepower.

AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

Primary Features

Closed-bolt blowback operation

Compact bullpup design

Select fire

Receiver

Bottom ejection port with dust cover

Barrel

Cold hammer-forged, chrome-lined barrel

Integrated flash suppressor with interface for sound suppressor

Matte black phosphate finish

Stock

Matte black synthetic thumbhole design with forward handstop

Front-mounted laser targeting module on LV, TR LV, and USG IR models

Molded-in rear sling attachment point

Operating Controls

Ambidextrous cocking knobs and magazine release latches

Sliding trigger

Ambidextrous safety/selector switch inside trigger guard

Magazine

Top-mounted detachable

Translucent polymer body

Unique and innovative design allows for compact system when loaded

FN P90® TACTICAL
Caliber: 5.7x28mm
Magazine: 30/50 Rd.

FN SCAR®-SC   Built for Ultimate Mobility and Flexibility.

For law enforcement and military sales only.

Primary Features

Subcompact model derived from the FN SCAR® rifle designed for the U.S. special forces, specifically adapted for security missions

Rotating, locking bolt

Selective fire, 550 to 650 rounds per minute (RPM) cyclic rate of fire

Non-reciprocating charging handle

Composite polymer trigger module

Receiver

Hard-anodized monolithic aluminum

MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Barrel

7.5-inch cold hammer-forged, chrome-lined, free-floating barrel with compensator

FN SCAR-SC flash hider

Stock

Telescopic buttstock

Polymer pistol grip

Operating Controls

Ambidextrous safety lever and magazine release

Charging handle may be mounted on right or left side

Enlarged trigger guard for easier access when wearing gloves

Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

Magazine

Steel magazine body

Low-friction follower

FN SCAR®-SC

Caliber: 5.56x45mm NATO

• Operation: Short-stroke gas piston
• Mag Capacity: 30 Rd.
• Weight: 6.9 lb.
• Barrel Length: 7.5"

FULL FN SCAR®-SC SPECS: PAGE 131

FN SCAR® 16/FN SCAR® 17 Modular, Accurate, and Adaptable.
AS9100C/EN9100:2009 certified. For law enforcement sales only.

LAW ENFORCEMENT

Primary Features

Rotating, locking bolt; select fire

Composite polymer trigger module

Short-stroke gas piston

Receiver

Hard-anodized monolithic aluminum receiver

MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Adjustable folding front and folding/ removable rear backup iron sights

Barrel

Cold hammer-forged, chrome-lined, free-floating barrel

Standard or Close Quarters Combat (CQC) options

Stock

Adjustable for six-position length of pull

Adjustable for two-position cheekpiece height

Side-folding for aircraft and vehicle deployments; can still be fired from the folded position

Operating Controls

Ambidextrous selector lever and magazine release

Charging handle may be mounted on right or left side

M203-type unlocking catch

Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

Magazine

Steel body; low-friction follower

Extended base pad for improved ergonomics (FN SCAR® 17)

FULL FN SCAR® 16/FN SCAR® 17 SPECS: PAGE 131 – RIFLE ACCESSORIES 119–122

FN SCAR® 16 STANDARD
Caliber: 5.56x45mm
Magazine: 30 Rd.

- Cyclic Rate of Fire: 625 RPM
- Effective Range: 600m point target
- Barrel Length: 14.0"
- Overall Length: 35.0" (extended); 32.5" (collapsed); 25.0" (folded)
- Black or Flat Dark Earth

FN40GL® Powerful and Ready for Any Mission.

AS9100C/EN9100:2009 certified. For law enforcement sales only.

Primary Features

Single-shot; manual action

Rotating, locking breech system

Composite polymer trigger module

Receiver

Automatic ejector for rapid ejection of fired case

Molded stippling for enhanced grip

Barrel

Barrel swivels both right and left for ease of loading from any firing position and allows use of extended-length ammunition

Stock

MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Telescoping design of stand-alone stock adapts to fit a variety of operator body sizes, body armor, and load-bearing equipment

Operating Controls

Fully ambidextrous

Crossbolt safety for fast and easy operator access

Enlarged trigger guard for easier access when wearing gloves

Double-action trigger offers multiple-strike capability to eliminate requirement to open and recock action; allows firing of ammunition with less sensitive or aged primers

Mounting

Optimized ergonomic trigger location when mounted using trigger adapters to either the FN SCAR® 16 or FN SCAR® 17

Dual locking clamp levers provide secure mounting to FN SCAR® 16 or FN SCAR® 17 rifles or to a stand-alone stock assembly

Adds no length when mounted on FN SCAR® 16 or FN SCAR® 17

FN40GL®
Caliber: 40mm
Low-Velocity

- Effective Range: 100m point target (low-velocity grenades); 300m area target (low-velocity grenades); 625m area target future capability (medium-velocity grenades)
- Barrel Length: 9.6″
- Trigger: Double-action trigger capable of multiple strikes
- Sights: Leaf sight, mechanical quadrant sight, or fire control unit (FN® FCU™)
- Overall Length: 26.5″ (extended); 20.5″ (collapsed)
- Stock Color: Black or Flat Dark Earth

FN 5.7x28mm AMMUNITION

The New Benchmark in Ammo Performance

ISO 9001 Quality

Fully compatible with a wide variety of FN firearms, including the FN Five-seveN® pistols, FN PS90® carbines and FN P90® submachine guns, the 5.7x28mm cartridge has been specially tailored to excel in several specialized roles. The SS195 LF and SS198 LF rounds use an innovative, lightweight, brass-jacketed, aluminum core hollow point bullet. The SS197SR, distributed in the U.S. by Federal Cartridge Company, is ideally suited for sports and training applications.

FN also offers 5.7x28mm restricted ammunition (duty, tracer, subsonic) for law enforcement and military sales only. The SS190 duty round has been designed to minimize the risk of over-penetration. The L191 tracer and SB193 subsonic rounds, as well as blank rounds for training and simulations are also available from FN. All restricted ammunition is only released and shipped from a U.S. Customs-Controlled Bonded Warehouse (CBW) upon BATFE and U.S. Customs approval.

LEARN MORE >>>

CROSS-SECTION OF THE UNRESTRICTED LEAD-FREE 5.7x28mm CARTRIDGES

The hollow point jackets contain a lead-free metal core. The primer compound is also lead-free, making either round ideal for any location where lead contamination is to be avoided.

SS195LF

Prod #: 10700012

Type: 27 gr. Lead-Free Hollow Point

Intended Purpose: Consumer/Target/Sporting

Case Qty: 2,000
