

BE RELENTLESS

We're 700 American craftsmen making innovative, battle-proven optics for the world's most relentless hunters and shooters. We design, build, and test our products with a single-minded focus: to make sure they'll perform forever.

No matter where you take us, on the battlefield, in competition, or on the hunt, we won't let you down. So be bold. Be tenacious. Be relentless.

WE GUARANTEE A LIFETIME OF PERFORMANCE

A warranty that replaces broken optics doesn't do you any good when you're eight miles deep into the backcountry. That's why Leupold products are guaranteed to perform in the harshest conditions, shot after shot, year after year.

Leupold's Lifetime Guarantee

If your Leupold riflescope, binocular, or spotting scope doesn't perform, we will repair or replace it for free - whether you're the original owner or not. You don't need proof of ownership or a warranty card, and there's no time limit. We do this because we believe in superior quality and craftsmanship, and we're confident your Leupold won't let you down.

Leupold Electronics Limited Two-Year Warranty

Leupold electronic products, which include rangefinders, thermal products, and other electronic devices, are warrantied against defects in materials and workmanship for two-years from the date of purchase. If the product is found to be defective, Leupold & Stevens Inc. will repair or replace it free of charge, within that two-year period. Proof of purchase may be required to verify warranty.

Leupold Military and Tactical Products

Certain customer contracts for Military and Law Enforcement entities may specify a product warranty that supersedes the above consumer warranty.

International customers may be affected by embargoes and other trade restrictions. Please contact us if you are an international warranty customer prior to sending your scope to us for repair.

For questions or service

Please call 1-800-LEUPOLD or (503) 526-1400.

Warranty Exclusions

These warranties do not apply if the product has been modified, misused or has been damaged by accident, abuse, or misapplication. To ensure this doesn't happen to you, contact Leupold Product Service before having any work or repairs done to your Leupold optics. Call 1-800-LEUPOLD or (503) 526-1400.

Warranty Products which are unclaimed after a period of one year may be subject to forfeiture.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

RELENTLESS INNOVATION

Always innovating. Relentless performance requires that we're constantly pushing ourselves and our products to their limits. Finding out what works, what doesn't, and what you need to be successful in the field. Leupold was born from the idea that we can do it better than anyone else, which still holds true today. Our elite team of almost 100 engineers share one goal – build products that are guaranteed to perform for life.

Twilight Max HD

Representing the pinnacle of our in-house lens design, the Twilight Max HD Light Management System is built to deliver unbelievable image quality in the harshest lighting conditions.

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Twilight Max

With true dawn-to-dusk performance, the Twilight Max Light Management System is designed to perform in a wide variety of lighting conditions without fail.

- Intensifies ambient light in low-light environments
- Great glare management and drastically reduces image wash-out caused by stray light
- Premium edge-to-edge lens clarity

Twilight

Proving that you don't have to compromise even when you're on a budget, our Twilight Light Management System delivers unbeatable, class-leading low-light performance.

- Amplifies ambient light in low-light environments
- Good glare management and minimizes image wash-out caused by stray light
- Premium lens clarity

Guard-ion Hydrophobic Lens Coating

Acts as a guardian for your lenses, keeping them clean and clear with our proprietary coating that sheds water, dirt, oils, and more.

Scratch Resistant Lenses

Provides added lens durability that far exceeds industry standards.

Motion Sensor Technology

Always be ready to go with motion activated reticle illumination. It extends battery life by shutting off illuminated reticles after five minutes of inactivity and instantly turns on when moved.

True Ballistic Range (TBR)

Only Leupold RX® rangefinders with True Ballistic Range® take into account the angle of your shot and your rifle's ballistics to put you dead on. Other rangefinders can't give you an accurate range to your target because they use basic trigonometry to calculate a straight-line horizontal distance (the so-called "rifleman's rule").

True Ballistic Range/Wind (TBR/W)

True Ballistic Range/Wind technology in Leupold RX rangefinders accounts for wind out to distances of up to 800 yards. It generates a hold point for a 10-mph wind at a 90° angle to your direction of aim.

Trophy Scale

Take the guess work out of accurately measuring the width or height of an animal's antlers with our proprietary software found in select RX Rangefinder models.

Custom Dial System (CDS)

CDS simplifies longer shots by eliminating the need for holdovers or ballistic calculations, using a custom dial that's specific to your rifle and ammo.

COMPLETE SHOOTING SYSTEM

From locating animals at any distance all the way to recovering downed game, we've got you covered.

1

SPOT
Bino

A wide range of magnification options and performance features help you tackle any environment on any budget.

2

IDENTIFY
Spotter

Rugged, high-magnification optics ensure you know exactly what you're going after in any terrain.

3

RANGE
Rangefinder

Lightning quick ranging engines combined with advanced ballistic calculations deliver the industry's most accurate distances.

4

DIAL
CDS

Our game-changing Custom Dial System eliminates the need for holdovers, making longer-range shots easier than ever.

5

SHOOT
Scope

Our rugged and reliable riflescopes are waterproof, fogproof, and guaranteed to perform for life.

6

RECOVER
Thermal

Highly-sensitive and easy-to-use thermal devices make finding downed game easier than ever.

LEUPOLD'S TWILIGHT LIGHT MANAGEMENT SYSTEMS

DELIVERING INDUSTRY-LEADING BRIGHTNESS AND CLARITY

Each Twilight Light Management system builds on the previous one to ensure every Leupold product has the clearest, brightest image in its class.

While our standard Twilight Light Management system outperforms most optics on the market, we upped our game with Twilight Max HD. Boasting an elite optical design and 3x more lens coatings, it creates some of the brightest optics, no matter the lighting conditions.

WHICH LIGHT MANAGEMENT SYSTEM IS RIGHT FOR YOU?

 LEUPOLD	Twilight	Twilight Max	Twilight Max HD
	Bright	Brighter	Brightest
Light Transmission	Amplifies ambient light in low-light environments	Intensifies ambient light in low-light environments	Maximizes ambient light in extreme low-light environments
Glare Management	Good glare management and minimizes image wash-out caused by stray light	Great glare management and drastically reduces image wash-out caused by stray light	Excellent glare management and virtually eliminates image wash-out caused by stray light
Contrast & Resolution	Premium lens clarity	Premium edge-to-edge lens clarity	Premium High Definition edge-to-edge lens clarity

CUSTOM DIAL SYSTEM (CDS)

By providing the specific ballistics to your rifle and ammunition, Leupold can create a custom dial for simplified long-range shooting.

RANGE IT

If the object is
600 yards away

DIAL IT

Turn the dial
to 6

AIM DEAD ON

No more worrying
about hold-overs

BALLISTIC INFO REQUIRED

Caliber	Average temperature (dial is accurate +/- 20 degrees)
Bullet type	
Bullet weight	Sight height (center of scope to center of barrel)
Muzzle velocity	
Average elevation (dial is accurate +/- 2000 ft)	Zero distance (usually 100 or 200 yards)
Serial number of scope	Ballistic coefficient

If you don't know where to find your specific ballistic information, visit customshop.leupold.com/faqs, or call 1-800-LEUPOLD.

ORDER YOUR DIAL TODAY

Order online at www.leupold.com/freecd.

All CDS-equipped scopes qualify for one FREE DIAL; additional dials are \$80.00 each.

THE LEUPOLD PUNISHER PROCESS

Our rigorous testing process goes above and beyond to make sure every scope holds up to a lifetime of abuse.

WATERPROOFING AND FOGPROOFING

From torrential downpours to crossing rivers, you'll never have to worry about a Leupold scope leaking or fogging up. Our proprietary waterproofing process includes submersion testing to a depth of 33-feet and a multitude of pressure changes.

IMPACT TESTED AND VERIFIED

We purpose built a machine to replicate the most extreme impact signature imaginable. The actual rifle doesn't exist, but if it did, and you shot it, you would instantly regret it. You would be knocked unconscious, suffer a concussion, burst blood vessels in your eyes, and detach your retinas. Every scope we make, from a \$200 VX-Freedom, to our \$4500 Mark 8 has to survive 5000 impacts at this energy, all while retaining its functionality and holding a perfect zero.

EXTREME CLIMATE EXPOSURE

We make sure our optics perform at the highest level in the harshest conditions by ensuring they will work from -40 degrees Fahrenheit all the way up to 160 degrees Fahrenheit.

HUNTING DIAL GUIDE

Why doesn't every riflescope use the same dials? Because you need the right tool for the job.

CDS Dials

Low-profile, click adjustments. Can be laser engraved with your custom load info and range markings. No cover to lose. Your first CDS dial is engraved for free, when you purchase any CDS-ready riflescope.

Finger Click Adjustment Dials

Low-profile, covered dials. Fast, precise sight-in without coins or tools.

CDS-ZeroLock Dials

Low-profile, one revolution, CDS-ready dials. The ZeroLock (ZL) ensures your dial only moves when you want it to. Push the button to unlock it and dial, then simply rotate it back to zero to lock it back in place. Can be laser engraved with your custom load information.

Coin Click Dials

Easily adjusted with a coin, turret cap, or tool. Low-profile, covered dials. Fast, precise sight-in. Reset ring and index mark makes returning to zero simple.

CDS-ZeroLock-2 Dials

Low-profile, two revolution, CDS-ready dials. The ZL2 release button protrudes on the first revolution and is flush on the second. Can be laser engraved with your load info and range markings.

Micro-Friction Adjustments

Marked in easy-to-read increments. Low-profile, covered dials. Set it and forget it.

CDS-TZL3 Dials

Large, three revolution dial designed for precision adjustments. CDS-TZL3 dial features a re-settable zero lock and an easy-to-read rotation indicator so you know how far you've dialed.

Pop Up Rezero Dial

Easily align the zero on the dial to the index mark on the housing by popping up, spinning, and snapping down the dial.

Elevation Adjustment Type	Click Increment	Adjustment Per Revolution	Lock Type	Dial Travel Limit	Re-zero Type	Revolution Indicator	Custom Ballistic Lasering Compatible
Finger Click	1/4 MOA, 0.1 Mil*	15 MOA, 60 cm	None	Total scope travel	Index ring	No	No
CDS	1/4 MOA, 0.1 Mil*	15 MOA, 60 cm	None	Total scope travel or 14 MOA with custom ballistic dial with zero-stop	Dial slip	No	Yes
CDS-ZL	1/4 MOA	15 MOA	Push button	14 MOA	Dial slip	No	Yes
CDS-ZL2	1/4 MOA, 0.1 Mil*	20 MOA, 80 cm	Push button	38 MOA	Dial slip	Yes	Yes
CDS Target (VX-6 7-42x56)	1/8 MOA	20 MOA	None	Total scope travel	Dial slip	Yes	Yes
CDS Target (VX-3i)	1/4 MOA	15 MOA	None	Total scope travel	Dial slip	Yes	Yes
CDS-TZL3	1/4 MOA	20 MOA	Push button	58 MOA	Dial slip	Yes	Yes

VX-6HD

All-around domination. The VX-6 HD takes 70+ years of riflescope design and delivers performance that re-defines what a premium riflescope is. Its wide magnification range is ready for any terrain on any continent. It's built for the hunter who needs every feature at their disposal and refuses to compromise.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Eliminates accidental dial movement with the push-button ZeroLock system

Simplifies mounting and improves long-range accuracy with electronic leveling system

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Creates a visible aiming point in low-light conditions with illuminated reticles

Extends battery life with Motion Sensor Technology (MST)

Brings the reticle into focus quickly with Fast-focus eyepiece

Allows for quick magnification changes with reversible throwlever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

VX-FREEDOM

The new VX-Freedom delivers the legendary Leupold performance and dependability hunters and shooters have demanded for decades, combined with a host of new and improved features. The VX-Freedom will get the job done every time and carries the same lifetime guarantee as all Leupold riflescopes.

KEY BENEFITS

See more in less light with Twilight Light Management System

- Amplifies ambient light in low-light environments
- Good glare management and minimizes image wash-out caused by stray light
- Premium lens clarity

Eliminates holdovers on longer shots with the optional Custom Dial System

Quickly change magnifications using the easy-to-grip power selector

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Creates a visible aiming point in any light condition with FireDot illumination

Increases adjustment for longer shots with a 30mm maintube

Extends battery life with Motion Sensor Technology (MST)

Waterproof, fogproof, and guaranteed to perform for life

RIFLEMAN

The Rifleman® is designed to surpass all of your expectations when it comes to repeatable accuracy. This razor-sharp optic is designed, machined, and assembled in our Oregon factory and tested to be absolutely rugged. It's 100% waterproof, fogproof, and, of course, guaranteed for a lifetime of performance.

KEY BENEFITS

See more in less light with Twilight Light Management System

- Amplifies ambient light in low-light environments
- Good glare management and minimizes image wash-out caused by stray light
- Premium lens clarity

Improves the sight-in process using friction adjustments

Maintains reticle focus with lockable eyepiece

Superior ruggedness is verified through Leupold's Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

FX

There's no secret to the enduring popularity of Leupold's fixed power riflescopes. Their simplicity, rugged performance, and supreme accuracy speak volumes. We put nearly a century of optical know-how into each one, ensuring they excel in brightness, contrast, and resolution. And of course, they're 100% waterproof, fogproof, and guaranteed for a lifetime of performance.

KEY BENEFITS

See more in less light with Twilight Light Management System

HANDGUN

With Leupold Handgun scopes, you not only eliminate the need to focus on the front sight, you totally eliminate the inaccuracy of a handgun's short sight radius. All that's left is you, the crosshairs, and the game. These scopes can take a beating, too. They're tested to the same harsh standards as all other Leupold scopes.

KEY BENEFITS

See more in less light with Twilight Light Management System

- Amplifies ambient light in low-light environments
- Good glare management and minimizes image wash-out caused by stray light
- Premium lens clarity

Simplifies mounting and improves target acquisition with Extended Eye Relief (EER)

Maintains reticle focus with lockable eyepiece

Superior ruggedness is verified through Leupold's Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

AMERICAN MARKSMAN

OFFERED EXCLUSIVELY THROUGH BASS PRO SHOPS/CABELA'S

The American Marksman 3-9x40mm combines great features and unbeatable durability at an affordable price. Our Twilight Light Management System lets you see more in less light and really lets you take advantage of the first and last 10 minutes of the day when animals are the most active. Precise adjustments and the LR Wind-Plex reticle ensure that whether you're dialing or using the reticle hold-overs, you'll have the right tool for the job. The American Marksman is 100% fogproof, waterproof, Punisher tested and verified, and is backed by Leupold's Full Lifetime Guarantee.

KEY BENEFITS

See more in less light with Twilight Light Management System

- Amplifies ambient light in low-light environments
- Good glare management and minimizes image wash-out caused by stray light
- Premium lens clarity

Delivers elevation and windage holdovers for quick shot adjustments with LR Wind-Plex reticle

Improves the sight-in process with precise 1/4 MOA finger-click adjustments

Maintains reticle focus with lockable eyepiece

Superior ruggedness is verified through Leupold's Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

ADJUSTMENT DIAL GUIDE

Why doesn't every riflescope use the same dials? Because you need the right tool for the job.

VX-3i LRP

Easy-to-grip, large external target dial that provides accurate and repeatable adjustments. Features a re-settable zero stop and a rotation indicator so you know how far you've dialed. Available in 1/4 MOA and 0.1 MIL.

M5C2 ZeroLock Dials

Low-profile, two revolution dials that lock in the zero position to prevent inadvertent adjustments. Features aggressive knurling for a sure grip and fast, precise zeroing.

M6C1 ZeroLock® Dials

Low-profile, ZeroLock® adjustments with tactile and audible .2 Mil per click and 11 milliradians of elevation travel in a single revolution.

M5C3 ZeroLock Dials

Low-profile, .1 Mil per click dials provide 30-Mils of adjustment in 3 revolutions. Visual and tactile revolution indicators ensure you don't get lost in the travel. The ZeroLock feature prevents inadvertent adjustments and ensures accurate return to zero.

M5B2/M5B1 Dials

Two revolution (one revolution on the M5B1 dial) Pinch and Turn dials autolock in every position to prevent inadvertent adjustments. Ensures accurate return to zero. Features aggressive knurling for a sure grip, and a visible, tactile revolution indicator.

VX-Freedom AR Dial

External, low-profile 0.1 MIL dial with pre-calibrated .223 ballistics. Provides yardage marks out to 650 yards for easy mid-range engagements.

MARK 8

These are the riflescopes at the tip of the spear, first focal plane reticles, maximum resolution and field of view, 8:1 zoom range, and the image brightness and contrast necessary to triumph in the worst conditions. The Mark 8[®] 3.5-25x56 M5B2 Illuminated gives you seven brightness settings and auto-locking pinch and turn dials. The Mark 8 3.5-25x56 M5C2 offers the same magnification, with ZeroLock adjustments and a non-illuminated first focal plane reticle. The Mark 8 1.1-8x24 CQBSS[®] (Close Quarter Battle Sniper Scope) gives you precision at long-range and speed at arm's length. With each, you have best-of-the-best optical quality in a near indestructible package.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Offers more adjustment travel with 34mm and 35mm maintubes

Delivers accurate holdovers throughout the magnification range with first focal plane reticles

Provides precise and repeatable clicks using the M5C2, M5B1, and M5B2 adjustments

Engage targets at any distance with a large 8x magnification range

Extends battery life with Motion Sensor Technology (MST)

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

MARK 6

The Leupold Mark 6® is extremely accurate, compact, lightweight, and easy to use; that's what makes it a game-changer for military forces around the globe and elite law enforcement units here at home. It's not just easy to manipulate, it's tough, too. Push it to the limit and a Mark 6 is still drop-dead accurate.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Provides up 37 Mils of adjustment travel with a 34mm maintube

Delivers accurate holdovers throughout the magnification range with first focal plane reticles

Engage targets at any distance with a large 6x magnification range

Offers easy access, water-tight battery compartment

Extends battery life with Motion Sensor Technology (MST)

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

MARK 5HD

Pick up a Mark 5HD™ and you'll feel the difference: it's up to 20 ounces lighter than other scopes in its class. Get behind one and you'll see the difference, from the superior edge-to-edge clarity and extreme low-light performance to the versatility of the Combat Competition Hunter reticle. With three revolutions of elevation adjustment, the Mark 5HD was built to max out the performance of the latest long range rifles and ammunition. Ergonomically designed with more tactile, audible click adjustments, larger numbers, and a high-speed throw lever so you can put accurate fire downrange faster.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Provides accurate holdovers throughout the magnification range with first focal plane reticles

Engage targets at any distance with a large 5x magnification range

Extends long-range shooting with a lightweight 35mm maintube

Delivers 120 MOA or 34.9 MILs of travel using a precise and repeatable 3-turn ZeroLock dial

Improves magnification changes with an integrated throw lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

VX-3i LRP

The name says it all – Long Range Precision (LRP). This scope is purpose built with match-grade accuracy and repeatability. Choose between first or second focal planes, MOA or MIL adjustments, and several magnification options. With easy-to-read adjustment dials and integrated quick-turn throw lever, the VX-3i LRP will help you push your limits. Top that off with Leupold's Twilight Max Light Management System, and you'll be hitting steel from dawn to dusk.

KEY BENEFITS

See more in less light with Twilight Max Light Management System

- Intensifies ambient light in low-light environments
- Great glare management and drastically reduces image wash-out caused by stray light
- Premium edge-to-edge lens clarity

Provides worry-free and repeatable elevation adjustments with a zero-stop and revolution indicator

Offers MIL and MOA models for every shooting preference

First and second focal plane models are available

Creates more adjustment travel for longer shots with a 30mm maintube

Quickly change the magnification using the integrated throw-lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

D-EVO

If we told you that you can see your 1x red dot image and a 6x magnified image at the same time, you might think we were crazy. But crazy ideas often lead to ground-breaking technologies. Mount the Leupold Dual-Enhanced View Optic (D-EVO™) in front of virtually any compact red dot sight and instantly maximize the range of your AR style rifle. The D-EVO's unique design lets you move between your 1x red dot sight and the 6x magnification D-EVO by simply shifting your eye—not your head. Now you can quickly move between close-quarter shots and mid-range shots with deadly speed and accuracy. Whether your target materializes at 20 yards or 600 yards, you'll be ready to engage. It's not magic, it's the future of carbine optics.

KEY BENEFITS

See more in less light with Twilight Max Light Management System

- Intensifies ambient light in low-light environments
- Great glare management and drastically reduces image wash-out caused by stray light
- Premium edge-to-edge lens clarity

Maximizes the rifle's effective distance with 6x magnification

Minimizes the amount of rail space needed with a compact design

Pairs perfectly with a large number of red dot sights thanks to low-profile design

Provides holdovers while compensating for lateral offset with exclusive CMR-W reticle

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

COMPETITION SERIES

VX-4.5HD SERVICE RIFLE 1-4.5x24

See better. Shoot better. Score better. The VX-4.5HD Service Rifle scope gives you the edge you need to win more matches. It delivers bright, edge-to-edge image sharpness at 4.5x magnification - the highest magnification allowed for NRA Service Rifle competitions. On its low power, the true 1x magnification's flat, true-to-life image makes off hand shooting quick and easy. Combine that with our new Bull-Ring reticles, developed in partnership with many of the top Service Rifle competitors, and you'll be able to quickly center on the target every time.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Increases adjustment travel for longer shots with a 30mm maintube

Leverages the NRA Service Rifle Competition specific magnification range

Finds targets easily with an incredibly wide field-of-view

Extends battery life with Motion Sensor Technology (MST)

Aligns targets easier with the Bull-ring Post and FireDot Bull-ring reticles

Eliminates holdovers on mid-range shots with the Two-Turn ZeroLock (CDS-ZL2) adjustment

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

COMPETITION SERIES

FX-4.5HD SERVICE RIFLE 4.5x24

Service Rifle Competitions have gained a ton of popularity over the last few years. Along with the growth of the sport the level of gear has increased as well. Performance is paramount when tenths of an inch can mean the difference between 1st and 10th place. That's where Leupold's new Service Rifle FX-4.5HD scope comes in. The fixed 4.5x magnification ensures you'll always be at the right magnification, and the CDS-ZL2 elevation dial makes quick adjustments simple and precise. Leupold's new HPR-1 reticle makes finding and bracketing targets simple, and its fine center aiming-point gives you the ability to put rounds where your competition can't. The FX-4.5HD was made to get you on the podium.

KEY BENEFITS

COMPETITION SERIES

45x45

When it all comes down to the slightest details, the Leupold Competition 45x45mm scope is the right tool for the job. Its high-powered magnification, precise tracking, and crystal-clear image gives you the advantage you need to leave the rest of the competition behind.

KEY BENEFITS

See more in less light with Twilight Max Light Management System

- Intensifies ambient light in low-light environments
- Great glare management and drastically reduces image wash-out caused by stray light
- Premium edge-to-edge lens clarity

Increases adjustment travel for longer shots with a 30mm maintube

Improves positive target and impact identification with a high-powered 45x magnification

Simplifies use with the fixed-power optical design

Improves repeatability with precise, positive long-range specific adjustments

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

LCO

When tunnel vision kicks in, the LCO® gives you an edge. Battlefield-of-view keeps your peripheral vision free of knobs, dials, or the scope housing, which can mask targets. The LCO's bold, crisp 1-MOA dot stands out in blinding sun or heavy rain, and you can quickly adjust between 16 brightness settings to match your conditions. The LCO is waterproof to 66 feet and can take a beating thanks to its aircraft-grade aluminum housing.

KEY BENEFITS

See more in less light with Twilight Max Red Dot System

- True-to-life color consistency
- Premium edge-to-edge lens clarity

Improves target acquisition with its huge field-of-view

Eliminates distortion and color inconsistency with crystal-clear lenses

Offers 16 brightness settings for any situation, including night vision

Extends battery life with Motion Sensor Technology (MST)

Stands up to the roughest conditions with scratch-resistant lenses

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

RETICLE

DELTAPOINT PRO

The DeltaPoint Pro is proof that you don't have to compromise performance, even on a small sight. Its incredibly wide field-of-view and crystal-clear glass dominates the competition, while its rugged aluminum housing and spring steel guard ensure it will perform in the harshest conditions. Ease-of-use was also a focus when designing this elite red dot sight, which is why we put an easy access battery compartment on top and gave it click-adjustments for more precision. And this isn't just a pistol sight either; the DP Pro is just at home on AR's, shotguns, and pretty much anything else that goes bang.

KEY BENEFITS

See more in less light with Twilight Max Red Dot System

- True-to-life color consistency
- Premium edge-to-edge lens clarity

Improves battery access without removing the sight with top-side battery compartment

Extends battery life with Motion Sensor Technology (MST)

Delivers quick, precise, and repeatable adjustments with 1 MOA click-adjustments

Improves target acquisition with its huge field-of-view

Eliminates distortion and color inconsistency with crystal-clear lenses

Stands up to the roughest conditions with scratch-resistant lenses

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

FREEDOM RDS

All red dots are not created equal. The Freedom RDS (red dot sight) changes the game when it comes to consistency and durability in a red dot sight. We took our 70+ years of optics knowledge and created a red dot that's built Leupold tough, performs in extreme conditions, and won't break the bank. It's everything you need in a red dot and nothing you don't.

KEY BENEFITS

See more in less light with Twilight Red Dot System

- Standard color consistency
- Premium lens clarity

Delivers a clear and precise aiming point with 1-MOA dot

Extends battery life with Motion Sensor Technology (MST)

Offers precise 1/4-MOA click adjustments

Installs easily with AR height mount

Provides accurate mid-range engagements with pre-calibrated 223 Rem BDC dial

Superior ruggedness by Punisher testing and verification

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

BX-5 SANTIAM HD

Knowing your surroundings and being able to spot the tiniest details in tough lighting conditions can make or break your hunt. That's where our BX-5 Santiam HD comes in. Featuring our Twilight Max HD Light Management System, the BX-5 Santiam HD has unmatched low-light performance, while virtually eliminating glare. Its elite optical system also delivers edge-to-edge sharpness and contrast for comfortable all-day glassing, and its rugged, armor-coated, waterproof body is purpose built to take the abuse any backcountry adventure can dish out. The BX-5 Santiam HD truly redefines what a premium binocular should be.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Eliminates eye strain for all-day glassing comfort with a superior optical design

Survives the toughest conditions with lightweight, high-impact body

Offers easy maintenance with field-replaceable aluminum eyecups

Delivers crystal-clear images with precision focus adjustments

Provides comfortable hand placement with an open-bridge, dual-hinge design

Mounts easily with 1/4-20 threaded tripod adapter

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Superior ruggedness is tested for extreme climates

Waterproof, fogproof, and guaranteed to perform for life

BX-4 PRO GUIDE HD

The BX-4 Pro Guide HD binoculars are built around the Leupold Twilight Max HD Light Management System. The specialized lens coatings allow you to see more in less light and glass longer during the early predawn hours to well past dusk. The slim-hinge (32mm) or open bridge design and durable aluminum body is both comfortable to hold and lightweight enough for easy carrying. The textured body armor allows for a sure grip in any conditions, with or without gloves. Completely waterproof and backed by the Leupold Full Lifetime Guarantee, the BX-4 Pro Guide HD binoculars are a welcome addition for anyone who wants to see more outdoors.

SX-5 SANTIAM HD

Redefining top-tier spotting scopes, the SX-5 Santiam HD delivers the relentless performance die-hard hunters and shooters demand. A generous eyepiece provides premium edge-to-edge clarity and unmatched sharpness and definition, while Leupold's unparalleled Twilight Max HD Light Management System eliminates distortion and color aberration; helping you see more in less light. The SX-5 Santiam HD also features a rugged, yet lightweight armor for maximum protection in the harshest conditions and is designed and assembled in the USA. Like all Leupold spotters, the SX-5 Santiam HD is backed by the legendary Leupold Full Lifetime Guarantee.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Delivers more comfortable viewing with an over-sized eyepiece

Eliminates eye-strain and fatigue with generous eyebox

Provides incredibly sharp images with ultra-smooth focus

Increases comfort with twist-up eyecups

Stands up to the roughest conditions with scratch-resistant lenses

Controls glare with integrated sun shade

Mounts easily with tripod adapter

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Superior ruggedness is tested for extreme climates

Angled and straight eyepiece models available for different viewing preferences

Waterproof, fogproof, and guaranteed to perform for life

Designed and assembled in the USA

SX-4 PRO GUIDE HD

Built to take on the harshest conditions, this spotter is a must have for any serious hunter or shooter. It features an incredibly rugged magnesium body that is waterproof and fogproof, an oversized straight or angled eyepiece that provides all-day comfort, and Leupold's Twilight Max HD Light Management System, which helps you see more in less light, while reducing glare in direct light. And like all Leupold spotting scopes, the SX-4 Pro Guide HD is guaranteed to perform for life, or we'll repair or replace it for free. Whether you're going on your first big game hunt or helping repeat clients tag out year after year, this spotter should be in your kit.

GOLD RING

Proven performance, outstanding image quality, wide field-of-view, Impact grid reticle, best in class eye relief, and a compact size; our Gold Ring HD spotting scopes have it all. High-definition lenses provide sharper details at maximum magnification, while Leupold's unique Folded Light Path System uses mirrors rather than a heavy prism to create a more compact, lightweight design. This system also handles abuse better than prism systems, making it ideal for hunters or anyone else putting their optics through the paces.

KEY BENEFITS

See more in less light with Twilight Max HD Light Management System

- Maximizes ambient light in extreme low-light environments
- Excellent glare management and virtually eliminates image wash-out caused by stray light
- Premium High Definition edge-to-edge lens clarity

Offers large magnification in a compact design with folded light path technology

Maximizes durability and reduces weight with a magnesium body

Delivers incredibly sharp images with ultra-smooth focus

Offers comfortable viewing options thanks to an

adjustable eyecup

Mounts easily with tripod adapter

Stands up to the roughest conditions with scratch-resistant lenses

Superior ruggedness is tested for extreme climates

Waterproof, fogproof, and guaranteed to perform for life

Designed, machined, and assembled in the USA

RX-2800 TBR/W

The RX-2800 TBR/W rangefinder breaks new ground. With our new Alpha IQ ranging engine and optical design, the RX-2800 lets you make the best of any situation. Whether ringing steel at a mile or closing the distance on a herd of elk, this rangefinder will outperform in any conditions, giving you the advantage shot after shot.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range/Wind (TBR/W) technology

Delivers faster, more accurate readings with the Alpha IQ ranging engine

Provides exceptionally bright and clear images with a high light transmission red OLED display

Makes ranging long distances easy using 7x magnification

Boasts 2,800-yard ranging distance on reflective objects and 2,400 yards on trees

Maximizes durability with a high-impact aluminum chassis

Stays secure in all conditions thanks to easy-grip rubber armor

Mounts easily with a 1/4-20 tripod adapter

Waterproof and extreme climate tested

RX-1600i TBR/W

The RX-1600i TBR/W is the longest ranging unit in its class. We've integrated our own proprietary ranging engine for elite performance and accuracy. With an incredibly rugged, lightweight aluminum housing, the RX-1600i begs to be used, even in the harshest conditions.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range/Wind (TBR/W) technology

Generates arrow drops out to 175 yards with Bow-specific settings

Delivers incredibly fast ranging speeds using a high-performance laser engine

Provides exceptionally bright and clear images with a high light transmission red OLED display

Makes ranging long distances easy using 6x magnification

Boasts 1,600-yard ranging distance on reflective objects and 1,400 yards on trees

Maximizes durability with a high-impact aluminum housing

Stays secure in all conditions thanks to easy-grip rubber armor

100% waterproof and extreme climate tested

RX-1300i TBR

With ½ yard accuracy, 6x magnification, and True Ballistic Range technology, the RX-1300i TBR will give you the confidence you need, shot after shot. We've packed a ton of features in an easy to carry unit that's as versatile as it is small. The result is a piece of gear that will never leave your kit. From the range to the mountains, the RX-1300i TBR will never let you down.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range (TBR) technology

Generates arrow drops out to 175 yards with Bow-specific settings

Delivers incredibly fast ranging speeds using a high-performance DNA (Digitally eNhanced Accuracy) laser engine

Delivers exceptionally bright and clear images with high light transmission LCD display

Makes ranging long distances easy using 6x magnification

Easily measure game in the field using Trophy Scale

Boasts 1,300-yard ranging distance on reflective objects and 1,100 on trees

Provides a solid grip with an ergonomic housing design

Stays secure in all conditions thanks to easy-grip rubber armor

100% waterproof and extreme climate tested

RX-FULLDRAW 4

Your bow is custom-built to you, so your rangefinder should be, too. The RX-Fulldraw 4 combines the lightning-fast accuracy of Leupold's DNA® engine with the acclaimed Archer's Advantage™ software, making it the most ballistically advanced rangefinder on the market. Using your personal ballistics, shot distance, and angle compensation, the Fulldraw 4 calculates laser-accurate ranges based on your specific gear. Loaded with features designed for the modern archer, like Flightpath™ technology, we take the guess work out of achieving the perfect shot every time.

KEY BENEFITS

Use Flightpath technology to determine if your arrow will clear obstructions between you and your target out to 150 yards

Archer's Advantage software uses your arrow weight, arrow velocity, and peep height to calculate extremely accurate ballistic solutions

Bow-specific settings provides arrow drops out to 175 yards

Provides incredibly fast ranging speeds using a high-performance laser engine

Delivers exceptionally bright and clear images with high light transmission OLED display

Makes ranging long distances easy using 6x magnification

Boasts 1,200-yard ranging distance on reflective objects and 1,100 on trees

Stays secure in all conditions thanks to easy-grip rubber armor and ergonomic housing design

100% waterproof and extreme climate tested

The Leupold® Vendetta™ 2 bow-mounted rangefinder will revolutionize the way you hunt and dramatically improve your chance of success. Not since the introduction of the compound bow has there been such a dramatic innovation in bowhunting. The Vendetta 2 can be mounted to a compound bow or a crossbow to give you an instant and precise digital readout of your angle compensated range to target, with no excessive movement or noise. Simply push the trigger pad for an instant reading or hold the trigger for 3 seconds and release to enter a 40 second scan mode which continually adjusts distance, angles and elevation as your target moves. The Vendetta 2 will increase your success in the field and is backed by the Leupold Gold Ring Electronics Warranty.

KEY BENEFITS

Provides easy-to-read, high-contrast numbers with an LED display

Provides angle-compensated ranges using True Ballistic Range (TBR) technology

Quickly setup and dial in with adjustable mount

Delivers quick motionless ranges using a tethered pressure pad

Provides accurate ranges up to 75 yards

Delivers +/- 1 yard accuracy at full draw

Ranges update for 45 seconds while the target is on the move

Easy crossbow installation with 1-inch scope mount

100% waterproof and extreme climate tested

VENDETTA 2

- Bow mounted
- CR2 lithium battery
- LED display
- One touch continuous scan
- Waterproof
- Laser dot alignment

LTO-TRACKER 2 HD

Being aware of your surroundings not only takes skill, it takes the right tools. The Leupold LTO-Tracker 2 HD is the next evolution of thermal that allows you to see through darkness, track an animal, aid in search and rescue, or any other tasks where identifying a heat source might come in handy. The LTO-Tracker 2 HD features our new Beacon mode, which allows you to quickly recalibrate the screen to improve daytime use. This makes it easier to identify objects that have a similar heat signature to their backgrounds—like a downed deer on a sunny hillside. Housed in an all-aluminum body that's only 5.5 inches long and 7 ounces, it's ready to go wherever your next adventure takes you.

KEY BENEFITS

Delivers clear thermal images with high-resolution 390x390 display

Provides increased temperature sensitivity with a 320x240 thermal sensor

Improves daytime use with Beacon mode's screen calibration

Maximizes durability with a Gorilla Glass full-circle display

Offers long-range scanning with a 750-yard detection distance

Provides more efficient game recovery with a 300-yard deer detection distance

Improves identification at longer distances with 7x digital zoom

Offers unmatched durability with a lightweight aluminum housing

Easy-to-carry, compact design

LTO-TRACKER 2 HD

Thermal Sensor	Detection Distance (yds)	Typical Deer Detection Distance (yds)	Angular FOV	Thermal Detection Range	Frame Rate	Max Zoom	Display	Display Resolution	Startup Time	Battery Type / Life	Part Number	UPC Code

KEY FEATURES

- 390x390 high-resolution display
- 300-yard deer detection distance
- 320x240 thermal sensor
- 7x digital zoom
- Beacon mode
- Six color palettes
- Manual gain control
- Dimmable display
- Gorilla Glass full-circle display
- Lightweight aluminum housing
- 750-yard detection distance
- Scopecoat and lens covers included

AVAILABLE COLOR PALETTES

LTO-TRACKER 2

Compact and light enough to take on even the farthest backcountry hunt, your LTO-Tracker 2 shows you the heat signature of game, blood trails, and more—day or night. The LTO-Tracker 2 features our new Beacon mode, which allows you to quickly recalibrate the screen to improve daytime use. This makes it easier to identify objects that have a similar heat signature to their backgrounds. Like a good knife, binoculars, and a rangefinder, it's essential gear.

KEY BENEFITS

Delivers clear thermal images with a 240x204 resolution display

Provides increased temperature sensitivity with a 206x156 thermal sensor

Improves daytime use with Beacon mode's screen calibration

Offers long-range scanning with a 600-yard detection distance

Provides more efficient game recovery with a 250-yard deer detection distance

Improves identification at longer distances with 7x digital zoom

Offers unmatched durability with a lightweight aluminum housing

Easy-to-carry, compact design

KATMAI

The Katmai is the choice for any adventurer. Lightweight, rugged, and exceptionally clear; they can be trusted to keep your eyes fresh and your vision true.

KEY BENEFITS

Daylight Max provides UV protection for optimal performance in bright conditions

Diamondcoat Scratch Resistance reduces surface scratches with a hardened surface coating

No-slip Bridge provides all day comfort with no-slip, soft-touch rubber bridge pads

Lifetime Guarantee protects against manufacturer's defects for the life of the product

In-Fused Polarized Lenses eliminate glare and keep your eyes fresh on the water and in the field

Guard-ion Hydrophobic Coating sheds dirt and water for a clear, crisp image

Rx Ready compatible with prescription lens requirements

4 STEP MOUNTING SYSTEM GUIDE

1

FIT BASE TO RIFLE

Determine which mounts will fit your rifle by using the chart.

Rifleman Mounts and DeltaPoint Pro Mounts are shown at the end of this section.

2

CHOOSE A MOUNT TYPE

Determine a mount type based on features. Example; STD (adjustable windage), Dual Dovetail, Quick Release, BackCountry, or Cross-slot.

3

MATCH RING HEIGHT TO OBJECTIVE DIAMETER

Determine the height of the rings required to mount your scope based on the front objective diameter of the scope, profile of the rifle barrel, and the type of rifle action. The goal is to have the objective of the scope as close as possible to the barrel without touching.

4

FIT RING DIAMETER TO MAINTUBE DIAMETER

Determine the ring diameter required to fit the scope maintube diameter. Example; you would need a set of 30mm rings to mount a scope with a 30mm maintube diameter.

1

CHOOSE A MOUNT TYPE

STD™ (STANDARD™)

Strike-Forged steel rings
Traditional hunting style

Adjustable windage feature
For standard calibers less than .300 Win Mag

DD™ (DUAL DOVETAIL™)

Strike-Forged steel rings
Traditional hunting style

Standard to magnum calibers

QR™ (QUICK RELEASE™)

Strike-Forged steel rings
Traditional hunting style
Quick release & reattach feature

Standard to magnum calibers

CROSS-SLOT

PRW2™ (Perma-Rings
Weaver Style™)
QRW2™ (Quick Release
Weaver Style)

LRW™ (Leupold Rings
Weaver Style™)
Standard to magnum calibers

BACKCOUNTRY

Lightweight 7075 aircraft-grade aluminum
Available in cross-slot and one-piece integrated styles

Standard to magnum calibers
Long range MOA bases

RINGMOUNTS

Fits integral rifle receivers & rails
Rimfire (11mm, 13mm & 3/8")

CZ, Ruger & Sako models
Standard to magnum calibers

MARK 4®

Strike-Forged steel & aircraft-grade aluminum rings
Cross-slot style

Long range MOA bases
Standard to magnum calibers

IMS™ (INTEGRAL MOUNTING SYSTEM®)

For modern sporting rifles
Correct height with forward cantilever

Aircraft-grade aluminum
Standard to magnum calibers

AR-BALLISTIC

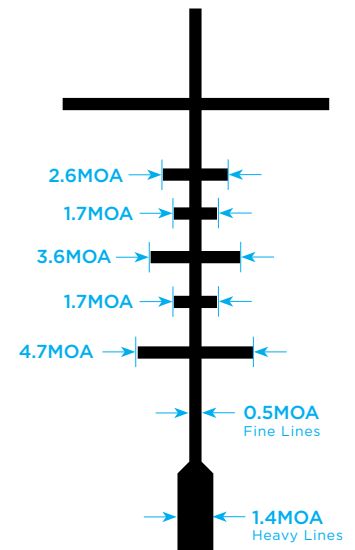

VX-FREEDOM

FULL RETICLE

SUBTENSION AND MAGNIFICATION:

The AR Ballistic reticle will measure (subtend) correctly when the riflescope is set to the highest available magnification. The reticle's apparent size in the field of view may vary between models of riflescope.

BULL-RING POST RETICLE

RETICLE FEATURES

- Bull-Ring circles standard NRA Service Rifle targets with an easy to center white ring
- The vertical post from the bottom provides a quick and accurate indicator of precise shot placement
- Bold pickets from the sides help visualize target centering and level cheekweld
- A simple line from the top reduces target obstruction

**BULL-RING POST,
VX-4.5HD SERVICE
RIFLE (MOA)**

	a = Heavy Line		b = Thin Line		c = Circle Diameter		d = Thin Opening

1-4.5x	1.7	8.2	0.7	3.2	7.7	36.4	60.0	280.3

CMR-W

D-EVO

FULL RETICLE

CMR-W RANGE HOLDOVERS AND WIND HOLDS:

The shooter will notice that the vertical line of the reticle is curved. This is not a mistake, but a calculated adjustment to the reticle due to the fact that the D-EVO has an off-axis objective lens. This curved reticle line follows the trajectory of the bullet as viewed from this off-axis objective lens.

FIREDOT 4 FINE RETICLE

RETICLE FEATURES

- European influenced design
- Thinner outer posts for less target coverage
- Upper field of view kept free of obstructions
- Fiber-optic powered center red-dot
- Multiple brightness settings for changing conditions
- FireDot Technology brings your eye to the center of the reticle for quick target acquisition
- Features Leupold's own Motion Sensor Technology (MST)
